Rafael Viñoly Rafael Viñoly, 2002-11-21 Rafael Viñoly became famous as the architect of the stunning Tokyo International Forum 1989 1996 In Japan where land is at a premium and public spaces are rare the Forum with its 2.7 hectares and unusual design of public space was widely admired Originating in Uruguay Viñoly heads an architectural office with an impressive list of projects in the areas of architecture urban planning and interior design including significant buildings such as the Philadelphia Regional Performing Arts Center which opened recently Princeton University Stadium the New Bronx Supreme Criminal Court Complex In 1969 Viñoly founded his first office in Buenos Aires which was influenced by the Modern Movement but also by the ideas and concepts of the 1960s reflected in the work of Buckminster Fuller Archigram and the Smithsons Due to the political situation he emigrated and opened an office in New York in 1982 Despite the difficulties involved in starting over again in a new country where in the meantime post modernism was prevalent Viñoly stayed true to his style of architecture feeling bound to the ethical considerations of modernism yet constantly questioning it adapting it to changing conditions With offices in New York and Tokyo Rafael Viñoly Architects is now one of the most successful architectural offices worldwide This book documents a large number of Viñoly's most significant buildings and projects It also includes an essay by Joan Ockman one of the best known architecture theoreticians in the USA and texts by Rafael Viñoly on his career which has been marked by the difficult political situation in Argentina and the cultural exchange between S America Europe and the USA Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Architecture as Cultural and Political Discourse* Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Königsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on Christmas Island **Analogical Thinking in Architecture** Jean-Pierre

Chupin,2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories *Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl* Avery Library,1990

Theorizing a New Agenda for Architecture: Kate Nesbitt,1996-03 Theorizing a New Agenda for Architecture An Anthology of Architectural Theory collects in a single volume the most significant essays on architectural theory of the last thirty years A dynamic period of reexamination of the discipline the postmodern era produced widely divergent and radical viewpoints on issues of making meaning history and the city Among the paradigms presented are architectural postmodernism phenomenology semiotics poststructuralism deconstruction and feminism By gathering these influential articles from a vast array of books and journals into a comprehensive anthology Kate Nesbitt has created a resource of great value Indispensable to professors and students of architecture and architectural theory Theorizing a New Agenda also serves practitioners and the general public as Nesbitt provides an overview a thematic structure and a critical introduction to each essay The list of authors in Theorizing a New Agenda reads like a Who's Who of contemporary architectural thought Tadao Ando Giulio Carlo Argan Alan Colquhoun Jacques Derrida Peter Eisenman Marco Frascari Kenneth Frampton Diane Ghirardo Vittorio Gregotti Karsten Harries Rem Koolhaas Christian Norberg Schulz Aldo Rossi Colin Rowe Thomas Schumacher Ignasi de Sol Morales Rubi Bernard Tschumi Robert Venturi and Denise Scott Brown and Anthony Vidler A bibliography and notes on all the contributors are also included **Federal Register** ,1985 [Some Assembly Required](#) Michael Sorkin, One of the best architecture critics writing today presents a new collection which previews the state of contemporary architecture and surveys the dramatic changes in the urban environment of the last decade

Early and Unpublished Writings of Christopher Alexander Howard Davis,2022-08-17 This book brings together key works of the noted architect and architectural theorist Christopher Alexander 1936 2022 many of which have

not been published before The book contains twenty five essays and other works many chosen from the newly organized Christopher Alexander archive providing a window into the ideas and thought process of one of the most innovative architectural thinkers of the twentieth century The items span Alexander s fifty year career beginning with an early version of his PhD dissertation based on fieldwork in India continuing to fifteen years in the development of A Pattern Language one of the best selling books in the history of architecture and proceeding to the writing of The Nature of Order Alexander s four volume masterwork and beyond The writings combine theory and descriptions of practice and together support a blueprint for the development of a new humane way of building while also providing a window into the mind of an extraordinary thinker teacher and professional

Introducing Architectural Tectonics Chad Schwartz,2016-10-04 Introducing Architectural Tectonics is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in eleven countries including Germany Italy United States Chile Japan Bangladesh Spain and Australia and designed by such notable architects as Tadao Ando Herzog de Meuron Kengo Kuma Olson Kundig and Peter Zumthor Although similarities do exist between the projects their distinctly different characteristics location and climate context size program construction methods and range of interpretations of tectonic expression provide the most significant lessons of the book helping you to understand tectonic theory Written in clear accessible language these investigations examine the poetic creation of architecture showing you lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office

Rethinking Urban Transport After Modernism David Dewar,Fabio Todeschini,2017-07-05 For the last seven decades urban settlement policy worldwide has been increasingly dominated by modernist precepts and by urban decisions made in discipline specific silos The urban management consequences have been invariably negative with increasing sprawl fragmentation and separation resulting in a wide range of environmental social and economic problems This book explores the role of movement in a more integrated approach to urban settlement and how thinking policies and actions need to change South Africa is used as a particularly good case study since patterns of sprawl fragmentation and separation have been exacerbated by apartheid while recent legislation has demanded a reversal of these tendencies

