Philosophical Perspectives Vol 13 Epistemology:

Contextualisms in Epistemology Elke Brendel, Christoph Jäger, 2005-06-29 Contextualism has become one of the leading paradigms in contemporary epistemology According to this view there is no context independent standard of knowledge and as a result all knowledge ascriptions are context sensitive Contextualists contend that their account this analysis allows us to resolve some major epistemological problems such as skeptical paradoxes and the lottery paradox and that it helps us explain various other linguistic data about knowledge ascriptions The apparent ease with which contextualism seems to solve numerous epistemological quandaries has inspired the burgeoning interest in it This comprehensive anthology collects twenty original essays and critical commentaries on different aspects of contextualism written by leading philosophers on the topic The editors introduction sketches the historical development of the contextualist movement and provides a survey and analysis of its arguments and major positions The papers explore inter alia the central problems and prospects of semantic or conversational contextualism and its main alternative approaches such as inferential or issue contextualism epistemic contextualism and virtue contextualism They also investigate the connections between contextualism and epistemic particularism and between contextualism and stability accounts of knowledge

Collected Papers, Volume 2 Stephen Stich, 2012-08-23 This volume collects the best and most influential essays on knowledge rationality and morality that Stephen Stich has published in the last 40 years The volume includes a new introductory essay that offers an overview of the papers and traces the history of how they emerged

Evidentialism and its Discontents Trent Dougherty, 2011-08-25 Few concepts have been considered as essential to the theory of knowledge and rational belief as that of evidence The simplest theory which accounts for this is evidentialism the view that epistemic justification for belief the kind of justification typically taken to be required for knowledge is determined solely by considerations pertaining to one's evidence In this ground breaking book leading epistemologists from across the spectrum challenge and refine evidentialism sometimes suggesting that it needs to be expanded in quite surprising directions Following this the twin pillars of contemporary evidentialism Earl Conee and Richard Feldman respond to each essay This engaging debate covers a vast number of issues and will illuminate and inform

The Future for Philosophy Brian Leiter, 2006 Where does philosophy stand at the beginning of the new millennium This remarkable volume brings together leading figures from most major branches of the discipline to offer answers What remains of the linguistic turn in twentieth century philosophy How should moral philosophy respond to and incorporate developments in empirical psychology Where might Continental and Anglophone feminist theory profitably interact How has our understanding of ancient philosophy been affected by the emergence of analytic philosophy Where does the mind body problem stand today What role must value judgments play in science Do Marx Nietzsche or Freud matter in the 21st century These and many other questions at the cutting edge of the discipline are addressed by distinguished philosophers from Australia Britain Canada and the United States They aim not

only to stimulate philosophical debate but to introduce those in cognate disciplines biology classics economics history law linguistics literary studies mathematics philosophy physics political science psychology among others to what is happening in contemporary philosophy In a substantial introduction the editor gives an overview of the state of philosophy today and helps orient non philosophers Metaepistemology and Relativism J. Carter,2016-04-12 Is knowledge relative Many academics across the humanities say that it is However those who work in mainstream epistemology generally consider that it is not Metaepistemology and Relativism questions whether the kind of anti relativistic background that underlies typical projects in mainstream epistemology can on closer inspection be vindicated **A Physicalist Manifesto** Andrew Melnyk,2003-10-09 A Physicalist Manifesto is a full treatment of the comprehensive physicalist view that in some important sense everything is physical Andrew Melnyk argues that the view is best formulated by appeal to a carefully worked out notion of realization rather than supervenience that so formulated physicalism must be importantly reductionist that it need not repudiate causal and explanatory claims framed in non physical language and that it has the a posteriori epistemic status of a broad scope scientific hypothesis Two concluding chapters argue in detail that contemporary science provides no significant empirical evidence against physicalism and some considerable evidence for it Written in a brisk candid and exceptionally clear style this 2003 book should appeal to professionals and students in philosophy of mind metaphysics and philosophy of science

