Making Of The Gulf War:

Iraq and the Gulf War F. Gregory Gause, 2001* *Making Political Geography* John Agnew, Luca Muscarà, 2012-02-16

Dating from its inception in the late nineteenth century political geography as a field has been heavily influenced by global events of the time. Thus rather than trying to impose a single fashionable theory leading geographers John Agnew and Luca Muscarà consider the underlying role of changing geopolitical context as their framework for understanding the evolution of the discipline. The authors trace the development of key thinkers and theories during three distinct periods: 1875, 1945, the Cold War and the post Cold War, emphasizing the ongoing struggle between theoretical monism and pluralism or one path to knowledge versus many. The world has undergone dramatic shifts since the book's first publication in 2002 and this thoroughly revised and updated second edition focuses especially on reinterpretations of the post Cold War period. Agnew and Muscarà explore the renewed questioning of international borders, the emergence of the Middle East and displacement of Europe as the center of global geopolitics, the rise of China and other new powers, the reappearance of environmental issues and the development of critical geopolitics. With its deeply knowledgeable and balanced history and overview of the field, this concise work will be a valuable and flexible text for all courses in political geography.

Making War, Thinking History Jeffrey Record, 2014-02-15. In examining the influence of historical analogies on decisions to use or not use force, military strategist Jeffrey Record assesses every major application of U.S. force from the Korean War to the NATO war on Serbia. Specifically, he looks at the influence of two analogies: the democracies' appeasement of Hitler at Munich and America's defeat in the Vietnam War. His book judges the utility of these two analogies on presidential decision making and finds considerable misuse of them in situations where force was optional. He points to the Johnson administration's application of the Munich analogy to the circumstances of Southeast Asia in 1965 as the most egregious example of their misuse but also cites the faulty reasoning by historical analogy that prevailed among critics of Reagan's policy in Central America and in Clinton's use of force in Haiti and the former Yugoslavia. The author's findings show generational experience to be a key influence on presidential decision making. Munich persuaded mid-twentieth century presidents that force should be used early and decisively while Vietnam cautioned later presidents against using force at all. Both analogies were at work for the Gulf War with Munich urging a decision for war and Vietnam warning against a graduated and highly restricted use of force. Record also reminds us of the times when presidents have used analogies to mobilize public support for action they have already decided to take. Addressing both the process of presidential decision making and the wisdom of decisions made, this well-reasoned book offers timely lessons to a broad audience that includes political scientists, military historians, defense analysts, and policy makers as

well as those simply curious about history's influence

The Art of Policymaking George E. Shambaugh IV, Paul J. Weinstein Jr., 2024-04-24 The Art of Policymaking is the only book designed to provide students and practitioners with a detailed explanation of the specific tools, techniques, and processes used to create policy in the U.S. as well as the tools they need to understand them. The book includes practical advice on how to write memos, prepare polling questions, and navigate the clearance process. Case studies show how actual policies were developed and how and why policies and processes differed across administrations. And scenarios allow students to practice the tools and techniques they have learned by working through both domestic and foreign policy situations. Written by two experts in the field with experience in both academia and government, The Art of Policymaking is the perfect how-to guide for students and professionals.

Making the Stage Ann C. Hall, 2020-11-30 MAKING THE STAGE is a collection of essays that examines the role of theatre, drama, and performance in contemporary culture, a culture that is growing increasingly technological and isolated, seemingly at odds with the very nature of theatre, a collaborative and sometimes very primitive art form. Through the course of these essays, it is clear that theatre not only survives some of the challenges of the day but even defines discussions, particularly political ones, which are prohibited by an increasingly manipulated media. The essays from a diverse group of theatre scholars examine the mechanics of theatre, from space to sound to the use of technology, the role of women in creating theatre, the relationship between theatre and literary art forms, the politics of theatre, science and theatre, and the role of performance art. Through them all, it is clear that theatre, drama, and performance continue to speak in significant ways.

