Marine Regionalism In The Southeast Asian Seas:

Marine Regionalism in the Southeast Asian Seas Lewis M. Alexander, 1982 *Marine Policy and Management in Southeast Asian Seas* Mark J. Valencia, Diana C. Shepherd, 1982 *Southeast Asian Seas* Mark J. Valencia, East-West Environment and Policy Institute (Honolulu, Hawaii), 1981* *Marine Affairs Bibliography* Christian L. Wiktor, L.A. Foster, 2024-12-02 *The Maritime Boundaries of the Indian Ocean Region* Vivian Louis Forbes, 1995 Adopting an integrated multidisciplinary approach to the political geography of the Indian Ocean this study analyses the Law of the Sea evaluates the national legislation of those Indian Ocean littoral states which have proclaimed their maritime limits over offshore waters examines the numerous bilateral and trilateral agreements on continental shelf and seabed limits of the states in the region It also previews the potential demarcations in the region of study Apart from its well written text perhaps the most important aspect of the work is the exceptional series of beautifully drawn maps and diagrams accompanied by detailed captions or commentaries a unique collection worthy of publication on its own **Southeast Asia Transformed** Chia Lin Sien, 2003 Southeast Asia with a total population of 520 million remains a region characterized by fragmentation diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations ASEAN formed some thirty five years ago In the new millennium it has lost the distinction of being one of the worlds faster growing group of economies since the 1997 financial crisis While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes

China's Maritime Boundaries in the South China Sea Jinming Li, 2020-11-29 Maritime boundary disputes in the South China have existed for centuries and researchers from a variety of countries have analysed the situation from a great many points of view Yet and despite its status as one of the major countries in the region Chinese perspectives have often been absent from the international literature This book redresses that balance Bringing together scholarship from history and international law this book provides a lens through which maritime territorial disputes in the South China Sea can be interrogated Not only does it detail the historical and jurisprudential evidence that support maritime boundaries in the South China Sea for different stakeholders but it also clarifies some misconceptions related to China's nine dash lines by referring to the United Nations Convention on the Law of the Sea Moreover the book offers in depth discussion and observation on the most recent developments in the South China Sea This book is an essential resource for researchers teachers and students who specialize in Southeast Asian Studies China maritime studies and the international law of the sea *Law of the Sea in South East Asia* Donald R Rothwell, David Letts, 2019-07-19 The United Nations Convention on the Law of the Sea LOSC represents one of the most successful examples of multilateral treaty making in the modern era The convention has 168 States parties and most non signatory States recognise nearly all of its key provisions as binding under customary international law including the United States Nevertheless there remain significant differences in interpretation and

implementation of the LOSC among States as well as calls on occasion for its amendment This book analyses the impact influence and ongoing role of the LOSC in South East Asia one of the most dynamic maritime regions in the world Maritime security is a critical issue within the region and it is separately assessed in light of the LOSC and contemporary challenges such as environmental security and climate change Likewise navigational rights and freedoms are a major issue and they are evaluated through the LOSC and regional state practice especially in the South China Sea Special attention is given to the role of navies and non state actors Furthermore the book looks at regional resource disputes which have a long history These disputes have the potential to increase into the future as economic interests and concerns over food security intensify Effective LNG and fisheries resource management is therefore a critical issue for the region and unless resolved could become the focal point for significant maritime disputes These dynamics within the region all require extensive exploration in order to gauge the effectiveness of LOSC dispute resolution mechanisms The Law of the Sea in South East Asia fills a gap in the existing literature by bringing together a holistic picture of contemporary maritime issues affecting the region in a single volume It will appeal to academic libraries government officials think tanks and scholars from law strategic studies and international relations disciplines **Marine Protected Areas Network in the South China Sea** Vu Hai Dang,2014-01-09

The once pristine and rich marine environment of the South China Sea is degrading at an alarming rate due to the rapid socioeconomic development of the region Despite this and due mainly to complicated sovereignty and maritime disputes coastal States have not been able to develop effective regional cooperation to safeguard the shared marine environment Marine Protected Areas Network in the South China Sea discusses legal and political measures to support the development of a network of marine protected areas in the South China Sea Such a network if properly developed would not only help to protect the marine environment and resources of the region but also contribute to decreasing the tension among its coastal States These measures are suggested in accordance with international law based on the specific geopolitical context of the South China Sea region and take into consideration experiences in developing regional networks of marine protected areas from other marine regions **The Politics of Global Ocean Regions** Christian Bueger,Elizabeth Mendenhall,Rebecca Strating,2025-07-08

The oceans are not just vast expanses of blue but dynamic political spaces shaped by complex regional dynamics In this fascinating study the authors advance a novel analytical framework for the study of the politics of global ocean regions They shed new light on the complex interactions in ocean spaces such as the Arctic Indo Pacific or Indian Ocean Written by leading experts in different ocean regions the book demonstrates how important yet diverse and complex regional maritime politics are Its emphasis on the emergence organization and effects of global ocean regions provides a useful framework for guiding future research The book will be essential reading for students and analysts interested in regionalism the oceans and the governance of global commons *The Emergence of a Regional Ocean Regime in the South Pacific* Biliana Cicin-Sain,Robert W. Knecht,1989 *Maritime Regime Building* Mark J. Valencia,2021-10-18 The past few