Infinite Regress Nicholas Rescher,2017-09-08 Regression addresses what has come before it is a matter of looking backward of retrospections The motionless things of nature are generally forward looking their problem is that of the question Where do we go from here It is primarily with intelligent beings that we ask How did we get to where we now find ourselves Regression and infinite regression in particular is thus a concept that has gained a greater prominence in the human sciences than in the sciences of nature Argumentation to infinite regress has long been a favored instrument of philosophical dialectic Philosophers have used it to disprove the positions they model to criticize Infinite regresses so they reason are unrealizable they cannot be completed so as to achieve some definitive result And thereby anything that would engender an infinite regress is automatically made ineffective Infinite Regress examines the theory of regression and includes information on the topics of vicious regress innocuous regress circularity regress and propositional regress Also discussed is the history of regression stemming from ancient times to medieval times to early modern history Some of the other chapters in this book focus on world class philosophers including Immanuel Kant Georg Wilhelm Friedrich Hegel and Bertrand Russell The book will play a significant role in theoretical philosophy as well as in social philosophy and the philosophy of mind Modeling and Using Context Anind Dey,Boicho Kokinov,David Leake,Roy Turner,2005-07-11 Context is of crucial importance for research and applications in many disciplines as evidenced by many workshops symposia seminars and conferences on specific aspects of context The International and Interdisciplinary Conference on Modeling and Using Context CONTEXT the oldest conference series focusing on context provides a unique interdisciplinary emphasis

bringing together participants from a wide range of disciplines including artificial intelligence cognitive science computer science linguistics organizational science philosophy psychology ubiquitous computing and application areas such as medicine and law to discuss and report on context related research and projects Previous CONTEXT conferences were held in Rio de Janeiro Brazil 1997 Trento Italy 1999 LNCS 1688 Dundee UK 2001 LNCS 2116 and Palo Alto USA 2003 LNCS 2680 CONTEXT 2005 was held in Paris France during July 5 8 2005 There was a strong response to the CONTEXT 2005 Call for Papers with 120 submissions received A careful review process assessed all submissions with each paper first reviewed by the international Program Committee and then reviewer discussions were initiated as needed to assure that the final decisions carefully considered all aspects of each paper Reviews of submissions by the Program Chairs were supervised independently and anonymously to assure fair consideration of all work Out of the 120 submissions 23 were selected as full papers for oral presentation and 20 were selected as full papers for poster presentation These outstanding papers are presented in this proceedings

feminism science knowledge truth mathematics free will and ethics viewed through a naturalist lens *Ernest Sosa* John Greco, 2008-04-15 This is the first book devoted to the work of Ernest Sosa one of the most influential contemporary epistemologists Part of the acclaimed Philosophers and Their Critics series The editor's introduction serves as an introduction to Sosa's epistemology Contains critical essays by more than twenty of the most prominent epistemologists in the world commenting on Sosa's work Concludes with Sosa's own reply to his critics **Contemporary Pragmatism. Volume 6, Number 2. December 2009** Mitchell Aboulafia, John R. Shook, 2009 Contents Articles Lawrence Cahoon Local Naturalism Mark Dietrich Tschaepe Pragmatics and Pragmatic Considerations in Explanation Stephen S Bush Nothing Outside the Text Derrida and Brandom on Language and World Scott F Aikin Prospects for Peircean Epistemic Infinitism Guy Axtell and Philip Olson Three Independent Factors in Epistemology Stephen M Fishman and Lucille McCarthy John Dewey on Happiness Going Against the Grain of Contemporary Thought Jay Schulkin Life Experiences and Educational Sensibilities Discussion J Caleb Clanton and Andrew T Forcehimes Can Peircean Epistemic Perfectionists Bid Farewell to Deweyan Democracy Robert B Talisse Reply to Clanton and Forcehimes **Common Sense** Noah Lemos, 2004-08-23 In this 2004 book Noah Lemos presents a strong defense of the common sense tradition the view that we may take as data for philosophical inquiry many of the things we ordinarily think we know He discusses the main features of that tradition as expounded by Thomas Reid G E Moore and Roderick Chisholm For a long time common sense philosophers have been subject to two main objections that they fail to give any non circular argument for the reliability of memory and perception and that they pick out instances of knowledge without knowing a criterion for knowledge Lemos defends the appeal to what we ordinarily think we know in both epistemology and ethics and thus rejects the charge that common sense is dogmatic unphilosophical or question begging Written in a clear and engaging style this book will appeal to students and philosophers in epistemology and ethics *Resistance to Evidence* Mona Simion, 2024-02-15 We have increasingly sophisticated ways of acquiring and communicating knowledge but efforts to spread this knowledge often encounter resistance to evidence The phenomenon of resistance to evidence while subject to thorough investigation in social psychology is acutely under theorised in the philosophical literature Mona Simion's book is concerned with positive epistemology it argues that we have epistemic obligations to update and form beliefs on available and undefeated evidence In turn our resistance to easily available evidence is unpacked as an instance of epistemic malfunctioning Simion develops a full positive integrated epistemological picture in conjunction with novel accounts of evidence defeat norms of inquiry permissible suspension and disinformation Her book is relevant for anyone with an interest in the nature of evidence and justified belief and in the best ways to avoid the high stakes practical consequences of evidence resistance in policy and practice This title is also available as Open Access on Cambridge Core Relativism and the Foundations of Philosophy Steven D. Hales, 2009-08-21 A defense of the view that philosophical propositions are true in some perspectives and false in others arguing that the rationalist intuition

