Making Of The Unborn Patient A Social Anatomy Of Fetal Surgery:

The Making of the Unborn Patient Monica J. Casper, 1998 It is now possible for physicians to recognize that a pregnant woman's fetus is facing life threatening problems perform surgery on the fetus and if it survives return it to the woman's uterus to finish gestation Although fetal surgery has existed in various forms for three decades it is only just beginning to capture the public's imagination These still largely experimental procedures raise all types of medical political and ethical questions The Making of the Unborn Patient examines two important and connected events of the second half of the 20th century the emergence of fetal surgery as a new medical specialty and the debut of the unborn patient **Fetal Therapy** Mark D. Kilby, Anthony Johnson, Dick Oepkes, 2020-01-02 Updated by a team of internationally renowned experts this book gives a thorough overview of fetal pathophysiology and an evidence base for in utero both medical non invasive and surgical treatments Many topics are expanded to cover recent advances including stem cell transplantation tissue scaffolding minimally invasive approaches to open fetal surgery the etiology prevention and treatment of preterm birth and PROM the genetic etiologies of fetal disease and gene therapy In addition there are in depth discussions as to the role of open fetal myelomeningocele repair and several fetoscopic approaches to therapy The international editors have added important new chapters on reducing stillbirth and prenatal counselling This book is an invaluable reference guide to the latest fetal therapy options and an essential in depth study book for maternal fetal and neonatology specialists Understanding baby loss Kate Reed, Julie Ellis, Elspeth Whitby, 2023-11-21 This book offers a detailed and sensitive account of how parents experience different forms of baby loss and subsequently make decisions about post mortem examination It also analyses some of the challenges professionals face when working in this highly sensitive field of medicine It draws on data from an ESRC award winning UK based study on the development of minimally invasive post mortem to examine a range of sociologically pertinent issues relating to trauma emotions decisions care technology memory and the role of social and biological relationships By shedding light on this taboo aspect of healthcare the book provides a highly original contribution to sociology offering a comprehensive analysis of some of the most pressing concerns in the field to date *Trans Medicine* Stef M. Shuster, 2021-06-15 Finalist PROSE Award in Clinical Medicine A rich examination of the history of trans medicine and current day practice Surfacing in the mid twentieth century yet shrouded in social stigma transgender medicine is now a rapidly growing medical field In *Trans Medicine* Stef Shuster makes an important intervention in how we understand the development of this field and how it is being used to treat gender identity today Drawing on interviews with medical providers as well as ethnographic and archival research Shuster examines how health professionals approach patients who seek gender affirming care From genital reconstructions to hormone injections the practice of trans medicine charts new medical ground compelling medical professionals to plan treatments without widescale clinical trials to back them up Relying on cultural norms and gut instincts to inform their treatment plans Shuster shows how medical providers lack of clinical