Improving the Presumptive Disability Decision-Making Process for Veterans Institute of Medicine, Board on Military and Veterans Health, Committee on Evaluation of the Presumptive Disability Decision-Making Process for Veterans, 2008-05-15 The United States has long recognized and honored the service and sacrifices of its military and veterans. Veterans who have been injured by their service, whether their injury appears during service or afterwards, are owed appropriate health care and disability compensation. For some medical conditions that develop after military service, the scientific information needed to connect the health conditions to the circumstances of service may be incomplete. When information is incomplete, Congress or the Department of Veterans Affairs (VA) may need to make a presumption of service connection so that a group of veterans can be appropriately compensated. The missing information may be about the specific exposures of the veterans or there may be incomplete scientific evidence as to whether an exposure during service causes the health condition of concern. For example, when the exposures of military personnel in Vietnam to Agent Orange could not be clearly documented, a presumption was established that all those who set foot on Vietnam soil were exposed to Agent Orange. The Institute of Medicine (IOM) Committee was charged with reviewing and describing how presumptions have been made in the past and, if needed, to make recommendations for an improved scientific framework that could be used in the future for determining if a presumption should be made. The Committee was asked to consider and describe the processes of all participants in the current

presumptive disability decision making process for veterans The Committee was not asked to offer an opinion about past presumptive decisions or to suggest specific future presumptions The Committee heard from a range of groups that figure into this decision making process including past and present staffers from Congress the VA the IOM veterans service organizations and individual veterans The Department of Defense DoD briefed the Committee about its current activities and plans to better track the exposures and health conditions of military personnel The Committee further documented the current process by developing case studies around exposures and health conditions for which presumptions had been made Improving the Presumptive Disability Decision Making Process for Veterans explains recommendations made by the committee general methods by which scientists as well as government and other organizations evaluate scientific evidence in order to determine if a specific exposure causes a health condition

Dynamics of Arab Foreign Policy-Making in the Twenty-First Century Hassan Hamdan

Al-Alkim,2012-04-16 The Arab world's strategic location and its considerable material and human potential should allow it to play a major role in world affairs. However, in addition to sharing language, culture, and history, Arab states also face common challenges: authoritarian regimes, ethnic and social cleavages, economic underdevelopment, and the need for security from the West. Hassan Hamdan al-Alkim examines the dynamics of Arab foreign policy making in the twenty-first century, taking account of the current political developments in the Arab world since January 2011. Through an insightful analysis of pivotal issues such as the Middle East Peace Process, the food and water crisis, and Saudi Arabia's foreign policy, Alkim brings us closer to a nuanced understanding of contemporary Arab politics and its role in world affairs. This balanced and discerning study is essential reading for policy makers, academics, and students of Middle Eastern politics. **Journal of the House of Representatives of the United States** United States. Kennedy, Ronald Reagan: most would agree their presidencies were amongst the most successful in American history. But what made these very different men such effective leaders? According to presidential historian Gil Troy, these presidents succeeded not because of their bold political visions but because of their moderation. Although many presidential candidates claim to be

moderates the word cannot conceal a political climate defined by extreme rhetoric and virulent partisanship In this book Troy argues that this is a distinctly un American state of affairs The great presidents of American history have always sought a golden mean from George Washington who brilliantly mediated between the competing visions of Thomas Jefferson and Alexander Hamilton to Abraham Lincoln who rescued the union with his principled pragmatism to the two Roosevelts Theodore and Franklin who united millions of Americans with their powerful affirmative nationalist visions Moderation in politics is difficult to achieve in an age of excess an anything goes culture feeds an all or nothing politics In the face of challenges both at home and abroad Troy calls for a muscular moderation a powerful affirmation of the values that united us and a commitment to a politics that builds from the center rather than playing to extremes As America lines up to select its next president Gil Troy brilliantly reminds us of the finest traditions of presidential leadership from our nation s past Published in 2008 by Basic Books as *Leading from the Center* This is first time in paperback
