## **Philosophie In Synthetischer Absicht Synthesis In Mind:**

**Kant's Theory of Mind** Karl Ameriks,2000 This text presents a survey and evaluation of Kant's theory of mind. It focuses on Kant's discussion of the Paralogisms in the Critique of Pure Reason and examines how the themes raised there are treated in the rest of Kant's writings.

**Dieter Henrich and Contemporary Philosophy** Dieter Freundlieb,2017-09-29 Dieter Henrich is one of the most respected and frequently cited philosophers in Germany today. His extensive and highly innovative studies of German Idealism and his systematic analyses of subjectivity have significantly impacted on advanced German philosophical and theological debates. Dieter Henrich and Contemporary Philosophy presents a comprehensive analysis of Henrich's work on subjectivity, evaluating it in the context of contemporary debates in both continental and analytic traditions. Familiarising the non-German reader with an important development in contemporary German philosophy, this book explains the significance of subjectivity for any philosophy that attempts to offer existential orientation and contrasts competing conceptions in analytic philosophy and in the social philosophy of Jürgen Habermas. Presenting Henrich's philosophy of subjectivity as a credible alternative to analytic philosophy of mind and a radical challenge to Heideggerian Habermasian neo-pragmatist and postmodern positions, Freundlieb argues that a philosophy of the kind developed by Henrich can regain the cultural significance philosophical thinking once possessed. Dieter Freundlieb is Senior Lecturer in the School of Humanities, Griffith University, Australia.

**The Kantian Subject** Fernando M. F. Silva, Luigi Caranti,2023-11-30 This book presents a critical reconsideration of the Kantian cognitive and practical subject. Special attention is devoted to highlighting the complex relation between subjectivity as it is presented in the three critiques and the way in which it is construed in other writings, in particular the Anthropology. While for Kant our cognitive apparatus and the structure of our will are common to all humans, the anthropological subject reveals degrees of variation depending on a myriad of external circumstances that pose a challenge to the unity of Kant's account and await theoretical solutions. The chapters collected in the volume delve into how the different shapes of human nature are not unrelated. They explore how and why different Kantian subjects are closely connected at their core, if not entirely unified. The notions of personality, humanity, and citizenship will serve as leading threads for the reconstruction of this possible underlying unity. An engaging read that promises to deepen our understanding of human nature, the volume will be of great interest to scholars and researchers of philosophy, politics, psychology, social anthropology, ethics, and epistemology.