Anti-Veiling Campaigns in the Muslim World Stephanie Cronin,2014-04-24 In recent years bitter controversies have erupted across Europe and the Middle East about women s veiling and especially their wearing of the face veil or niqab Yet the deeper issues contained within these controversies secularism versus religious belief individual freedom versus social or family coercion identity versus integration are not new but are strikingly prefigured by earlier conflicts This book examines

the state sponsored anti veiling campaigns which swept across wide swathes of the Muslim world in the interwar period especially in Turkey and the Balkans Iran Afghanistan and the Soviet republics of the Caucasus and Central Asia It shows how veiling was officially discouraged and ridiculed as backward and although it was rarely banned veiling was politicized and turned into a rallying point for a wider opposition Asking a number of questions about this earlier anti veiling discourse and the policies flowing from it and the reactions which it provoked the book illuminates and contextualizes contemporary debates about gender Islam and modernism

Historic Cities Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute s Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Design Actions for Shifting Conditions Fabrizia Berlingieri, Roberto Cavallo, Emilia Corradi, Hans de Boer, 2022-09-06 A spatial lens on Climate Change dynamics in urban transitions considering the growing importance that the urban environments assume within contemporary territorial transformations yet little room is offered within market driven societies to critically reflect the spatial impact that cities face vis vis the urgencies for environmental rebalancing It embraces a wide range of phenomena we all live and experience nowadays not only incidentally but more in a structural way forcing us to rethink our present state and explore futures Transitions embody the fluctuating form of late capitalism with its raisings and disruptions Regarding the environmental conditions they are affecting the world regions habitability the phenomenon of progressive urbanization versus agricultural land abandonment UN 2018 With these premises transitions seem to be a proper reference for an interdisciplinary and conceptual frame addressing the transformation of urban and metropolitan contexts which will be the leading players for the coming decades Funders DASTU Territorial Fragilities Research Project funded by the Italian Ministry of Education Universities

Maritime Operations Law in Practice David Letts, Rob McLaughlin, 2022-12-09 The law that applies to maritime operations at sea is complex and comprises two distinct elements treaty law 1982 United Nations Convention on the Law of the Sea and the cases and incidents that occur at sea in both peacetime and during armed conflict

which result in the creation of customary international law applicable to maritime operations at sea Covering sovereignty and vessel status jurisdiction and interdiction freedom of navigation maritime law enforcement and security and the law of naval warfare this edited collection brings together the most famous and influential cases and incidents at sea Exploring the entire spectrum of maritime operations from high end war fighting to constabulary operations that are conducted by naval forces and maritime law enforcement agencies at sea to provide the factual circumstances of each case or incident offering sophisticated analysis and insights into the case or incidents enduring importance and their significance for the development of the law applicable to maritime operations and offering a detailed account and evaluation of the most critical but rarely understood cases in maritime operations law which encourages comparison between key cases this book will be an essential reference for practitioners scholars teachers and students of maritime operations law **BIM Design** Richard

Garber,2014-08-11 Building information modelling BIM is revolutionising building design and construction For architects BIM has the potential to optimise their creativity while reducing risk in the design and construction process thus giving them a more significant role in the building process This book demonstrates how innovative firms are using BIM technologies to move design away from the utilitarian problems of construction engaging them in a stunning new future in the built environment Whereas recent books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of construction fabrication operations This book also engages BIM s pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam The Cybernetic Brain Andrew

Pickering,2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present The Cybernetic Brain explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary

robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other The Politics of Architectural Pedagogy in Iran Ali Javid,2024-08-26 The Politics of Architectural Pedagogy in Iran explores the evolution of architectural pedagogy during two significant socio political upheavals in Iran The White Revolution 1963 and the Islamic Revolution 1979 It examines how these transformative periods influenced the field providing valuable insights into the intersection of architectural education and broader socio political shifts in Iran By examining the critical role of education in achieving geopolitical objectives during the Cold War this book explores architectural pedagogy as an agent for resistance and revolution It highlights how architectural pedagogy not only reflects radical ideologies but also actively engages in socio political transformation The book uncovers how architectural pedagogy became one of the mechanisms to accomplish revolutionary goals This is evident in initiatives like the Pedagogical Revolution during the White Revolution 1963 aimed at modernizing educational institutions and the Revolutionary Pedagogy during the Islamic Revolution 1979 which sought to serve the masses and the religious revolutionary society In this way the book adds a new geopolitical perspective to the contemporary discourse of radical pedagogies This book explores the intricate connections between architectural pedagogy and politics through a transdisciplinary approach It analyzes original multilingual documents including political agendas cultural agreements curricula teaching methods student works exhibitions and conferences It will be of interest to architectural historians and architecture students particularly those interested in Global South development modernism architectural pedagogy international relations and Middle Eastern studies *Constructing Gardens, Cultivating the City* Amanda Shoaf Vincent,2023-05-16 Constructing Gardens Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century as part of the city s program of adaptive reuse of industrial spaces Thanks to laws that gave the city more political autonomy Paris s local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium The parks in this book represent this campaign and illustrate different facets of their cultural and historical context Archival research interviews and analyses of the parks reveal how postmodern debates about urban planning the historic city public space and nature s presence in an urban setting influenced their designs In sum the city adopted the garden as a model for public parks investing in complex richly symbolic and representational spaces These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris s role as a world city The parks development process often included points of conflict pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined These parks demonstrate the ongoing

cultivation of the city over time in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing Just as the Luxembourg Gardens the Tuileries and the Buttes Chaumont parks exemplify their eras cultural dynamics such parks as the Jardin Atlantique Parc Andr Citro n and the Jardin des Halles express contemporary French culture within the archetypal space of their era the city Finally they point the way to current trends in landscape architecture such as citizen gardening and ecological initiatives
