Ancestral Images Stephanie Moser, 2018-09-05 Pictorial reconstructions of ancient human ancestors have twin purposes to make sense of shared ancestry and to bring prehistory to life Stephanie Moser analyzes the close relationship between representations of the past and theories about human evolution showing how this relationship existed even before a scientific understanding of human origins developed How did mythological religious and historically inspired visions of the past in existence for centuries shape this understanding Moser treats images as primary documents and her book is lavishly illustrated with engravings paintings photographs and reconstructions In surveying the iconography of prehistory Moser explores visions of human creation from their origins in classical early Christian and medieval periods through traditions of representation initiated in the Renaissance She looks closely at the first scientific reconstructions of the nineteenth century which dramatized and made comprehensible the Darwinian theory of human descent from apes She considers as well the impact of reconstructions on popular literature in Europe and North America showing that early visualizations of prehistory retained a firm hold on the imagination a hold that archaeologists and anthropologists have found difficult to shake

How the story started

A rare group of baby dinosaurs grew up in a beautiful green valley where they lived among tall plants and old cycads. These dinosaurs were not like other dinosaurs; they were extraordinary in every way. Their lives were filled with the colors of curiosity and excitement, which made them different from their valley friends. But what made these young dinosaurs stand out was that they knew a secret that made their hearts race and their imaginations soar: they could move through time. The valley itself was a beautiful haven, like a prehistoric Eden, with clear streams running through it and emerald-colored plants as far as the eye could see. The valley was filled with the beautiful sounds of singing insects and birds, and tall palm trees gently swayed in the warm, fragrant breeze. This amazing group of dinosaurs was born here in a place that has always been beautiful. These young dinosaurs were filled with a sense of wonder that went beyond what they normally did. While most of the people who lived in the valley were happy to graze and relax in the shade, this unique group couldn't get enough excitement. Every day was a new adventure, whether it was finding secret waterfalls, navigating mysterious caves, or playing complicated hide-and-seek among the ancient ferns. But there was one journey that was different from the others. They found out about the secret by accident, but it took them on the most amazing trip of their lives. Deep in the middle of their valley, at the base of a twisted and tall oak tree, was a secret tunnel that led to different times. This old oak tree had roots that went deep into the ground and branches that reached so far up that they might have touched the fabric of time. One of the young dinosaurs bumped into an old oak tree while playing their favorite game of hide-and-seek on a sunny afternoon. In an instant, they were taken to a planet that was around millions of years before their time. When they found themselves surrounded by huge beasts they had only heard about in bedtime tales, they were scared at first. The huge Tyrannosaurus rex, the tall Brachiosaurus, and the heavily protected Ankylosaurus all lived in the same old area. But as they went deeper into this ancient world, their fear turned into awe. They were amazed by the power of these huge animals, as well as by how big they were and how beautiful the scenery was around them. They walked through lush jungles with the sounds of exotic birds and rustling leaves. They found peaceful prehistoric lakes that sparkled in the golden light and gasped when they saw dinosaurs walking around freely, as if time hadn't changed them. It didn't take these young time travelers long to figure out that they weren't just going through. They made friends with the people who lived in this old land because they were curious and liked to try new things. They learned how to get food from herbivorous dinosaurs who showed them the best places to eat and taught them how to avoid the most dangerous enemies. They were wandering the deep jungle one amazing day when they found a nest of baby dinosaurs. These tiny animals were so cute with their tiny horns and squeaky sounds. The young time travelers couldn't bear to leave them on their own, so they stayed to guard and guide them. Their goal was to get the dinosaur babies back to their parents, which was a hard and touching journey. As they went through the wilderness on their mission, they faced a number of dangerous situations. They had to cross dangerous, roaring rivers. Some dinosaurs used their long necks to build bridges, while others moved quickly and deftly.

through the dangerous water They used their brains and worked together to outsmart the hungry pterosaurs that were looking for food in the sky
