## **Making Our Research Useful Case Studies In The Utilization Of Anthropological Knowledge:**

**Making Our Research Useful** John van Willigen, 2019-04-11 This book presents case studies that address how to improve the use of applied or policy research done by anthropologists. It documents the applications of anthropology and in so doing improves practice. The case studies treat the problem of knowledge use from a variety of perspectives. *Applied Anthropology* Satish Kedia, John van Willigen, 2005-10-30 *Applied Anthropology* Domains of Application edited by Satish Kedia and John van Willigen comprises essays by prominent scholars on the potential accomplishments and methods of applied anthropology. Domains covered in the volume include development, agriculture, environment, health, and medicine, nutrition, population, displacement, and resettlement, business and industry, education, and aging. The contributors demonstrate in compelling ways how anthropological knowledge, skills, and methodologies can be put to work in addressing social, economic, health, and technical problems facing societies today. With their genuine commitment to protecting the diversity and vitality of human communities, applied anthropologists working in real life settings have and will continue to have a lasting impact on people around the world. The editors enrich the volume by providing introductory and concluding chapters that offer a detailed historical context for applied anthropology and an exploration of its future directions. **A Handbook of Practicing Anthropology** Riall W. Nolan, 2013-01-16 An essential career planning resource. *A Handbook of Practicing Anthropology* presents a comprehensive account of contemporary anthropological practice, written primarily by anthropological practitioners. Engagingly written and instructive accounts of practice by anthropological professionals working in corporations, governmental, entrepreneurial, and educational settings. Provides essential guidance on applying anthropological principles on the job: what works well and what must be learned. Emphasizes the value of collaboration, teamwork, and continuous learning as key elements to success in non-academic careers. Highlights the range of successful career options for practitioners, describes significant sectors of professional activity, and discusses key issues, concerns, and controversies in the field. Chapters examine key practice sectors such as freelancing, managing a consulting firm, working for government, non-profits, and corporations, and the domains of health, industry, education, international development, and the military. Traditional and Modern Natural Resource Management in Latin America Francisco J. Pichon, John Frechione, Jorge E. Uquillas, 1999-10-15 *Traditional and Modern Natural Resource Management in Latin America* identifies a major problem facing developing nations and the countries and sources that fund them: the lack of attention and/or effective strategies available to prevent farmers in underdeveloped and poorly endowed regions from sinking still deeper into poverty while avoiding further degradation of marginal environments. The contributors propose an alliance of scientific knowledge with native skill as the best way to proceed, arguing that folk systems can often provide effective management solutions that are not only locally effective but which may have the potential for spatial diffusion. While this has been said before, the volume makes one of the best articulated statements of how to implement such an approach. In this book, which stems from a

workshop held in 1995 at the World Bank the editors make an eloquent case for the relevance of risk prone areas as a subject of study and the special role that indigenous knowledge plays in such poorly endowed regions The volume is balanced it does not advocate one approach over another and it is multidisciplinary including work by anthropologists sociologists geographers and natural scientists The nine chapters create a natural progression from conceptual issues to theory applications and synthesis and contain a wealth of data analyses recommendations and carefully considered opinions by experts who have been intimately involved over the long term in theoretical and practical work related to systems of natural resource management in Latin America The volume addresses the topic of sustainability in a logical manner considering practical concerns and lessons as well as theoretical perspectives A number of conceptual and case studies highlight approaches that might succeed if World Bank and other multilateral and national funding sources are forthcoming Traditional and Modern Natural Resource Management in Latin America addresses a topic that has gained worldwide interest especially in relation to indigenous knowledge systems

**Speaking the language of power** David

Fetterman,2014-04-08 First Published in 1993 Speaking the Language of Power is about how a group of socially concerned scholars are making their ethnographic insights and findings useful to decision makers They address a host of significant issues including conflict resolution the dropout problem environmental health and safety homelessness educational reform the situation of American Indians AIDS and the education of gifted children Myriad strategies are being used by practicing anthropologists to ensure that they have an impact on sponsors and policy decision makers The book focuses on the use of language and rhetorical style to enhance communication and effectiveness Within that framework the approaches presented in this collection range from translating qualitative information into quantitative forms to testifying about specific legislation on Capitol Hill The chapters artfully blend the three themes of this book communication collaboration and advocacy Building on the enormous contributions made by qualitative researchers throughout the world the aim of this discourse is to explore successful strategies share lessons learned and enhance the ability to communicate with an educated citizenry and powerful policymaking bodies The spirit driving the dedication displayed in each chapter is simple to improve the world we live in to make it a better place for our children and our children s children

