1. MYTHOS AND LOGOS

LOVE AND WISDOM

- Philosophy>love of wisdom (Philo=love; Sophia=wisdom)

- Focus on the truth, the good and the beauty

Consensus Realities Stefan Wurm, 2022-01-05 We perceive the world in which we live through our senses and make sense of it using our minds In this way we construct our very own consensus realities our subjective interpretations of the world as each one of us perceives and understands it What do we know about how we construct our consensus realities How do human body and mind connect as they somehow must to give us the experience of the world that we know we have The first three book chapters invite the reader to explore what the human brain philosophy of mind and psychology can tell us about the relationship between the human body and mind We all are curious about those things and exploring them is possible for all of us We have no other choice than to form our own consensus realities as it is through them that we can make sense of us in this world Many consensus realities only deviate from objective reality in as much as our personal vanity goes to make us more comfortable with who we are Others however can seemingly dissociate themselves to much greater degrees from objective reality endorsing fake news and false narratives creating their own make believe worlds in the process The fourth book chapter looks into some of the implications that has had in the past and might have in the future

Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to flourish only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is
