*Re:view*, 1994 Foucault on the Arts and Letters Catherine M. Soussloff, 2016-10-06 As one of the most important philosophers of the 20th century Michel Foucault's reputation today rests on his political philosophy in relation to the contemporary subject in a neo liberal

and globalized society This book offers insight into the role of the arts in Foucault's thought as a means to better understanding his contribution to larger debates concerning contemporary existence Visual culture literary film and performance studies have all engaged with Foucauldian theories but a full examination of Foucault's significance for aesthetic discourse has been lacking until now This book argues that Foucault's particular approach to philosophy as a way of thinking the self through the work of art provides significant grounds for rethinking his impact today The volume moves across as many disciplinary boundaries as Foucault himself did demonstrating the value of Foucault's approach to aesthetic discourse for our understanding of how the arts and humanities reflect upon contemporary existence in a globalized society

"Visions of the Industrial Age, 1830-1914" Amy Woodson-Boulton, 2017-07-05 Providing a comprehensive interdisciplinary assessment and with a particular focus on expressions of tension and anxiety about modernity this collection examines visual culture in nineteenth century Europe as it attempted to redefine itself in the face of social change and new technologies Contributing scholars from the fields of history art literature and the history of science investigate the role of visual representation and the dominance of the image by looking at changing ideas expressed in representations of science technology politics and culture in advertising art periodicals and novels They investigate how during the period new emphasis was placed on the visual with emerging forms of mass communication photography lithography newspapers advertising and cinema while older forms as varied as poetry the novel painting interior decoration and architecture became transformed The volume includes investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces Visions of the Industrial Age 1830-1914 offers a thorough exploration of both the nature of modernity and the nature of the visual **Art Market Research** Tom McNulty, 2013-12-27 This book is for art market researchers at all levels A brief overview of the global art market and its major stakeholders precedes an analysis of the various sales venues auction commercial gallery etc Library research skills are reviewed and advanced methods are explored in a chapter devoted to basic market research Because the monetary value of artwork cannot be established without reference to the aesthetic qualities and art historical significance of our subject works two substantial chapters detail the processes involved in researching and documenting the fine and decorative arts respectively and provide annotated bibliographies Methods for assigning values for art objects are explored and sources of price data both in print and online are identified and described in detail In recent years art historical scholarship increasingly has addressed issues related to the history of art and its markets a chapter on resources for the historian of the art market

offers a wide range of sources Finally provenance and art law are discussed with particular reference to their relevance to dealers collectors artists and other art market stakeholders

**Foucault on Painting** Catherine M. Soussloff,2017-11-23 Michel Foucault had been concerned about painting and the meaning of the image from his earliest publications yet this aspect of his thought is largely neglected within the disciplines of art history and aesthetic theory In *Foucault on Painting* Catherine M Soussloff argues that Foucault's sustained engagement with European art history critically addresses present concerns about the mediated nature of the image in the digital age Foucault's writing on painting covers four discrete periods in European art history seventeenth century southern Baroque mid nineteenth century French painting Surrealism and figurative painting in the 1960s and 70s as well as five individual artists Velázquez Manet Magritte Paul Reyberolle and Gerard Fromanger As Soussloff reveals in this book Foucault followed a French intellectual tradition dating back to the seventeenth century which understands painting as a separate area of knowledge Painting a practice long considered silent in its operations and effects afforded Foucault an ideal discipline to think about history and philosophy simultaneously Using a comparative approach grounded in art history and aesthetics Soussloff explores the meaning of painting for Foucault's philosophy and for contemporary art theory proposing a new relevance for a Foucauldian view of ethics and the pleasures and predicaments of contemporary existence
