Love Other Near Death Experiences:

Love and Other Near-Death Experiences Mil Millington, 2006-02-14 Hello My name is Robert and I haven't been dead for sixty three days now If he hadn't bought those crummy towels Rob would be six feet under But his poor shopping sense accidentally set off a convoluted chain of events that meant he lived when all those others died in the pub explosion Okay maybe it wasn't the ugly towels that saved his life Perhaps it was some other random action some other small movement that was the utterly trivial yet vitally important factor And that's the real problem Now with his wedding fast approaching Rob suddenly finds himself paralyzed with indecision about Every Little Thing He just can't be sure which seemingly innocuous choice will mean the difference between life and death Should he wash the fork or the knife first Should he step out of the shower with his left leg or his right leg Red sweater or blue One thing is certain His fiancée Jo is at her wits end To save his relationship and his sanity Rob embarks on a quest to find out why he's still breathing When he meets up with others who have had similar lifesaving near misses he figures the answer must be close But fate may just catch them yet for Rob's search to understand why he's still alive might well turn out to be the very thing that kills them all Filled with the barbed and sparkling dialogue that made *Things My Girlfriend and I Have Argued About* a cult hit Mil Millington's **Love and Other Near Death Experiences** is a hilarious existential romantic comedy about second guesses and second chances

Nothing More Important Than Others Kevin R Williams, 2019-06-07 Nothing is more important than other people Near death experiences affirm this fact Why Because God is manifest within other people and how we treat other people is how we treat God Loving other people unconditionally is the goal for every human being because God is love and love is God How we treat other people will determine exactly which afterlife realm we will inhabit after death Those people who love others the most will inhabit the highest heaven In other words the afterlife is about deeds not creeds and loving others unconditionally is where God is manifest the most Giving and receiving love is what produces heaven it's the only thing we can take with us after death Loving others is heaven And love is joy The more love we have for other people the more joy we have in our lives And there are a multitude of heavens of varying degree of love and joy so that no one goes where they are unwelcome or do not fit in Birds of a feather flock together This book reveals the importance of loving others Three exceptional near death experiences are provided to make this point The author's research conclusions includes topics such as the Earth as the School of Hard Knocks the problem of war and evil the death process the soul as an orb the homecoming experienced by NDErs the intense emotions experienced in NDEs forgotten knowledge people receive during their NDE and a description of some of the afterlife realms This book also includes articles from the author's website showing how love is supreme when it comes to NDEs

Testimonies about near death experiences What does the Bible say Can these experiences be deceptive and consequential What heaven and hell are like Near-Death Experiences John Martin Fischer,Benjamin Mitchell-Yellin,2016-05-02 Near Death Experiences gives an account of the profound meaning and striking transformative effects that near death experiences engender They argue that the integrity of scientific inquiry is compatible with genuine understanding of the significance of human spirituality *The Transformative Power of Near-Death Experiences* Dr. Penny Sartori,Kelly Walsh,2017-11-14 An enthralling study of the far reaching positive effects of Near Death Experiences a well written and thought provoking book Anita Moorjani author of *Dying to Be Me* Near death experiences NDEs are often transformative not only on an individual level but on a collective level too This book contains a selection of inspiring stories from ordinary people whose extraordinary experiences have changed the course and direction of their lives opening each and every one of them to the power of divine love Recent years have seen a dramatic change of attitude towards NDEs Unfortunately the ongoing debates about NDEs have detracted greatly from their transformational effects and how empowering they can be for the whole of mankind For those who experience them NDEs often instill the knowledge that we are all interconnected and part of one great whole This book aims to inspire people from all walks of life creeds cultures and faiths to the transformational power of the message of NDEs and to show how the love experienced during the NDE has the capacity to heal minds bodies and souls **Science and the Near-Death Experience** Chris Carter,2010-08-23 The scientific evidence for life after death Explains why near death experiences NDEs offer evidence of an afterlife and discredits the psychological and physiological explanations for them Challenges materialist arguments against consciousness surviving death Examines ancient and modern accounts of NDEs from around the world including China India and many from tribal societies such as the Native American and the

