**Philosophical Problems Today / Problèmes Philosophiques d'Aujourd'hui** Guttorm Fløistad, 2013-11-11

Philosophical Problems Today is a new series of publications from the Institut International de Philosophie. It follows upon Contemporary Philosophy, a series presenting philosophical research in various world cultures and so far published in seven volumes: Vols 1-4 on European Philosophy, Vol 5 on African Philosophy, Vol 6 on Medieval Philosophy, Part 1 and 2, and Vol 7 on Asian Philosophy, appeared in 1993. A further volume dealing with the Philosophy of South America is still in preparation to appear in 1994-95. The new series is based on a different concept. Each volume consists as a rule of five articles. The articles are extensive discussions of topical philosophical problems and offer always some original contributions. The articles in each volume represent different philosophical traditions and cultures and may thus contribute to crosscultural communication. Volume 1 in the new series contains articles on standard problems in European and American philosophy. Quine writes on truth and discusses various difficulties connected with the clear definition of the correspondence theory of truth. What are true and false are propositions. Part of the difficulty stems from the ambiguity of proposition. Some think that the word refers to certain types of sentences, others that it rather refers to the meaning of such sentences. Another major difficulty is due to the fact that the world being unique may be variously grasped.

**Current Issues in Philosophy of Mind** Anthony O'Hear, 1998

Contemporary Issues in Philosophy of Mind brings together leading figures in the area from Britain and the US who lay out their thoughts on key issues in an accessible way.

**World and Worldhood / Monde et Mondanéité** Institut International de

Philosophy, Peter Kemp, 2006-01-22 In this book philosophers try to answer the following question What is globalization and what does globe or world monde signify R mi Brague returns to the Greek idea of the cosmos in order to track the worldhood mondan it of the world that is the process by which the idea of the world is formed Don Ihde shows how a world has developed in which technologies are no longer considered neutral means serving the ends of human action but become the very means by which people exist in the world Vittorio Mathieu describes the economical world at two levels that of the individual and that of society Tomonobu Imamichi analyses the capacity of aesthetic experience to disclose a world other than the world of technological efficiency Francisco Mir Quesada C emphasises that the great political questions are not solvable without worldviews that express value systems David Rasmussen describes sensus communis as a cosmopolitan concept which founds a political globalization of the world And Peter Kemp attempts to grasp the meaning of that globalization upon which the destiny of our planet depends

**Philosophy in France Today** Alan Montefiore, 1983-01-13 Eleven leading contemporary French philosophers give here more or less direct presentations and exemplifications of their work All the essays with one exception were specifically written for this volume and for an English speaking readership the exception is the first publication anywhere of Jacques Derrida s defence of his th se d tat in 1980 based on his published works As a collection the essays convey the style tone and preoccupations as well as the range and diversity of French philosophical thinking as it is being practised today They will stimulate and inform the rapidly growing interest in this area outside France

*A Fallibilist Social Methodology for Today's Institutional Problems* John Wettersten, 2021-12-13 This book identifies and explains far ranging consequences for methodology as a consequence of the observation that all rationality is social and highlights the need for methodological reforms in publications and interactions among colleagues and research programs The idea that all rationality is social needs to be part and parcel of all social scientific theories which means that their content must be changed Sociology needs to study the impact of social rules economics must revise assumptions about how individual rationality impacts financial developments and cognitive psychology must include social dimensions In addition there is also a need for moral theories that explain how social standards of behavior can be improved in specific institutional contexts

Problems in Epistemology and Metaphysics Steven B. Cowan, 2020-02-06 Problems in Epistemology and Metaphysics takes a pro and con approach to two central philosophical topics Each chapter begins with a question Can We Have Knowledge How are Beliefs Justified What is the mind Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters covering core questions surrounding religious beliefs scientific knowledge truth being and reality this is a comprehensive introduction to debates lying at the heart of what we know how we know it and the nature of the world we

live in **Philosophical Problems Today** Guttorm Fløistad,1994-04-30 Volume 1 in the new series Philosophical Problems Today contains articles on standard problems in European and American philosophy Quine writes on truth and discusses various difficulties connected with the clear definition of the correspondence theory of truth Strawson in his articles on individuals disputes the empiricist test for the status of entity of object Sufficient identity conditions are satisfied by a much wider range of objects The concept of meaning is further extended and differentiated in the article by Habermas on speech acts and actions The notion of communicative action is central to his argument The study of formalism by Agazzi is in an important sense also a study of meaning Although for the most part developed within mathematics formal ways of thinking have been a basic tenet within philosophy and science ever since Aristotle In his article Ricoeur observes that the present philosophy of history no longer engages in the speculative system building as presented in the philosophy of Hegel Marx and Toynbee Our philosophy of history is rather a critical reflection of various issues connected with the transmission of historical meaning Nietzsche's 'Thus Spoke Zarathustra' Keith Ansell-Pearson,Paul S. Loeb,2022-06-23 Leading scholars discuss the ideas in Thus Spoke Zarathustra showing why it is one of Nietzsche s most important philosophical works

