Women's Global Health and Human Rights Padmini Murthy, Clyde Smith, 2010-10-25 Women's Global Health and Human Rights serves as an overview of the challenges faced by women in different regions of the world. Ideal as a tool for both professionals and students, this book discusses the similarities and differences in health and human rights challenges that are faced by women globally. Best practices and success stories are also included in this timely and important text. Major Topics include X Globalization X Gender Based Terrorism and Violence X Cultural Practices X Health Problems X Progress and Challenges Care for Major Health Problems and Population Health Concerns Jennie Jacobs Kronenfeld, 2008-10-21 Deals with macro level system issues and micro level issues involving provision of health care as related to major health problems. This work examines social demographic and structural problems and a variety of health problems including chronic illnesses, mental illness, serious acute health problems and disabilities that require health care. *Ethical Issues in Women's Healthcare* Lori d'Agincourt-Canning, Carolyn Ells, 2019-04-02 This is an edited collection exploring ethical issues in women's health care. It includes topics related to reproduction but goes beyond this familiar theme to address clinical and social issues largely unrecognized in the bioethics literature. These include ethical issues related to the care of Indigenous women, uninsured refugees and immigrants, rural women, women engaged in sex work, and those with HIV and perinatal mental health disorders. The collection analyzes the complex ways in which practice, policy and institutional structures intersect and raise ethical issues affecting women's access to health care. Contributors comprise an interdisciplinary group of practitioners including physicians, clinical ethicists and nurses as well as academic scholars. Health Services Reports, 1987 *Public Health Reports*, 1987

Women's Health Jillian M. Duquaine-Watson, 2022-02-15 This interdisciplinary project provides an informative, accessible and comprehensive introduction to women's health. Emphasizing the perspectives of diverse groups of women, it addresses various biological, economic, social, environmental and political factors that influence women's health and well-being. Women are more likely than men to experience mood disorders, certain types of cancer, Alzheimer's disease, stroke, arthritis, lupus and celiac disease. In addition, women face significantly more barriers to health care than men due to a variety of social, economic, political and environmental factors including inequality, poverty, legislation and pollution. Despite this, the field of women's and girls' health remains both understudied and underfunded. *Women's Health: Understanding Issues and Influences* explores important topics in the field of women's health in the early 21st century, offering readers a comprehensive and informative yet accessible introduction to women's health in the United States. While some topics are unique to women's health, others illustrate how women's health and women's experiences within the U.S. health care system are different from men's as well as how certain health issues impact women differently than men. Entries have been crafted by a diverse team of contributors with wide-ranging expertise, and each entry features a collection of further readings and cross-references to other relevant entries.
