This book argues that though it is a difficult and delicate task inculturation is still a requisite demand of a World Church and that without it the church is unrecognizable and unsustainable The book also suggests that the past failures of inculturation experiments in Africa can be overcome only by critically applying the science of semiotics which can serve as an antidote to the nature of human knowing and reductionism that characterized earlier attempts to make Christianity African to the African Drawing from the semiotic works of C S Peirce Clifford Geertz and Bernard Lonergan the book shows why semiotics is best suited to an African theology of inculturation and offers ten pinpointed precepts identified as Habits which underline the attentiveness reasonableness and responsibility required in a semiotic approach to a theology of inculturation The Habits are also akin to the imperatives inherent in the notion of catholicity that catholicity is not identified with uniformity but with reconciled diversity and also that catholicity demands different forms in different places times and cultural settings The Philosophy of Ernst Cassirer J Tyler Friedman,Sebastian Luft,2015-06-16 This volume brings Cassirer s work into the arena of contemporary debates both within and outside of philosophy All articles offer a fresh and contemporary look at one of the most prolific and important philosophers of the 20th century The papers are authored by a wide array of scholars working in different areas such as epistemology philosophy of culture sociology psychopathology philosophy of science and aesthetics

**The Philosophy of Susanne Langer** Adrienne Dengerink Chaplin, 2019-10-17 This book is a comprehensive study of one of the most insightful and fertile but also most neglected philosophers of the twentieth century Susanne Langer Failure to recognise Langer's seminal philosophical sources has led to frequent misinterpretations and misunderstandings of her unique philosophical thought Beginning with an overview of Langer's life and education this study provides a much needed explanation of how Langer's thinking was shaped by four seminal sources her mentors Henry Sheffer and Alfred North Whitehead and the European philosophers Ernst Cassirer and Ludwig Wittgenstein Langer's ability to unite seemingly disparate fields such logic art and embodied cognition around the notion of symbolic form places aesthetics not at the margins of philosophy but at its very centre By locating Langer's work in the broader context of major developments in twentieth century European and American philosophy Dengerink Chaplin shows how she was often ahead of her time Shedding new light on Langer as an American philosopher whose innovative thought crosses the customary boundaries between analytic and continental philosophy this book confirms why she continues to have relevance today

**The Visual and Verbal Sketch in British Romanticism** Richard C. Sha, 2016-11-11 With their broken lines and hasty brushwork sketches acquired enormous ideological and aesthetic power during the Romantic period in England Whether publicly displayed or serving as the basis of a written genre these rough drawings played a central role in the cultural ferment of the age by persuading audiences that less is more The Visual and Verbal Sketch in British Romanticism investigates the varied implications of sketching in late eighteenth and early nineteenth century culture Calling on a wide range of literary and visual genres Richard C Sha examines the shifting

economic and aesthetic value of the sketch in sources ranging from auction catalogs and sketching manuals to novels that employed scenes of sketching and courtship He especially shows how sketching became a double edged accomplishment for women when used to define proper femininity Sha s work offers fresh readings of Austen Gilpin Wordsworth and Byron as well as less familiar writers and provides sophisticated interpretations of visual sketches As the first full length work about sketching during the Romantic era this volume is a rich interdisciplinary study of both representation and gender

Philosophy and the Art of Writing Richard Shusterman,2022-05-10 Philosophy and literature enjoy a close complex relationship Elucidating the connections between these two fields this book examines the ways philosophy deploys literary means to advance its practice particularly as a way of life that extends beyond literary forms and words into physical deeds nonlinguistic expression and subjective moods and feelings Exploring thinkers from Socrates and Confucius to Foucault and Simone de Beauvoir Richard Shusterman probes the question of what roles literature could play in a vision of philosophy as something essentially lived rather than merely written To develop this vision of philosophy that incorporates literature but seeks to go beyond the verbal to realize the embodied fullness of life and capture its inexpressible dimensions Shusterman gives particular attention to authors who straddle the literature philosophical divide from Augustine and Montaigne through Wordsworth and Kierkegaard to T S Eliot Georges Bataille Maurice Blanchot and Bertrand Russell The book concludes with a chapter on the Chinese art of writing with its mixture of poetry calligraphy and painting Philosophy and the Art of Writing should interest students and researchers in literary theory and philosophy It also opens the practice of philosophy to people who are not professionals in the writing of philosophy or literary theory      **Art Disarming Philosophy** Steven

Shakespeare,Niamh Malone,, Gary Anderson,2021-09-23 Non philosophy poses a challenge to philosophical thought inspired by the work of Fran ois Laruelle It questions the idea that philosophy or other disciplines can tell us what it means to think This edited collection brings together an internationally known and interdisciplinary group of scholars including a major new essay by Laruelle himself Together they use non philosophy to cross the boundaries between philosophy and performance Philosophers have been busy for centuries looking for the foundations of truth value and reality They try to say what it all means and how it all fits together Areas of life like science and art have to wait for the philosopher to show up to tell them what they are really about Theory dictates meaning performance just puts it into effect Non philosophy is different It says that reality is not an object out there that we can think and understand The Real is the place we stand it is where we think from Crucially non philosophy understands philosophy itself to be performative It enacts modes of thinking that do not dominate the material of thought and do not capture the Real in concepts Philosophy is mutated by its performances and performances themselves think are modes of theory What happens when we bring philosophy art and performance together without hierarchy How can they get inside and change one another The thinkers in this collection answer these pressing questions      *Biographical Dictionary of Twentieth-Century Philosophers* Stuart Brown,Diane Collinson,Robert

Wilkinson, 2012-09-10 This Biographical Dictionary provides detailed accounts of the lives, works, influence, and reception of thinkers from all the major philosophical schools and traditions of the twentieth century. This unique volume covers the lives and careers of thinkers from all areas of philosophy, from analytic philosophy to Zen and from formal logic to aesthetics. All the major figures of philosophy, such as Nietzsche, Wittgenstein, and Russell, are examined and analysed. The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non-European Hispanic language communities. The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy, such as the Vienna Circle, or currents of thought such as vitalism. These allow the reader to set the individual biographies in the context of the philosophical history of the period. With entries written by over 100 leading philosophy scholars, the Biographical Dictionary is the most comprehensive survey of twentieth-century thinkers to date.

**Structure** The book is structured alphabetically by philosopher. Each entry is identically structured for ease of access and covers nationality, dates and places of birth and death, philosophical style or school, areas of interest, higher education, significant influences, main appointments, main publications, secondary literature, account of intellectual development, and main ideas, critical reception, and impact. At the end of the book, a glossary gives accounts of the schools, movements, and traditions to which these philosophers belonged, and thorough indexes enable the reader to access the information in several ways: by nationality, by major areas of contribution to philosophy (e.g. aesthetics), by major influences on the thinker concerned (e.g. Plato, Kant, Wittgenstein).