**Sustainable Development in Third World Countries** Valentine U. James,1996-02-13 Sustainable development has been approached from many viewpoints over the past 15 years without a

concise or precise definition of what sustainable development really stands for James has solicited contributions from an international group of experts who write about aspects of sustainable development from many different disciplines Their consensus is that sustainability depends upon concerted development across the spectrum of socioeconomic factors that affect the environment natural resources health education and welfare of the populations in the emerging nations The necessity of incorporating indigenous knowledge with technological and international expertise has become crucial **New History of Anthropology** Henrika Kuklick,2009-02-09 A New History of Anthropology collects original writings from pre eminent scholars to create a sophisticated but accessible guide to the development of the field Re examines the history of anthropology through the lens of the new globalized world Provides a comprehensive history of the discipline from its prehistory in the age of exploration through to anthropology s current condition and its relationship with other disciplines Places ideas and practices within the context of their time and place of origin Looks at anthropology s role in colonization early traditions in the field and topical issues from various periods in the field s history and examines its relationship to other disciplines On Effectiveness Giorgio Ausenda,2003 The purpose of this volume is to examine and explicate both the concept and the quantification of the parameter effectiveness considered indispensable for the evaluation of the increasing typology of operations whose success cannot be measured by profit Eight papers and the discussions thereof are included

**BOOK JACKET Community-based AIDS Prevention** National AIDS Demonstration Research Project (U.S.). National Meeting,1991 **The Anthropology of Organisations** Alberto Corsin Jimenez,2017-05-15 The Anthropology of Organisations offers a critical overview of the work that for over sixty years anthropologists have been carrying out in and on organisations and of the contribution that this work has made to social theory at large Moving beyond earlier preoccupations with culture and relationality the volume brings together a selection of classic and contemporary articles that cast new light on the relevance of ethnography for organisational and social theory It offers an indispensable resource for students and scholars interested in the politics behind the institutionalisation of social life **Beyond the Large Farm** Paul B. Thompson,2019-03-07 This book examines the rationale for emphasizing productivity as the dominant goal of agricultural research and challenges in the form of alternative goals that scientists might seek in performing agricultural research It presents bibliographic essays that review the criticisms of research **Aids And STDs In Africa** Edward C Green,2019-09-19 This book emphasizes the factors in the spread and control of AIDS that have received less attention in the literature It suggests that a collaborative action program involving traditional healers is necessary if we wish to impact the spread of AIDS and other STDs in Africa **Culture and Change** Larry Naylor,1996-01-30 Growing dependency increased contact and interactions and the development of a participatory world culture have brought the topic of culture change to our attention as never before Naylor examines the various issues and aspects of change particularly directed or intended change as it occurs within multicultural settings He combines the best information available on the topic of change and provides a

comprehensive model for change processes in an effort to supply the reader with the essentials required for understanding culture change and working within its contexts It is appropriate for courses in anthropology sociology education development studies and health and will serve equally well for either undergraduate or graduate levels **Archaeologists as Activists**

M. Jay Stottman,2010 Examines the various ways in which archaeologists can and do use their research to forge a partnership with the past and guide the ongoing dialogue between the archaeological record and various contemporary stakeholders Could archaeologists benefit contemporary cultures and be a factor in solving world problems Can archaeologists help individuals Can archaeologists change the world These questions form the root of archaeology activism or activist archaeology using archaeology to advocate for and affect change in contemporary communities Archaeologists currently change the world through the products of their archaeological research that contribute to our collective historical and cultural knowledge Their work helps to shape and reshape our perceptions of the past and our understanding of written history Archaeologists affect contemporary communities through the consequences of their work as they become embroiled in controversies over negotiating the past and the present with native peoples Beyond the obvious economic contributions to local communities caused by heritage tourism established on the research of archaeologists at cultural sites archaeologists have begun to use the process of their work as a means to benefit the public and even advocate for communities In this volume Stottman and his colleagues examine the various ways in which archaeologists can and do use their research to forge a partnership with the past and guide the ongoing dialogue between the archaeological record and the various contemporary stakeholders They draw inspiration and guidance from applied anthropology social history public history heritage studies museum studies historic preservation philosophy and education to develop an activist approach to archaeology theoretically methodologically and ethically *Indigenous Ethnographies of North East India* Somenath Bhattacharjee,Anup Kumar

Dey,2021-01-01 Northeast India is very rich in its multiethnic and multicultural diversity Their indigenous culture is nourished in the lap of nature However with the changing dimension of time and influence of globalization a number of social and cultural changes can be noticed among them On the other hand as their cultural practices social norms values and customs are oral in tradition these are remaining undocumented In this context to understand about the traditional culture contemporary period demands an in depth analytical research from the emic perspective to write the ethnography of indigenous communities It is an academic effort to build the co relation between central and marginal traditions to frame the holistic national integrity in multiethnic and multicultural India Through this book *Indigenous Ethnographies of North East India A Study From Emic Perspective* it has been tried to find out the similarities in between different cultural traditions as well as to find out the relevance of such traditions in the greater dimension of Indian civilization as a whole Critical Power Tools J. Blake Scott ,Bernadette Longo ,Katherine V. Wills,2007-06-01 Winner of the 2007 National Council of Teachers of English NCTE Award for Best Collection of Essays on Technical and Scientific Communication The first book to

focus on the intersection of cultural studies and technical communication Critical Power Tools draws on various traditions of cultural studies to develop new or expanded theoretical methodological and pedagogical approaches to technical communication Offered as a sourcebook for the field the book is organized into three parts The first section emphasizing theory building reconceptualizes key concepts or practices such as usability through a cultural studies lens The second section illustrates alternative research methods through several case studies The third section offers critical and productive pedagogical approaches including specific assignments applicable to both undergraduate and graduate courses