driven method of acquiring basic beliefs favored by analytic philosophy is not epistemically superior to such alternate belief acquiring methods as religious revelation and the ritual use of hallucinogens The grand and sweeping claims of many relativists might seem to amount to the argument that everything is relative except the thesis of relativism In this book Steven Hales defends relativism but in a more circumscribed form that applies specifically to philosophical propositions His claim is that philosophical propositions are relatively true true in some perspectives and false in others Hales defends this argument first by examining rational intuition as the method by which philosophers come to have the beliefs they do Analytic rationalism he claims has a foundational reliance on rational intuition as a method of acquiring basic beliefs He then argues that there are other methods that people use to gain beliefs about philosophical topics that are strikingly analogous to rational intuition and examines two of these Christian revelation and the ritual use of hallucinogens Hales argues that rational intuition is not epistemically superior to either of these alternative methods There are only three possible outcomes we have no philosophical knowledge skepticism there are no philosophical propositions naturalism or there are knowable philosophical propositions but our knowledge of them is relative to doxastic perspective Hales defends relativism against the charge that it is self refuting and answers a variety of objections to this account of relativism Finally he examines the most sweeping objection to relativism that philosophical propositions are not merely relatively true because there are no philosophical propositions all propositions are ultimately empirical as the naturalists contend Hales s somewhat disturbing conclusion that intuition driven philosophy does produce knowledge but not absolute knowledge is sure to inspire debate among philosophers

From Belief to Knowledge Neil Douglas, Terry Wykowski, 2010-09-08 Belief is not knowledge but we tend to hold our beliefs as if they represent knowledge selecting whatever evidence is required to justify them And because humans tend to cling to their beliefs as truths organizations often ignore the need for change no matter how urgent that need

From Belief to Knowledge Achieving and Sustaining an Adaptive C **Forms of Knowledge** Lucy Campbell, 2025-05-16

Human knowledge as we understand it in the everyday appears to make up a complex category admitting of numerous forms species modes or variations Reflection on this complexity reveals a whole ecosystem of questions and issues worthy of careful philosophical investigation Yet contemporary epistemology tends to downplay the heterogeneity of knowledge in part through its distinctively narrow focus primarily on receptive propositional knowledge and in part through a tendency to assume rather than to investigate the perfectly general applicability of the various definitions of knowledge it develops Against this background many questions and issues concerning the heterogeneity of knowledge remain under explored This volume identifies the study of the unity and heterogeneity of knowledge as a distinct subtopic of epistemology It asks what forms of knowledge there are what is distinctive about each how they relate to one another and what kind or kinds of unity we can discern amongst them Forms of Knowledge brings together philosophers working across a broad range of the philosophical literature not only in contemporary theory of knowledge but also in the history of philosophy the epistemology

of understanding philosophy of mind action theory ethics art and aesthetics and philosophy of psychiatry to consider how best to theorize the unity and heterogeneity of knowledge By foregrounding this underexplored set of issues it offers a new perspective on some of the most central of our ordinary epistemological categories **What Place for the a Priori?**