Maori Predating all organized religion the belief in an afterlife is fundamental to the human experience and dates back at least to the Neanderthals By the mid 19th century however spurred by the progress of science many people began to question the existence of an afterlife and the doctrine of materialism which believes that consciousness is a creation of the brain began to spread Now using scientific evidence Chris Carter challenges materialist arguments against consciousness surviving death and shows how near death experiences NDEs may truly provide a glimpse of an awaiting afterlife Using evidence from scientific studies quantum mechanics and consciousness research Carter reveals how consciousness does not depend on the brain and may in fact survive the death of our bodies Examining ancient and modern accounts of NDEs from around the world including China India and tribal societies such as the Native American and the Maori he explains how NDEs provide evidence of consciousness surviving the death of our bodies He looks at the many psychological and physiological explanations for NDEs raised by skeptics such as stress birth memories or oxygen starvation and clearly shows why each of them fails to truly explain the NDE Exploring the similarities between NDEs and visions experienced during actual death and the intersection of physics and consciousness Carter uncovers the truth about mind matter and life after death

Near Death Experiences Oliver Faith, AI, 2025-02-14 *Near Death Experiences* explores the profound phenomenon of NDEs examining accounts of individuals who have clinically died and returned to life It probes fundamental questions about consciousness spirituality and the nature of reality particularly focusing on out of body experiences life reviews and feelings of peace Historically dismissed NDEs are now recognized as complex experiences that challenge scientific materialism and offer comfort to those facing death or grief The book uniquely synthesizes scientific research religious interpretations and personal narratives to bridge the gap between science and spirituality making it valuable for those interested in religion spirituality and consciousness studies The book is structured to provide a comprehensive overview starting with the core elements of NDEs It then examines scientific research analyzing physiological and psychological aspects Next it explores religious interpretations across faiths like Christianity Islam Hinduism and Buddhism comparing beliefs about death and the afterlife Finally it analyzes cross cultural accounts identifying universal motifs and cultural variations This approach culminates in arguing that NDEs regardless of their origin can profoundly impact individuals fostering compassion and diminishing the fear of death

God So Loved the World Robert Spitzer, 2016-03-10 In this volume the brilliant Fr Spitzer probes in detail the major question that if an intelligent Creator God manifest in logical proofs scientific evidence and near death experiences who is the source of our desire for the sacred and the transcendental desires for truth love goodness and beauty would want to reveal himself to us personally and ultimately He then shows this is reasonable not only in light of our interior experience of a transcendent Reality but also that a completely intelligent Reality is completely positive implying its possession of a completely positive virtue namely love defined as agape This leads to the question whether God might be unconditionally loving and if he is whether he would want to make a personal appearance to us in a perfect act of empathy

face to face After examining the rational evidence for this he reviews all world religions to see if there is one that reveals such a God an unconditionally loving God who would want to be with us in perfect empathy This leads us to the extraordinary claim of Jesus Christ who taught that God is Abba the unconditionally loving Father Jesus claims go further saying that He is also unconditional love and that his mission is to give us that love through an act of complete self sacrifice He also claims to be the exclusive Son of the Father sent by God to save the world and the one who possesses divine power and authority The rest of the book does an in depth examination of the evidence for Jesus unconditional love of sinners his teachings his miracles and his rising from the dead As well as the evidence for Jesus gift of the Holy Spirit that enabled his disciples to perform miracles in his name and evidence for the presence of the Holy Spirit today If this strong evidence convinces us to believe that Jesus is our ultimate meaning and destiny and desire His saving presence in our lives that evidence should galvanize the Holy Spirit within us to show that Jesus is Lord and Savior the way the truth and the life And our faith in him will transform everything we think about our nature dignity and destiny and how we live endure suffering contend with evil and treat our neighbor

