Economic Research Service,1961 **Bulletin** ,1924 *Brands, Geographical Origin, and the Global Economy* David M. Higgins,2018-05-26 Indications of geographic origin for foodstuffs and manufactures have become an important source of brand value since the beginnings of globalization during the late nineteenth century In this work David M Higgins explores the early nineteenth century business campaigns to secure national and international protection of geographic brands He shows how these efforts culminated in the introduction of legal protocols which protect such brands including Champagne Sheffield Swiss made watches and Made in the USA Higgins explores the major themes surrounding these indications tying in the history of global marketing and the relevant laws on intellectual property He also questions the effectiveness of European Union policy to promote regional and local foods and why such initiatives brought the EU in conflict with North America especially the US He extends the study with a reflection on contemporary issues affecting globalization intellectual property less developed countries and supply chains **Biological Economies** Richard Le Heron, Hugh Campbell, Nick Lewis, Michael Carolan, 2016-01-22 Recent agri food studies including commodity systems the political economy of agriculture regional development and wider examinations of the rural dimension in economic geography and rural sociology have been confronted by three challenges These can be summarized as more than human approaches to economic life a post structural political economy of food and agriculture and calls for more enactive performative research

approaches This volume describes the genealogy of such approaches drawing on the reflective insights of more than five years of international engagement and research It demonstrates the kinds of new work being generated under these approaches and provides a means for exploring how they should be all understood as part of the same broader need to review theory and methods in the study of food agriculture rural development and economic geography This radical collective approach is elaborated as the Biological Economies approach The authors break out from traditional categories of analysis reconceptualising materialities and reframing economic assemblages as biological economies based on the notion of all research being enactive or performative
