Companies from Japan Robert Fitzgerald,Chris Rowley,2017-10-02 Since the bursting of Japan s bubble economy from 1990 onwards its multinational companies MNCs have faced new competitive challenges and questions about the management practices on which they had built their initial success in global markets Japanese engagement in the international economy has undergone a number of phases Historically Japanese MNCs learnt from foreign companies frequently through strategic alliances After the post war economic miracle Japanese manufacturers in particular converted themselves into MNCs transferred their home grown capabilities to overseas subsidiaries and made an impact on the world economy But the period after 1990 marked declining Japanese competitiveness and asked questions about the ability of Japanese MNCs to be more responsive and global in their strategies organization and capabilities It has been argued that the established management practices of Japanese MNCs inhibited adaptation to recent demands of global competition This volume presents new case

evidence on how Japanese MNCs have responded to the new challenges of the global market place and it provides examples of how they have transformed strategies and competitive capabilities This book was originally published as a special issue of Asia Pacific Business Review **Transnational Corporations** Grazia Ietto-Gillies,2002-09-26 This volume examines the role of transnational corporations TNCs in the geography of international production covering both theoretical and empirical aspects International Human Resource Management in South Korean Multinational Enterprises Haiying Kang,Jie Shen,2017-02-28 In this book Korean multinational enterprises management strategies in China are analyzed China is re centering Asia around its newfound economic might even as neighboring countries such as Japan and Korea will remain more economically developed for generations to come How do Asian companies adapt to the Chinese market In this fascinating study Haiying Kang and Jie Shen investigate how Korean enterprises have adapted human resources practices to the evolving corporate climate in China Unorthodox blends of culture legal expectations and more make the market a truly interesting one to explore HRM practices on the margins Compelling for academics in HRM but also related social sciences HR practitioners and corporate leaders alike this book is a timely look at new Asian corporate cultures *The Rise of Transnational Corporations from Emerging Markets* Karl P. Sauvant,2009-01-01 Having undertaken billions of FDI in many continents and nations between Argentina and the PRC I consider Dr Sauvant s book an eye opener a new page showing us a new super highway The OFDI volume of emerging markets today surpassing the entire FDI volume of not even 20 years back is a signal of success of the free market economy It signals also the end of privileges for the Europeans It reflects entrepreneurship at its best on the part of the fast developing nations of Asia It shows that free access to know how and capital has permitted Asia to catch up at an unprecedented speed Contrary to often repeated but wrong opinions the poor of the world have benefited the most by globalization A market place of unimaginable potential is under construction in the first half of the 21st century accelerated by FDI This book should find many readers particularly among the political leaders of today and tomorrow Carl H Hahn Chairman Emeritus of Volkswagen AG This comprehensive analysis deals with the range of issues raised by the rise of transnational corporations from emerging markets This insightful book shows that foreign direct investment FDI from emerging markets has grown from negligible amounts in the early 1980s to 210 billion in 2007 with the stock of investment now being well over 1 trillion This reflects the rise of firms from these economies to become important players in the world FDI market The contributors to this book comprehensively analyze the rise of emerging market TNCs the salient features of the transnational activities of these firms the relationship of outward FDI and the competitiveness of the firms involved their impact on host and home countries and implications for the international law and policy system The subject of this study is both topical and important and poses a number of challenges that will require considerable policy attention in the future It will appeal to academics interested in FDI as well as emerging markets Karl P Sauvant has gathered together a group of leading academics that makes this an informative and valuable read for anyone interested in the subject

including academics students at all levels and private sector entities as well as government officials dealing with outward FDI

Emerging-market Multinational Enterprises in East Central Europe Ágnes Szunomár, 2020-11-23 The rise of multinational enterprises MNEs from emerging markets is topical important and poses a number of questions and challenges that require considerable attention in the future from academia as well as business management The recent takeovers of high profile companies in developed or developing countries by non European emerging market MNEs EMNEs such as Lenovo Wanhua China Hindalco India CVRD Brazil Cemex Mexico Lukoil Russia etc as well as the greenfield or brownfield investments of emerging companies such as Huawei ZTE Tata Pepco etc show a new trend where new kind of firms become major players globally EMNEs have become important players in several regions around the globe ranging from the least developed countries of Africa through the developing markets in Latin America and Asia to the developed countries of the United States or the European Union including East Central European ECE countries EMNEs presence on the global level has resulted in numerous studies in the international literature but those research results barely cover EMNEs activities in the ECE region in the East Central European EU member countries including the Czech Republic Hungary Poland Slovakia and Slovenia The existing books typically focus on the investment activity of a single country or region such as China or East Asia but a comprehensive analysis is still missing in this regard The novelty of this edited volume is that it aims at exploring EMNEs location determinants strategies activities and challenges in East Central Europe by discussing its anomalies to the traditional theories as well as to other types of MNEs in the ECE region The authors focus on EMNEs not only from China but from other important emerging countries too such as Russia India South Korea Taiwan Turkey Brazil or South Africa

Implications of Multinational Corporations in Cameroon's Underdevelopment, 1960-2015 Kingsly Awang Ollong, 2025-06-05 This book explores the complex role of MNCs in the country's economic development It argues that while MNCs can theoretically contribute to growth through positive spill over effects like R D innovation and human resource development the actual impact in Cameroon remains unclear and under researched The book presents an empirical survey of MNCs in Cameroon focusing on their corporate social responsibility CSR initiatives and their paradoxes Despite the presence of valuable natural resources the study finds that some MNCs such as BAT may contribute more to underdevelopment than development The book concludes that MNCs could play a more positive role if Cameroon implements policies to better regulate their activities thereby ensuring that their presence benefits the country's economic growth This work adds valuable insights to the literature on MNCs in Cameroon *Global Strategies in Retailing* John Dawson, Masao

Mukoyama, 2013-10-08 Large and medium sized retailers have increased their international operations substantially over the last 25 years This is evident in the number of countries to which these retailers expand the growing international sales of retailers and the heightening of the level of commitment of retailers to their international activity a trend that is likely to continue over the next decade as general globalization in the service industries increases The managerial implications of the

moves to become global are considerable Different retailers are pursuing different approaches to varying degrees of success and are no longer simply multi national but are also multi continental Consequently existing concepts and theories of international business fit uneasily in explanations of international retailing so new corporate strategies need to be explored Featuring in depth studies of seven retailers by international scholars from Japan the UK and Sweden *Global Strategies in Retailing* explores recent developments in strategy that are related to international retailing and in particular the emergence of a Global Portfolio Strategy As such this book will be important reading for all international business and retailing students and academics researching in these areas *Globalisation and Advertising in Emerging Economies* Lynne
