

# 1. *The Dialectic Method*

- This method of philosophizing was formulated by the Greek philosopher **Socrates**, one of the great philosophers of the ancient world.
- The method starts with eliciting the definition of a certain word from a person who appears to be familiar (or “pretends” to be familiar) with its meaning. Socrates then points out the imperfections of the understanding of the person through a series of questions. What Socrates desires is for the person to realize his ignorance and contradictions, and thereby correcting his own mistakes and arriving at a complete knowledge of the true meaning of the word.