experience and scientific research undermines their ability to interact with patients craft treatment plans and make medical decisions This situation defies how providers are trained to work with patients and creates uncertainty As providers navigate the developing knowledge surrounding the medical care of trans folk Trans Medicine offers a rare opportunity to understand how providers make decisions while facing challenges to their expertise and in the process have acquired authority not only over clinical outcomes but over gender itself Reproduction, Health, and Medicine Elizabeth Mitchell Armstrong, Susan Markens, Miranda R. Waggoner, 2019-11-22 At a moment when reproduction is increasingly politicized the volume explores the breadth of contemporary research on reproduction from the perspective of medical sociology illuminating the lived experience of reproduction and offering insights to inform sociology and health policy Bioethics in Canada, Third Edition Carol Collier, Rachel Haliburton, 2021-03-25 Now in its third edition Bioethics in Canada A Philosophical Introduction offers a comprehensive overview of the philosophical historical and medical concepts shaping contemporary debates on biomedical issues The text opens with an introduction to moral theory and bioethical principles followed by application of these theories and principles to real world ethical conflicts involving abortion distributive justice genetics reproductive technology and other vital topics A landmark case opens each chapter illuminating the many issues involved in these debates as well as the philosophical assumptions that shape them Thoroughly updated to reflect recent political medical and cultural changes this third edition features new sections on Medical Assistance in Dying MAiD the moral philosophy of liberalism in bioethics the Mad movement CRISPR and gene editing and expanded content on mental health rural and remote communities and codes of conduct and codes of ethics Accessibly written with newly added case studies in the health care workplace this text is an insightful resource for courses in the disciplines of philosophy health studies medicine and nursing providing a strong ethical foundation in an ever changing field **Ethical Issues for a New Millennium** John Howie, 2002 Modern advances in science and medicine bring with them an array of complex ethical dilemmas In Ethical Issues for a New Millennium editor John Howie addresses contemporary ethical problems with eight essays from top thinkers in the field This collection offers new and comprehensive overviews of some very tough ethical issues that will remain foremost in our minds in the years ahead Each essay is written by a recognized authority within his or her specific field and brings to light ethical questions rooted in ongoing philosophical debates in arenas such as human rights the welfare state women s rights genetic and gender equality genetic equity cloning organ transplants environmental ethics insurrectionist ethics and the erosion of moral sensibility These lectures were originally presented at Southern Illinois University as part of the Wayne Leys Memorial Lectures series This collection represents the fourth volume in the series **The Visualised Foetus** Julie Roberts, 2016-02-17 The latest three and four dimensional images produced by modern ultrasound technology offer strikingly realistic representations of the fetus representations that have further transformed experiences of pregnancy the public understanding of foetal existence and the rhetoric of the abortion debate Presenting a timely feminist engagement with this

new technology *The Visualised Foetus* explores the widespread familiarity with and popularity of this new technology within the context of a longer history of foetal visualisations The book offers an array of case studies that examine the diffusion of 3 4D ultrasound images beyond the clinic and the implications of this new technology for biopolitics in the European and American context With attention to the non diagnostic and commercial use of 3 4D images the impact of 3 4D ultrasound within the abortion debate and new claims that ultrasound aids maternal foetal bonding *The Visualised Foetus* demonstrates the tension between the social and medical significances of foetal ultrasound the pleasures and dangers of foetal imagery for women the contested status of ultrasonography as scientific imagery and struggles over the authority to define and interpret ultrasound imagery As such it will appeal to scholars of the sociology of medicine and the body social theory and gender and cultural studies as well as those with interest in science and technology studies *Parenting Culture Studies* Ellie

Lee, Jennie Bristow, Charlotte Faircloth, Jan Macvarish, 2023-12-26 Now in its second edition *Parenting Culture Studies* seeks to understand how parenting is taken as a particular mode of childrearing that reflects broader social trends Ten years after the initial volume's groundbreaking publication the authors once again closely examine how the main aspects of parenting have been established explored and critically evaluated Chapters revisit phenomena such as intensive parenting and politics around parenting as well as controversial issues including policing pregnant women's bodies and parental determinism In addition to updates throughout the volume including those addressing literature that has built from the book's original publication the book features a new third part discussing parents dealing with risk assessment school closures contradictory care arrangements and vaccine hesitancy during the COVID 19 pandemic **Differences in Medicine** Marc

Berg, Annemarie Mol, 1998 Western medicine is widely thought of as a coherent and unified field in which beliefs definitions and judgments are shared This book debunks this myth with an interdisciplinary and intercultural collection of essays that reveals the significantly varied ways practitioners of conventional Western medicine handle bodies study test results configure statistics and converse with patients *Synthetic Planet* Monica J. Casper, 2013-11-12 This timely collection of

original essays traces the migration of synthetic chemicals from the laboratory to the factory and then into the environment bodies and communities Turning our attention to the impact these chemicals have on our ecosystems human health social organization and political processes the contributors break new ground by focusing on the production and distribution of these potentially hazardous agents themselves rather than just detailing their effects *Recreating Motherhood* Barbara