Ethics and Animals Harlan B. Miller, William H. Williams, 2012-12-06 This volume is a collection of essays concerned with the morality of human treatment of nonhuman animals The contributors take very different approaches to their topics and come to widely divergent conclusions The goal of the volume as a whole is to shed a brighter light upon an aspect of human life our relations with the other animals that has recently seen a great increase in interest and in the generation of heat The discussions and debates contained herein are addressed by the contributors to each other to the general public and to the academic world especially the biological philosophical and political parts of that world The essays are organized into eight sections by topics each section beginning with a brief introduction linking the papers and the sections to one another There is also a general introduction and an Epilog that suggests alternate possible ways of organizing the material The first two sections are concerned with the place of animals in the human world Section I with the ways humans view animals in literature philosophy and other parts of human culture and Section II with the place of animals in human legal and moral community The next three sections concern comparisons between human and nonhuman animals Section III on the rights and wrongs of killing Section IV on the humanity of animals and the animality of humans and Section V on questions of the conflict of human and animal interests

Near Death Experiences and Sacred Scripture Douglas Charles Hodgson, 2024-08-30 Near Death Experiences and Sacred Scripture The Parallel Messaging examines striking similarities and parallels between messaging found in accounts of those who have written about their near death experiences and in accounts contained in the sacred scriptures of the world's great religions This symmetrical and mutually reinforcing messaging is timeless in nature and is arguably more relevant today than in any previous period in human history as humanity continues to face existential threats to its survival In an era of rampant materialism and consumerism armed conflict environmental degradation species extinction global warming as well as an obsessive preoccupation with self rather than others and a devaluation of the life's sanctity It's timely to spark a revived interest in and knowledge of God and the afterlife and in seeking answers to life's larger religious spiritual philosophical and metaphysical questions This book will provide assurance and solace to those who are terminally ill or fear the death of their physical body for those who are suffering a difficult bereavement and for those who feel lost and confused about the meaning and purpose of life and what lies ahead of them

The Science of Near-Death Experiences John C. Hagan, 2017-01-30 What happens to consciousness during the act of dying The most compelling answers come from people who almost die and later recall events that occurred while lifesaving resuscitation emergency care or surgery was performed These events are now called near death experiences NDEs As medical and surgical skills improve innovative procedures can bring back patients who have traveled farther on the path to death than at any other time in history Physicians and healthcare professionals must learn how to appropriately treat patients who report an NDE It is estimated that more than 10 million people in the United States have experienced an NDE Hagan and the contributors to this volume engage in evidence based research on near death experiences and include physicians who themselves have undergone a near death experience This book establishes a new paradigm for NDEs

Out-of-Body and Near-Death Experiences Michael N. Marsh, 2010-01-21 Personalised accounts of out of body OBE and near death NDE experiences are frequently interpreted as offering evidence for immortality and an afterlife Since most OBE

NDE follow severe curtailments of cerebral circulation with loss of consciousness the agonal brain supposedly permits mind soul or consciousness to escape neural control and provide glimpses of the afterlife Michael Marsh critically analyses the work of five key writers who support this so called dying brain hypothesis He firmly disagrees with such otherworldly mystical or psychical interpretations ably demonstrating how they are explicable in terms of brain neurophysiology and its neuropathological disturbances The original basis and thrust of Marsh s claim sees the recorded phenomenology as reflections of brains rapidly reawakening to full conscious awareness consistent with other reported phenomenologies attending recovery from antecedent states of unconsciousness the re awakening brain hypothesis From this basis Marsh also offers a re classification of NDE into early and late phase sequences thereby dismantling the untenable concepts of core and depth experiences Marsh further provides a detailed examination of the spiritual and quasi religious overtones accorded OBE NDE highlighting their inconsistencies when compared with classical accounts of divine disclosure and the eschatological precepts of resurrection belief as professed credally In assessing the implications of anthropological philosophical and theological concepts of personhood and soul as arguments for personal survival after death Marsh celebrates the role of conventional faith in appropriating the expectant biblical promises of a New Creation
