**The Court as Archive** Ann Genovese,Trish Luker,Kim Rubenstein,2019-02-19 Until the late 20th century an archive generally meant a repository for documents as well as the generic name for the wide range of documents the repository might hold An archive could be visited and then also searched to discover past actions or lives that had meaning for the present While historians and historiographers have long understood the contests that archives contain and represent the very idea of the archive has over the last 40 years become the subject and object of widening and

intensified consideration This consideration has been intellectual from scholars in a wide range of disciplines and public from communities and individuals whose stories are held captive or sometimes hidden or excluded from official archives as well as institutional It has involved scrutiny and critique of official archives limitations and practices as well as symbolic affective and theoretical expansion and heightened expectation of what the archive is or should be The very language of the archive now carries freight as administrative practice normative value metaphor description and aspiration in different ways than it did in the 20th century This collection offers a unique contribution to these reinvigorated and sometimes new conversations about what an archive might be what it can do as a consequence and to whom it bears custodial responsibilities In particular this collection addresses what it means for contemporary Australian superior courts of record to not only have constitutional and procedural duties to documents as a matter of law but also to acknowledge obligations to care for those materials in a way that understands their public meaning and public value for the Australian people in the past in the present and for the future