Katz Rothman, 2000 Selling genetically gifted human eggs on the free market for a hefty price In vitro fertilization Fetal rights Prenatal diagnosis Surrogacy All are instances of biomedical and social advancements with which we have become familiar in recent years Yet these issues are often regarded as distinct or only loosely related under the rubric of reproduction Barbara Katz Rothman demonstrates how they form a complex whole that demands of us in response a woman centered class sensitive way of understanding motherhood We need a social policy for dealing with mothers and motherhood

that is consistent with feminist politics and feminist theory Her book show how we as a society must first recognize that the real needs of mother father and children have been swept aside in an attempt to reduce the complex process of human reproduction to a clinical event that can be controlled by medical technology Rothman suggests ways to accomplish social and legal change that would allow technological advances to affirm motherhood and the mother child relationship without cost to women s identity This new edition of *Recreating Motherhood* contains exciting updates Rothman shows how this material is key in understanding the family not just motherhood And a new chapter *Reflections on a Decade* explores how new reproductive technologies combine with new marketing and new genetics to pose troubling social questions

The Routledge Handbook of Anthropology and Reproduction Sallie Han,Cecília Tomori,2021-11-09 The Routledge Handbook of Anthropology and Reproduction is a comprehensive overview of the topics approaches and trajectories in the anthropological study of human reproduction The book brings together work from across the discipline of anthropology with contributions by established and emerging scholars in archaeological biological linguistic and sociocultural anthropology Across these areas of research consideration is given to the contexts conditions and contingencies that mark and shape the experiences of reproduction as always gendered classed and racialized Over 39 chapters a diverse range of international scholars cover topics including Reproductive governance stratification justice and freedom Fertility and infertility Technologies and imaginations Queering reproduction Pregnancy childbirth and reproductive loss Postpartum and infant care Care kinship and alloparenting This is a valuable reference for scholars and upper level students in anthropology and related disciplines associated with reproduction including sociology gender studies science and technology studies human development and family studies global health public health medicine medical humanities and midwifery and nursing

Pregnancy, Risk and Biopolitics Lorna Weir,2006-09-27 Calling attention to the significance of population politics for the unsettling of the birth threshold Weir argues that risk techniques are heterogeneous contested with expertise and plural in their political effects

Feminist Rhetorical Science Studies Julie Jung,Amanda Booher,2018-01-30 This edited collection disrupts tendencies in feminist science studies to dismiss rhetoric as having concern only for language and it counters posthumanist theories that ignore human materialities and asymmetries of power as co constituted with and through distinctions such as gender sex race and ability The eight essays of *Feminist Rhetorical Science Studies* Human Bodies Posthumanist Worlds model methodologies for doing feminist research in the rhetoric of science Collectively they build innovative interdisciplinary bridges across the related but divergent fields of feminism posthumanism new materialism and the rhetoric of science Each essay addresses a question How can feminist rhetoricians of science engage responsibly with emerging theories of the posthuman Some contributors respond with case studies in medical practice fetal ultrasound patient noncompliance medical science the neuroscience of sex differences and health policy drug trials of the U S Food and Drug Administration others respond with a critical review of object oriented ontology and a framework for researching women technical writers in the

workplace The contributed essays are in turn framed by a comprehensive introduction and a final chapter from the editors who argue that a key contribution of feminist posthumanist rhetoric is that it rethinks the agencies of people things and practices in ways that can bring about more ethical human relations Individually the contributions offer as much variety as consensus on matters of methodology Together they demonstrate how feminist posthumanist and materialist approaches to science expand our notions of what rhetoric is and does yet they manage to do so without sacrificing what makes their inquiries distinctively rhetorical

No Real Choice Katrina Kimport, 2021-10-15 In the United States the right to choose an abortion is the law of the land But what if a woman continues her pregnancy because she didn't really have a choice What if state laws federal policies stigma and a host of other obstacles push that choice out of her reach Based on candid in depth interviews with women who considered but did not obtain an abortion *No Real Choice* punctures the myth that American women have full autonomy over their reproductive choices Focusing on the experiences of a predominantly Black and low income group of women sociologist Katrina Kimport finds that structural cultural and experiential factors can make choosing abortion impossible especially for those who experience racism and class discrimination From these conversations we see the obstacles to choice these women face such as bans on public insurance coverage of abortion and rampant antiabortion claims that abortion is harmful Kimport's interviews reveal that even as activists fight to preserve *Roe v Wade* class and racial disparities have already curtailed many women's freedom of choice *No Real Choice* analyzes both the structural obstacles to abortion and the cultural ideologies that try to persuade women not to choose abortion Told with care and sensitivity *No Real Choice* gives voice to women whose experiences are often overlooked in debates on abortion illustrating how real reproductive choice is denied for whom and at what cost

