Philosophy And Psychotherapy Vol 1 Razing The Troubles Of The Brain:

Introduction to the Study of Religion Leroyce Miles, 2018-08-07 One thing is clear that fighting with other human beings in the name of religion is subhuman As a religious man we are fellow travellers in the direction of the realm of spirit Here the nomenclature of Hindus Muslims Christians etc ceases to be meaningful Of course we have to go very far and we have not made any beginning yet However at present the advaitic principle of difference less Brahman can serve the purpose of harmonizing all religions Here we have adopted this principle Secondly the key concepts of different religions have been shown to mingle into one another The book attempts to interrogate the categories used in western discourse in the study of religion In doing so the book outlines a broad overview of the discussions on issues relating to the methods and theories in the study of religion The book provides an insight into some of the key issues that need clarity in dealing with religions This scholarly presentation is a must read for students of religion culture and philosophy and for those involved with the struggles of the subaltern community

Education's Epistemology Harvey Siegel, 2017-09-08 Education's Epistemology extends and further defends Harvey Siegel's reasons conception of critical thinking It analyzes and emphasizes both the epistemic quality and the dispositions and character traits that constitute the critical spirit that are central to a proper account of critical thinking argues that that epistemic quality must be understood ultimately in terms of epistemic rationality defends a conception of rationality that involves both rules and judgment and argues that critical thinking has normative value over and above its instrumental tie to truth Siegel also argues contrary to currently popular multiculturalist thought for both transcultural and universal philosophical ideals including those of multiculturalism and critical thinking themselves
