Brave New World uses examples of news reports and the real history not always the version taught in the classroom to show how we are being managed and manipulated to allow for a total tyrannical takeover and massive depopulation that could lead us to Huxley's vision. For over six years author David Watts has undertaken deep research into the real history of the world and the ways in which it is being manipulated toward a future that only benefits an elite few. He provides many news reports, official documents and quotes from the so-called elites to piece the puzzle together. He presents a cohesive exploration of what to expect in the future if we don't become involved in determining our own fate. Journey to a Brave New World seeks to help everyone to put the pieces together, deprogram and understand both how we are being manipulated and how we can change direction now.

The politics of attack Michael Loadenthal, 2017-07-29. Since the early 2000s global underground networks of insurrectionary anarchists have carried out thousands of acts of political violence. This book is an exploration of the ideas, strategies and history of these political actors that engage in a confrontation with the oppressive powers of the state and capital. This book challenges the reader to consider the historically ignored articulations put forth by those who communicate through sometimes violent political acts: vandalism, sabotage, arson and occasional use of explosives. These small acts of violence are announced and contextualized through written communiqués which are posted online, translated and circulated globally. This book offers the first contemporary history of these digitally mediated networks and seeks to locate this tendency within anti-state struggles from the past.