Critical Perspectives on Addiction Julie Netherland, 2012-10-26 Featuring the work of several up and coming scholars working to deepen theoretical perspectives on addiction and its relationship to social control and deviance this volume fills a gap in addiction studies by offering critical perspectives that interrogate and challenge traditional and or mainstream understandings of addiction

Babylost Monica J. Casper, 2022-03-18 The U S infant mortality rate is among the highest in the industrialized world and Black babies are far more likely than white babies to die in their first year of life Maternal mortality rates are also very high Though the infant mortality rate overall has improved over the past century with public health interventions racial disparities have not Racism poverty lack of access to health care and other causes of death have been identified but not yet adequately addressed The tragedy is twofold it is undoubtedly tragic that babies die in their first year of life and it is both tragic and unacceptable that most of these deaths are preventable Despite the urgency of the problem there has been little public discussion of infant loss The question this book takes up is not why babies die we already have many answers to this question It is rather who cares that babies mostly but not only Black and Native American babies are dying before their first birthdays More importantly what are we willing to do about it This book tracks social and cultural dimensions of infant death through 58 alphabetical

entries from *Absence to ZIP Code* It centers women's loss and grief while also drawing attention to dimensions of infant death not often examined It is simultaneously a sociological study of infant death an archive of loss and grief and a clarion call for social change

A Death Retold Keith Wailoo, Julie Livingston, Peter Guarnaccia, 2009-09-15 In February 2003 an undocumented immigrant teen from Mexico lay dying in a prominent American hospital due to a stunning medical oversight she had received a heart lung transplantation of the wrong blood type In the following weeks Jessica Santillan's tragedy became a portal into the complexities of American medicine prompting contentious debate about new patterns and old problems in immigration the hidden epidemic of medical error the lines separating transplant haves from have nots the right to sue and the challenges posed by foreigners crossing borders for medical care This volume draws together experts in history sociology medical ethics communication and immigration studies transplant surgery anthropology and health law to understand the dramatic events the major players and the core issues at stake Contributors view the Santillan story as a morality tale about the conflicting values underpinning American health care about the politics of transplant medicine about how a nation debates deservedness justice and second chances and about the global dilemmas of medical tourism and citizenship Contributors Charles Bosk University of Pennsylvania Leo R Chavez University of California Irvine Richard Cook University of Chicago Thomas Diflo New York University Medical Center Jason Eberl Indiana University Purdue University Indianapolis Jed Adam Gross Yale University Jacklyn Habib American Association of Retired Persons Tyler R Harrison Purdue University Beatrix Hoffman Northern Illinois University Nancy M P King University of North Carolina at Chapel Hill Barron Lerner Columbia University Mailman School of Public Health Susan E Lederer Yale University Julie Livingston Rutgers University Eric M Meslin Indiana University School of Medicine and Indiana University Purdue University Indianapolis Susan E Morgan Purdue University Nancy Scheper Hughes University of California Berkeley Rosamond Rhodes Mount Sinai School of Medicine and The Graduate Center City University of New York Carolyn Rouse Princeton University Karen Salmon New England School of Law Lesley Sharp Barnard and Columbia University Mailman School of Public Health Lisa Volk Chewning Rutgers University Keith Wailoo Rutgers University

Birth Rites and Rights Fatemeh Ebtehaj, Jonathan Herring, Martin Johnson M.A., PhD., F.R.C.O.G., Martin Richards, 2011-07-29 This multi disciplinary collection of essays from the Cambridge Socio Legal Group is concerned with the varying circumstances manner timing and experiences of birth It contains essays from a wide range of disciplines including law medicine anthropology history and sociology examining birth from the perspectives of mother doctor midwife and father Questions considered in the book include who has power during the birthing process How has the experience of birth changed over time Should birth mark a significant change in the legal status of the foetus What is the proper role of birth registration What role if any do fathers have in the birthing process What legal rights should the woman have to refuse treatment during the birthing process What is the significance of changes of the age at which women give birth This stimulating collection of papers provides new insights into one of life's most momentous