decades have witnessed the emergence of a vast array of regional arrangements and institutions dealing with all aspects of ocean management. The level of cooperation ranges from minimal dispute avoidance to relatively comprehensive ocean governance at the regional level. As concrete examples reasonably successful and comprehensive regional regimes have been created for the Baltic, the North and the Mediterranean Seas and the South Pacific. And attempts at regional regime building are ongoing in Southeast Asia, the South China Sea and the Indian Ocean. Although there are broad similarities between the semi-enclosed seas of Western Europe and Northeast Asia, no regional maritime regime has yet been initiated in Northeast Asia. The papers in this volume are authored by leading authorities on not only the maritime affairs of their particular region of focus but on maritime policy in general. They describe and explain existing or incipient regional maritime regimes in an unusually broad comparative context and extract lessons learned that may be applicable elsewhere, including Northeast Asia. The case studies are neatly sandwiched between an introduction to concepts and principles on regional co-operation and concluding chapters on lessons learned and their applicability to Northeast Asia. Moreover, the papers raise and address several questions of relevance to policy. For example, what factors are conducive to maritime regime initiation, expansion and positive evolution, and which constrain regime formation and evolution? Why has maritime regime building been successful in Europe and largely unsuccessful in Asia? And which, if any, lessons learned in the European context are applicable in Asia? Given the growing interest in regime formation and effectiveness in general and maritime regimes in particular, this book will be of considerable interest to both analysts and policymakers.

Marine Policy in Southeast Asia George Kent, Mark J. Valencia, 1985

Ocean Boundary Making Douglas M. Johnston, Phillip Saunders, 2024-05-01. Originally published in 1988, this book was written at a time when many nations were engaged in various forms of ocean boundary making. This created new regional pressures and the need for collective regional responses to these issues. This book examines the issues at stake and the boundary making processes. It discusses these in a general way, showing how the Third UN conference on the Law of the Sea helped resolve the problems whilst leaving some issues unresolved. The book goes on to examine the issues and boundary making processes in 7 important areas of the world.

An Assessment of Assessments, 2009. Despite the central role oceans play in the economic, environmental and social affairs of the planet's 6.7 billion inhabitants, significant gaps exist in our understanding and management of the complex processes at work, from the global climate system to the water cycle and circulation of nutrients to changes affecting marine habitats. In addition, the vastness of the world's oceans have for far too long been perceived as impervious and indestructible to human impact. To deal with this situation, improved monitoring and observation practices, regular assessments to provide a deeper understanding of the status and trends of environmental changes, and the know-how and ability to prevent, mitigate and adapt to these changes are urgently required. The UN General Assembly in 2005 recommended that a regular process for the global reporting and assessment of the state of the marine environment, including its socio-economic aspects, Regular Process be initiated. The UN Environment

Programme UNEP and the Intergovernmental Oceanographic Commission of UNESCO IOC UNESCO were asked to serve as the lead agencies in the start up phase that came to be known as the Assessment of Assessments AoA Under the AoA an Expert Group have developed options and a framework for such a Regular Process which can serve as the mechanism to keep the world's oceans and seas under continuing review Sharing the Resources of the South China Sea Mark John

Valencia, Jon M. Van Dyke, Noel A. Ludwig, 1997-05-20 All of the national claims to South China Sea area islands they also present problems of cost efficiency An institutionalized dialogue would add structure stability to the discussions confidence building measures CBMs could help move the situation forward but neither would suffice as a solution The creation of a regional multilateral resource management body could reduce the rife regional tension however Many international regional precedents provide valuable lessons for regime building in the South China Sea The illustrations presented stimulate constructive discussion of a comprehensive multilateral interim solution to these difficult dangerous conflicts This book will interest assist decision makers negotiators academics desirous of a peaceful solution to these disputes **Joint**

Development of Hydrocarbon Deposits in the Law of the Sea Vasco Becker-Weinberg, 2014-08-05 This book examines the concept and purpose of joint development agreements of offshore hydrocarbon deposits from the perspective of public international law and the law of the sea taking into consideration and extensively reviewing State practice concerning seabed activities in disputed maritime areas and when hydrocarbon deposits extend across maritime boundaries It distinguishes between agreements signed before and after the delimitation of maritime boundaries and analyzes the relevance of natural resources or unitization clauses included in maritime delimitation agreements It also takes into consideration the relation between these resources and maritime delimitation and analyzes all the relevant international jurisprudence Another innovative aspect of this book is that it examines the possibility of joint development of resources that lay between the continental shelf and the Area considering both theoretical and practical problems As such the book is a useful tool for scholars and experts on public international law and the law of the sea but also for national authorities and practitioners of international disputes resolution as well as public and private entities working in the oil and gas industry **The Blue**

Economy Somnath Hazra, Anindya Bhukta, 2022-10-13 This volume defines and analyzes the Blue Economy a system that encompasses all the economic activities which are happening in and around the ocean within a sustainable development framework with focus on countries in Asia This work is timely as Blue Economy activities account for a significant share of GDPs in the island and coastal economies in the Asia region sustaining the livelihoods of one of the largest sections of the world's population This book therefore assesses how the Blue Economy contributes to these livelihoods from economic and ecological perspectives and analyzes the various types of ecosystem services provided and how these services are regulated and maintained While most studies of the Blue Economy focus only on the economic aspects this book provides ample statistical data to demonstrate why ecosystem services should additionally be considered for the estimation and valuation of

the Blue economy The book is primarily meant for researchers students and teachers in the fields of environmental and ocean economics sustainable development and ecosystem services and will be of further interest to policymakers and government officials working in matters related to the Blue Economy and sustainability policy *The IMLI Treatise On Global Ocean Governance* David Joseph Attard,David M Ong,Dino Kritsiotis,2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system **Pacific Ocean Boundary Problems** Mark J. Valencia,2022-07-04
