created the identity of the psychotherapist researcher a dual identity that entails the notion that psychotherapy research requires a qualitative dimension to make research a part of clinical practice and clinician identity regardless of their theoretical technical orientations This contributed volume aims to provide the reader an overview of the main qualitative methods developed by these psychotherapist researchers Qualitative Research in Clinical Psychology and Psychotherapy in Latin America Creativity for Studying Complex Objects in Context will be of interest to both researchers and practitioners in the fields of clinical psychology and psychotherapy interested in methodologies that can contribute to the organic incorporation of research into clinical practice and to the study of complex objects in context Some chapters in this book were originally written in Spanish and translated into English with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Actualizaciones en Psicoterapia Integrativa la Revista es online y el número corresponde al año 2022 *Nuevas perspectivas en Psicodiagnóstico de Rorschach* Carla A. Gherardi, 2024-12-13 Sabido es que la manera de pensar el diagnóstico repercute en la labor psicoterapéutica favoreciendo o restringiendo la meta primordial de todo psicólogo mejorar la calidad de vida de sus pacientes Freud luego Abraham dieron comienzo a una nosografía psicoanalítica que relacionaba cuadros psicopatológicos con las etapas del desarrollo psicosexual El esfuerzo se dirige a ubicar una determinada subjetividad dentro de algunas de las estructuras conocidas neurosis y psicosis lo que fue dando lugar cuando las mismas no se adecuaban por completo a las características planteadas por algún caso particular a la emergencia de diagnósticos caracterizados por la falta de claridad o la ambigüedad Tal es el caso de la categoría de Borderline como también la de prepsicosis que de este modo emergen más

como una manera de zanjear las dificultades planteadas por el paradigma estructuralista clásico que como un intento genuino de comprender al sujeto que padece. A diferencia de ello autores tales como Bion, Bleger, Liberman y de manera más específica Maldavsky propusieron una nosografía que permite abordar la subjetividad contemplando su naturaleza compleja. En este libro eminentemente práctico la autora toma en particular la propuesta diagnóstica del Dr. David Maldavsky quien a su vez fuera discípulo de Liberman y cuyo instrumento para el análisis del discurso ADL Algoritmo David Liberman llamado así en homenaje a su maestro permite llegar a un diagnóstico por corrientes psíquicas las cuales pueden coexistir dentro de la personalidad bajo el predominio de alguna de ellas que se erige como la rectora. Del mismo modo a través de la presente publicación la autora presenta un instrumento de su autoría de aplicación al Rorschach al que bautizó ADMR Análisis Diagnóstico Multidimensional Rorschach que toma los aportes de la Lic. Alicia Passalacqua pero reorganizados a la luz del sistema categorial propuesto por el Dr. David Maldavsky. El ADMR constituye una manera de pensar la subjetividad que no busca cerrar. En un todo coherente con el fenómeno que procura abarcar, el fenómeno psíquico representa un enfoque diagnóstico polivalente que toma en cuenta los diversos matices en que puede manifestarse la subjetividad.
