Philosophies of History Grace E. Cairns, 2011-10-01 Philosophies of History Grace Edith Cairns, 1962

Philosophies of History Grace Edith Cairns, 1971 **The Study of History**, 2000 History is a subject which never stands still It is always changing its philosophies its contours its leading questions its politics its conceptual status and its methodologies This bibliographical guide to the study of history is wide ranging in scope extending from the ancient world to the 20th century It deliberately concentrates on modern historians views provides a substantial section on the philosophy of history charts controversies and highlights the continual evolution and diversification of history The material is logically organized in major areas and subsections and cross references are given where appropriate An index of authors editors and compilers is also provided **Chinese Philosophy of History** Dawid Rogacz, 2020-10-15 Challenging the Eurocentric misconception that the philosophy of history is a Western invention this book reconstructs Chinese thought and offers the first systematic treatment of classical Chinese philosophy of history Dawid Rogacz charts the development from pre imperial Confucian philosophy of history the Warring States period and the Han dynasty through to the neo Confucian philosophy of the Tang and Song era and finally to the Ming and Qing dynasties Revealing underexplored areas of Chinese thought he provides Western readers with new insight into original texts and the ideas of over 40 Chinese philosophers including Mencius Shang Yang Dong Zhongshu Wang Chong Liu Zongyuan Shao Yong Li Zhi Wang Fuzhi and Zhang Xuecheng This vast interpretive body is compared with the main premises of Western philosophy of history in order to open new lines of inquiry and directions for comparative study Clarifying key ideas in the Chinese tradition that have been misrepresented or shoehorned to fit Western definitions Rogacz offers an important reconsideration of how Chinese philosophers have understood history The History of Philosophy Donald Phillip Verene, 2008-06-20 With the aim of guiding readers along in Hegel s words the long process of education towards genuine philosophy this introduction emphasizes the importance of striking up a conversation with the past Only by looking to past masters and their works it holds can old memories and prior thought be brought fully to bear on the present This living past invigorates contemporary practice enriching today s study and discoveries In this book groundbreaking philosopher and author Donald Verene addresses two themes why should one study the historically great texts and if such a study is necessary how can one undertake it Acting out against the rejection of the idea that there is a philosophical canon he centers his argument on the tetralogy of Plato Aristotle Kant and Hegel From his opening look at the rhetorical tradition he brings those core ideals forward to classical Roman and medieval philosophers and then on into Renaissance and modern philosophy including contemporary thinkers such as Derrida and Foucault This vital chronological outline is supplemented by Verene s contextualizing commentary In ensuing sections he offers guidance on reading philosophical works with intellectual empathy suggests 100 essential works to establish a canon illustrates the role of philosophers in history and society and examines the nature of history itself Ultimately Verene concludes that history

may be essential to philosophy but philosophy is more than just its history

The Bibliographical Guide to the Global History of Philosophy , The Idea of Historical Recurrence in Western Thought G. W. Trompf, 2023-11-15 The idea that history repeats itself has a long and intriguing history This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent The author shows that this idea should not be confined to its cyclical version for such notions as reenactment retribution and renaissance also belong under the wide umbrella of recurrence He argues moreover that not only the Greco Roman but also the biblical tradition contributed to the history of this idea The old contrast between Judeo Christian linear views of history and Greco Roman cyclical views is brought into question Beginning with Polybius Trompf examines the manifold forms of recurrence thinking in Greek and Roman historiography then turns his attention to biblical views of historical change arguing that in Luke Acts and in earlier Jewish writings an interest in the idea of history repeating itself was clearly demonstrated Jewish and early Christian writers initiated and foreshadowed an extensive synthesizing of recurrence notions and models from both traditions although the syntheses could vary with the context and dogmatic considerations The Renaissance and Reformation intertwine classical and biblical notions of recurrence most closely yet even in the sixteenth century some ideas distinct to each tradition such as the Polybian conception of a cycle of governments and the biblical notion of the reenactment of significant events were revived in stark separation from each other The Idea of Historical Recurrence in Western Thought deals with a continuing but not always fruitful dialogue between the two great traditions of Western thought a dialogue that did not stop short in the days of Machiavelli but has been carried on to the present day This study is the first half of a long story to be continued in a second volume on the idea of historical recurrence from Giambattista Vico to Arnold Toynbee The idea that history repeats itself has a long and intriguing history This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent The author shows that this idea should not be confined to

The Fourth Turning William Strauss, Neil Howe, 2009-01-16 NATIONAL BESTSELLER Discover the game changing theory of the cycles of history and what past generations can teach us about living through times of upheaval with deep insights into the roles that Boomers Generation X and Millennials have to play now with a new preface by Neil Howe One of the best efforts to give us an integrated vision of where we are going The Wall Street Journal First comes a High a period of confident expansion Next comes an Awakening a time of spiritual exploration and rebellion Then comes an Unraveling in which individualism triumphs over crumbling institutions Last comes a Crisis the Fourth Turning when society passes through a great and perilous gate in history William Strauss and Neil Howe will change the way you see the world and your place in it With blazing originality The

Fourth Turning illuminates the past explains the present and reimagines the future Most remarkably it offers an utterly persuasive prophecy about how America s past will predict what comes next Strauss and Howe base this vision on a provocative theory of American history The authors look back five hundred years and uncover a distinct pattern Modern history moves in cycles each one lasting about the length of a long human life each composed of four twenty year eras or turnings that comprise history s seasonal rhythm of growth maturation entropy and rebirth Illustrating this cycle through a brilliant analysis of the post World War II period The Fourth Turning offers bold predictions about how all of us can prepare individually and collectively for this rendezvous with destiny The Sense of Decadence in Nineteenth-Century France

Koenraad W. Swart,2013-11-11 It was the best of times It was the worst of times The famous opening sentence of Charles Dickens Tale of Two Cities can serve as a motto to characterize the mixture of optimism and pessimism with which a large number of nineteenth century intellectuals viewed the condition of their age It is nowadays hardly necessary to accentuate the optimistic elements in the nineteenth century view of history many recent historians have sharply contrasted the complacency and the great expectations of the past century with the fears and anxieties rampant in our own age It is often too readily assumed that a hundred years ago all leading thinkers as well as the educated public were addicted to the cult of progress and ignored or minimized those trends of their times that paved the way for the catastrophes of the twentieth century In the nineteenth century the intoxicating triumphs of modern science undeniably induced the general public to believe that progress was not an accident but a necessity and that evil and immorality would gradually disappear Yet fears misgivings and anxieties were not as exceptional in the nineteenth century as is often imagined Such feelings were not restricted to a few dissenting philosophers and poets like Schopenhauer Kierkegaard Dostoevsky Baudelaire and Nietzsche

Methodology and Method in History (RLE Accounting) Lee Parker,Finley Graves,2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals
