Statistics Through Applications Daren S. Starnes, David S. Moore, Dan Yates, 2009-12-25 Watch a video introduction here

Statistics Through Applications STA is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new color design, and much more. Please see the posted sample chapter or request a copy today to see for yourself.

Developing Number Sense Rusty Bresser, Caren Holtzman, 1999. Imaginative lessons give students practice with mental computation, basic operations, navigating the number system, and estimation. Content is crafted to show that number sense is not a specific skill but encompasses a student's ability to think and reason flexibly and make sound numerical judgments.

OECD Skills Studies Skills Matter Additional Results from the Survey of Adult Skills OECD, 2019-11-15. In the wake of the technological revolution that began in the last decades of the 20th century, labour market demand for information processing and other high-level cognitive and interpersonal skills has been growing substantially. Based on the results from the 39 countries and regions that participated in the 1st cycle of the Survey of Adult Skills (PIAAC), it places special emphasis on the results from the 3rd round of this cycle with 6 new countries collecting data in 2018-19. This report describes adults' proficiency in information processing skills and examines how proficiency is related to education, labour market, and social outcomes.

Teaching Students With Special Needs in Inclusive Classrooms Diane P. Bryant, Brian R. Bryant, Deborah D. Smith, 2019-03-05. Inspire and equip current and future classroom teachers to ADAPT to the needs of all students. *Teaching Students with Special Needs in Inclusive Classrooms* uses the research-validated ADAPT framework: Ask, Determine, Analyze, Propose, Test, to help teachers determine how, when, and with whom to use proven academic and behavioral interventions to obtain the best outcomes for students with disabilities. Through clear language and practical examples, authors Diane P. Bryant, Brian R. Bryant, and Deborah D. Smith show how to create truly inclusive classrooms through evidence-based practices and hands-on strategies. The Second Edition includes strategically reorganized chapters, a new chapter devoted to differentiated instruction, and new classroom footage and teacher interviews illustrating how readers can implement the strategies discussed in their own classrooms.
