**Creative Teachers in Primary Schools** Peter Woods, 2019-07-17 Is creative teaching still possible in English schools Can teachers maintain and promote their own interests and beliefs as well as deliver a prescribed National Curriculum Originally published in 1995 this book explores creative teachers attempts to pursue their brand of teaching despite the changes Peter Woods has discovered a range of strategies and adaptations to this end among such teachers including resisting change which runs counter to their own values appropriating the National Curriculum within their own ethos enhancing their role through the use of others and enriching their work through the National Curriculum to provide quality learning experiences If all else fails such teachers remove themselves from the system and take their creativity elsewhere A strong theme of self determination runs through these experiences While acknowledging hard realities the book is ultimately optimistic and a tribute to the dedication and

inspiration of primary teachers The book makes an important contribution to educational theory showing a range of responses to intensification as well as providing many detailed examples of collaborative research methods     **Improving the Primary School** Mrs Joan Dean,Joan Dean,2005-06-23 This book is a practical and informative guide on how to improve your primary school It is aimed at those in leadership positions headteachers senior staff advisors inspectors and education officers Aimed specifically at the primary school this book links research to classroom practice for results appeals to those in leadership roles is concise readable and of great practical use provides the reader with information that can improve the individual school     Primary Special Needs and the National Curriculum Ann Lewis,2002-01-04 This new edition of Ann Lewis s widely acclaimed text has been substantially revised and updated to take into account the recent revisions to the National Curriculum and the guidance of the Code of Practice It provides an analysis of the issues and practicalities of implementing the National Curriculum at primary school level an exploration of the main trends concerning the education of children with learning difficulties guidelines on safeguarding a broad curriculum assessing children s learning and helping all children gain access to the National Curriculum Related issues such as the grouping of children the role of the special needs coordinator resources record keeping and the legal position are also examined These areas are explored in the light of classroom practice evidence about the impact of the National Curriculum to date and wider research evidence and policy analysis     Developmental Planning for School Improvement David Hopkins,1995-01-01 This text represents the experiences from six English speaking countries in the field of school development planning There are chapters discussing staff development quality reviews and school organization and effectiveness     School Leadership Professor Gerald Grace,Gerald Grace,2005-08-31 This text examines the ways in which concepts of educational leadership and management have evolved historically and culturally and reviews contemporary debates about school leadership Theoretical context is illuminated by the research of 88 headteachers of English primary and secondary schools     **Assessing Quality in Applied and Practice-based Research in Education** John Furlong,Alis Oancea,2007-09-27 This book explores the challenges of assessing quality in applied and practice based research in education It offers various views on quality in applied and practice based research and proposes ways in which qualitycriteria may reflect more closely the diversity of applied research and its complex entanglements with practice and policy     *Routledge Library Editions: Special Educational Needs* Various,2021-07-29 This set of 62 volumes originally published between 1951 and 1999 amalgamates a wide breadth of literature on Special Educational Needs with a particular focus on inclusivity class management and curriculum theory This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of Education and those undertaking teaching qualifications     **The Social World of Children's Learning** Andrew Pollard,2001-01-01 Do children still matter in education With its focus on children s learning in the initial three years of schooling this book contains the first part of a report of an

Carter, 2012-10-12 This text the second in a two volume set examining the process of educational reform describes case studies on the change process of education as it impacts on the individual at work The authors provide interesting comparisons of similar changes occurring within education in different national settings including Australia New Zealand Israel the USA and the UK The case studies are based on three themes systematic change the transition from policy to practice and curriculum contexts The effects of governmental control over the curriculum and attempts to reform education by legislation are explained and the similarities are seen as marginalisation of professional educators corporatisation of education systems instrumentalisation of curriculum and the inability of those in power to draw from past knowledge on educational change Written to stand alone this book can also be read in conjunction with volume 1 International Perspectives on Educational Reform and Policy Implementation which examines the historical social and economic influences on education policy reform The authors argue that change takes a predictable format and once understood can be directed and managed The books are intended to be of interest to all involved in the planning and implementation of change together pointing the way to effective management of such change processes      **Key Issues for Primary Schools** Michael Farrell, 2003-09-02

had previously been given to the views of children on matters relating to their education The book examines various themes relating to advocacy in relation to classroom practice school organisation and professional development in all phases of education Additionally the role of parents and of support agencies is considered Each theme is developed by an author with expertise in that field and the emphasis of the book is upon the practical considerations of implementing advocacy programmes in schools     *Readings for Reflective Teaching in the Primary School* Andrew Pollard,1996     Crisis in the Primary Classroom Maurice Galton,2021-12-24 First published in 1995 Crisis in the Primary Classroom redefines the crisis plaguing primary classrooms by challenging many of the educational and political orthodoxies of the nineties The book is set during a particular period in the nineties when primary education was under attack from the Government and sections of the media with accusations that reading standards had fallen the National Curriculum was not being taught well and training colleges had failed to produce sufficient teachers of quality In response to these concerns the Government commissioned a report which presented a series of solutions Maurice Galton argues that the report failed to identify the root causes of the problems facing primary schools He examines critically whether the National Curriculum was necessary and whether teaching methods and classroom organization really needed to be changed radically He also addresses the issue of quality among teachers suggesting ways in which this might be developed Crisis in the Primary Classroom deserves to be read by all concerned with the planning administration and practice of primary education Teachers will be encouraged by the message that methods found to be successful in the past must be accommodated in new patterns of organization and classroom practice
