Earth observation program over the coming decade *Our Changing World-View* Jan Christian Smuts, John Patrick Dalton, Robert Broom, John Young Thomson Greig, John Frederick Vicars Phillips, Ian D MacCrone, Theodorus Johannes Haarhof, Reinhold Frederick Alfred Hoernlé, Sally Herbert Frankel, Cecil Sydney Richards, 2021-08 Johannesburg was still a brash mining town better known for the production of wealth than knowledge and the University of the Witwatersrand a mere ten years old when in 1932 these ten lectures were delivered under the auspices of the University Philosophical Society. They portrayed the ideas of the university's leading academics of the day and the programme of lectures reveals a studied effort to introduce an element of bipartisan political representation between English and Afrikaner in South Africa by including Wits' first principal Jan Hofmeyr and politician D F Malan as discussion chairs. Yet no black intellectuals were represented and indeed the politics of racial segregation bursts through the text only in a few of the contributions. For the most part race is alluded to only in passing. As Saul Dubow explains in his new introduction to this re-issue of the lectures *Our Changing World View* was an occasion for Wits' leading faculty members to position the young university as a mature institution with a leadership role in public affairs. Above all it was a means to project the university as a research as well as a teaching institution led by a vigorous and ambitious cohort of liberal minded intellectuals. That all were male and white will be immediately apparent to readers of this reissued volume. Ranging from economics psychology a spurious rebuttal of evolution to a substantial revisionist history and the perils of the machine age this book is a sombre reflection of intellectual history and the academy's role in promulgating political and social divisions in South Africa.
