Nurses In Nazi Germany:

Nurses in Nazi Germany Bronwyn Rebekah McFarland-Icke, 2020-11-10 This book tells the story of German nurses who directly or indirectly participated in the Nazis euthanasia measures against patients with mental and physical disabilities measures that claimed well over 100 000 victims from 1939 to 1945 How could men and women who were trained to care for their patients come to kill or assist in murder or mistreatment This is the central question pursued by Bronwyn McFarland Icke as she details the lives of nurses from the beginning of the Weimar Republic through the years of National Socialist rule Rather than examine what the Party did or did not order she looks into the hearts and minds of people whose complicity in murder is not easily explained with reference to ideological enthusiasm Her book is a micro history in which many of the most important ethical social and cultural issues at the core of Nazi genocide can be addressed from a fresh perspective McFarland Icke offers gripping descriptions of the conditions and practices associated with psychiatric nursing during these years by mining such sources as nursing guides personnel records and postwar trial testimony Nurses were expected to be conscientious and friendly caretakers despite job stress low morale and Nazi propaganda about patients having lives unworthy of living While some managed to cope with this situation others became abusive Asylum administrators meanwhile encouraged nurses to perform with as little disruption and personal commentary as possible So how did nurses react when ordered to participate in or tolerate the murder of their patients Records suggest that some had no conflicts of conscience others did as they were told with regret and a few refused The remarkable accounts of these nurses enable the author to re create the drama taking place while sharpening her argument concerning the ability and the willingness to choose

Germany a calculated killing of chronic mentally ill patients took place Nurses executed this program in their everyday practice However suspicions have been raised that psychiatric patients were also assassinated before and after the Nazi regime suggesting that the motives for these killings must be investigated within psychiatric practice itself This book highlights the mechanisms and scientific discourses in place that allowed nurses to perceive patients as unworthy of life This study analyzes patient records as inscriptions that actively intervene in interactions in institutions and that create a specific reality on their own accord The question is not whether the reality represented within the documents is true but rather how

documents worked in institutions and what their effects were It is shown how nurses were actively involved in the construction of patients identities and how these documentary identities led to the death of thousands of humans