*Transforming Philosophy in the Early Twentieth Century* Bohang Chen,2024-11-15 This book conducts a historico critical investigation into a proposal to transform philosophy in the early twentieth century Driven by the Great Differentiation the emancipation of the sciences from philosophy in the nineteenth century several early twentieth century philosophical movements advocated the transformation of philosophy from an endeavor to unify all conceivable human knowledge into a practice focused on the logical analysis of the differentiated sciences and broader human knowledge However this proposal was not subsequently adopted leading to the establishment of academic philosophy as a discipline characterized by unique philosophical problems and solutions Drawing on a variety of sources this book posits that the transformation proposal offers crucial insights for understanding the history of philosophy especially at its critical turning point in the early twentieth century Moreover although not pursued in academic philosophy today this proposal still offers insights for rethinking the future role of philosophy In response to Max Weber s fundamental challenge to philosophy post Differentiation it is argued that logical analysis offers a viable methodological approach and that the realm of values serves as a remaining substantive domain for practical philosophy The book will be attractive to researchers and students interested in the history of philosophy and science as well as general intellectual history Historicism and Its Problems Ernst Troeltsch,2024 In this volume Ernst Troeltsch embraces historical relativity while rejecting historical relativism and thereby provides a model for the philosophy of history The volume remains as relevant as it was in 1923 **Humanities**,1980 **Metaphysics, Facticity, Interpretation** D. Zahavi,Sara Heinämaa,Hans Ruin,2012-12-06 The past decade has witnessed a notable turn in philosophical orientation in the Nordic countries For the first time the North has a generation of philosophers who are oriented to phenomenology This means a vital rediscovery of the phenomenological tradition as a partly hidden conceptual

and methodological resource for taking on contemporary philosophical problems The essays collected in the present volume introduce the reader to the phenomenological work done in the Nordic countries today The material is organized under three general headings metaphysics facticity and interpretation The first part Metaphysics asks if phenomenology is or could be taken as a metaphysical inquiry It studies this possibility in a systematic as well as in a historical perspective The second part Facticity focuses on the double character of the philosophizing subject on the one hand as a worldly being bound by a cultural and historical situation and on the other hand as the one who thinks this condition and gives it an interpretation It studies four aspects of facticity in particular language dwelling alterity and generation The third part Interpretation clarifies the different notions of interpretation central to phenomenology understood as hermeneutics *Translations from Kommunist*, 1971

**The Problems of Contemporary Philosophy** Paul Livingston, Andrew Cutrofello, 2015-12-08 This accessible new book provides a clear and wide ranging introduction to the defining problems of contemporary philosophy Its unique feature is to focus on problems that cut across the established divide between analytic and continental philosophical traditions Instead of segregating the two traditions as is usually done the authors offer a critical orientation and guide for readers who are not exclusively affiliated with either approach and who want to understand the increasingly shared questions philosophers are asking and addressing today Each chapter starts with a fundamental overarching question 1 What and how can we know 2 What is the structure of the world 3 What goes beyond the physical world 4 What is to be done 5 What does it mean to orient oneself philosophically Under these headings the authors critically examine the disciplines most fundamental problems Their approach reveals deep and unexpected connections across the analytic continental divide and opens up new ways of thinking about critique itself No other book about contemporary philosophy is as comprehensive and cosmopolitan The Problems of Contemporary Philosophy provides newcomers and seasoned philosophers alike with an entertaining engaging and far reaching portrait of today's philosophical landscape It is an exemplary instance of thinking across and beyond the analytic continental divide

**China Yesterday and Today** Edward Thomas Williams, 1929

Hermeneutics and Deconstruction Hugh J. Silverman, Don Ihde, 1985-01-01 Hermeneutics and Deconstruction provides an assessment of two dominant modes of thinking and writing in continental philosophy today It addresses central issues in the theory of interpretation and in the strategies of textual reading Placed in the context of contemporary philosophical practice this volume raises the question of the end of philosophy and offers different ways of understanding how the question of closure in philosophy can itself open up a whole range of philosophical activities Special attention is given to the practice of interpretation in the areas of science perception and literature and to the dimensions of hermeneutic understanding with respect to being life and the world An investigation of how history is interpreted and read as a text provides access to one of the significant differences between hermeneutic understanding and deconstructionist practice A section is devoted to the controversy concerning the value and the achievement of deconstruction The writings of Heidegger and Derrida are

juxtaposed and examined And the volume concludes with several indications of new directions in continental philosophy and various versions of what a post Derridean reading might entail      *The Ethics of Today's Science and Technology* Wenchao Li, Hans Poser, 2008 Beneath the discussion and clarification of problems of which both sides agreed to have them in common and which are documented in this volume one of the important insights on both sides had been disagreements depending on a different way in seeing articulating and reflecting on these problems So the English term science in differing from the German Wissenschaft which includes not only sciences of nature but also humanities is meant in the Western tradition as the uninterested research for truth especially for most general laws but the Chinese understanding seems to be characterized by an immediate connection of science and its practical use
