The Invention of Modern Science Isabelle Stengers, 2000 **The Invention of Modern Science** proposes a fruitful way of

going beyond the apparently irreconcilable positions that science is either objective or socially constructed. Instead, suggests Isabelle Stengers, one of the most important and influential philosophers of science in Europe, we might understand the tension between scientific objectivity and belief as a necessary part of science central to the practices invented and reinvented by scientists.

Handbook of the History and Philosophy of Mathematical Practice Bharath Sriraman, 2024-04-26

The purpose of this unique handbook is to examine the transformation of the philosophy of mathematics from its origins in the history of mathematical practice to the present. It aims to synthesize what is known and what has unfolded so far, as well as to explore directions in which the study of the philosophy of mathematics, as evident in increasingly diverse mathematical practices, is headed. Each section offers insights into the origins, debates, methodologies, and newer perspectives that characterize the discipline today. Contributions are written by scholars from mathematics, history, and philosophy, as well as other disciplines that have contributed to the richness of perspectives abundant in the study of philosophy today. They describe various mathematical practices throughout different time periods and contrast them with the development of philosophy.

1941-2024

This book, with its exciting depth and breadth, illuminates us about the history, practice, and the very language of our subject. About the role of abstraction, of proof, and manners of proof. About the interplay of fundamental intuitions. About algebraic thought in contrast to geometric thought. The richness of mathematics and the philosophy encompassing it is splendidly exhibited over the wide range of time these volumes cover, from deep Platonic and Neoplatonic influences to the most current experimental approaches. Enriched as well with vivid biographies and brilliant personal essays written by and about people who play an important role in our tradition, this extraordinary collection of essays is fittingly dedicated to the memory of Chandler Davis, Reuben Hersh, and Yuri Manin.

Barry Mazur, Gerhard Gade, University Professor, Harvard University. This encyclopedic Handbook will be a treat for all those interested in the history and philosophy of mathematics. Whether one is interested in individuals from Pythagoras through Newton and Leibniz to Grothendieck, fields, geometry, algebra, number theory, logic, probability, analysis, viewpoints from Platonism to Intuitionism, or methods, proof, experiment, computer assistance, the reader will find a multitude of chapters that inform and fascinate.

John Stillwell, Emeritus Professor of Mathematics, University of San Francisco. Recipient of the 2005 Chauvenet Prize. Dedicating a volume to the memory of three mathematicians: Chandler Davis, Reuben Hersh, and Yuri Manin.

who went out of their way to show to a broader audience that mathematics is more than what they might think is an excellent initiative Gathering authors coming from many different backgrounds but who are very strict about the essays they write was successfully achieved by the editor in chief The result a great source of potential inspiration Jean Pierre Bourguignon Nicolaas Kuiper Honorary Professor at the Institut des Hautes études Scientifiques An Agenda for Action John G. Bruhn, Howard M. Rebach, 2013-04-17 A companion to the authors Handbook of Clinical Sociology Plenum Press 1991 this pioneering text provides an introduction to this new field covering its development methods and tools and illustrates the applications of sociological concepts to current social problems Drs Bruhn and Rebach present numerous examples to enable practitioners to apply their problem solving skills Key discussions address the values held by clients and practitioners and issues relating to sociological assessment and evaluation This indispensable resource is enhanced by case illustrations annotated bibliographies and a glossary of terms **Bourdieu and Education** Diane Reay, 2020-04-28 Specially selected by Diane Reay this is a collection of innovative and thought provoking recently published papers that use Bourdieu to put theory into practice in order to understand and analyse educational problems Bourdieu's work is renowned for its focus on inequalities and its centering of social justice The contributions utilise a wide range of diverse concepts in Bourdieu's theoretical tool kit and address educational inequalities across different aspects of the educational system from higher education and parental choice of schooling to teachers professional development and the PE classroom Illuminating key aspects of Bourdieu's scholarship they reveal how good Bourdieu is for thinking with illustrate the merits of reflexivity the move beyond binary ways of reading the social world and demonstrate the significance of power in any analysis of education The chapters in this book were all originally published as articles in Taylor and Francis journals Microsociology Kai-Olaf Maiwald, Inken Suerig, 2019-09-05 This book offers an unprecedented integrative account of the shape of social order on the microsocial level Dealing with the basic dimensions of interaction the authors examine the major factors which influence structure in social interaction by applying various theoretical concepts Although the concept of microsociology is usually associated with symbolic interactionism social psychology the works of George Herbert Mead and Erving Goffman and with qualitative methodologies this book reaches beyond interactionist theories claiming that no single school of thought covers the different dimensions necessary for understanding the basics of microsociology As such the book provides something of a microsociologist's tool kit analyzing an array of theoretical approaches which offer the best conceptual solutions and interpreting them in a way that is independent of their specific theoretical language Such theoretical traditions include systems theory conversation analysis structuralism the theory of knowledge and the philosophy of language Providing a distinct systematic and incremental approach to the subject this book fills an important gap in sociological literature Written in an accessible style and offering new insights into the area of microsociology it will appeal to students and scholars of the social sciences and to those with interests in sociology microsociology interactionism and sociological theory *Making*

Sense Of: Health, Illness and Disease ,2021-10-25 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences Researchers and health care practitioners now live in the age of interdisciplinarity which has transformed both health care delivery and research on health The essays in this collection transcend the traditional boundaries of biomedicine and draw attention to the many ways in which health is embedded in socio cultural norms and how these norms in turn shape health practices and health care This volume is of interest not only to researchers but also to those delivering health care

Discourse : Event : Practice Franka Schäfer,2025-10-14 With Discourse Event Practice the author presents a dynamic theoretical program for a discourse theoretically informed sociology of practice oriented toward the concept of the event She outlines the sociological relationship between the concepts of discourse event and practice diagnoses their distorted relationship and explains the dynamization of dichotomous conceptions as the guiding principle of her argumentation

Through a reconstruction of the discourse theoretical foundations the practical theoretical conditions the situation of the method discussion and the starting point of sociological protest research she forms the basis of the research program and marks the question of the association of discourses and practices as a gap which is elucidated using the example of protest research The core of the book is a nuanced examination of the concept of event developed from the influence of Foucault as a primary basis for transformation and translated into a concept of event that ensures a relationship between discourse and practice that overcomes dichotomies within a post structuralist materialism In addition the potential of the program lies in the expansion of practice studies to include an explicit perspective on power and domination illustrated through an analysis of the practices of resistance as exemplified by the Yippie Festival of Life
