**Arab-Islamic Philosophy** Muḥammad ʿĀbid Jābirī, 1999 The distinguished Moroccan philosopher Mohammed Abed al Jabri in this summary of his own work examines the status of Arab thought in the late twentieth century Al Jabri rejects what he calls the current polarization of Arab thought between an imported modernism that disregards Arab tradition and a fundamentalism that would reconstruct the present in the image of an idealized past Both past and present intellectual currents are examined Al Jabri first questions the current philosophical positions of the liberals the Marxists and the fundamentalists Then he turns to history exploring Arab philosophy in the tenth and twelfth centuries a time of political and ideological struggle In the writings of Ibn Hazm and Averroes he identifies the beginnings of Arab rationalism a rationalism

he traces through the innovative fourteenth century work of Ibn Khaldun Al Jabri offers both Western readers and his own compatriots a radical new approach to Arab thought one that finds in the past the roots of an open critical rationalism which he sees as emerging in the Arab world today

With some exceptions there is not a real interest in Islamic philosophy and theology in Western institutions today This largely ignored area has the potential to present enlightening insights into the development of the Western thought and to contribute to contemporary discussions in philosophy and theology in general Scholars working in Islamic thought usually focus on its medieval background and consider it to be mainly of a historical interest and far away from the intellectual world of today Showing its contemporary relevance is an important task by which the status of Islamic philosophy can be elevated to its proper station By considering these points in mind the University of Kentucky organized an international graduate student conference on Islamic philosophy and theology with an emphasis on its contemporary relevance which was held between the 28th and 30th September 2007 This book emerged out of the conference by adding more chapters relevant to the main theme of the book This book presents analyses and discussions of different topics in Islamic philosophy and theology by relating them to contemporary debates and ideas in four main areas epistemology metaphysics philosophy of religion and value theory There are ten chapters in sum Some of the chapters are written by graduate students and some of them by experienced scholars Each chapter presents considerable insight into its relevant topic but does not represent the opinion of anybody except the author

**Islamic Philosophy and Theology** W. Montgomery Watt, 2017-08-01

Events are making clear to ever widening circles of readers the need for something more than a superficial knowledge of non European cultures In particular the blossoming into independence of numerous African states many of which are largely Muslim or have a Muslim head of state has made clear the growing political importance of the Islamic world and as a result the desirability of extending and deepening the understanding and appreciation of this great segment of mankind Islamic philosophy and theology are looked at together in a chronological framework in this volume From a modern standpoint this juxtaposition of the two disciplines is important for the understanding of both but it should be realized at the outset that it is a reversal of the traditional Islamic procedure Not merely were the disciplines different but in the earlier centuries the exponents were two different sets of persons trained in two different educational traditions each with its own separate institutions There was little personal contact between philosophers and theologians and the influence of the two disciplines on one another was largely by way of polemics Eventually while philosophy died out as a separate discipline in the Islamic world many parts of it were incorporated in theology This work is designed to give the educated reader something more than can be found in the usual popular books The work undertakes to survey a special part of the field and to show the present stage of scholarship Where there is a clear picture this will be given but where there are gaps obscurities and differences of opinion these will also be

indicated This work is brilliant in its design style and intimate understanding It is a must read for specialists and policy makers alike *The Essence of Islamic Philosophy* Mashhad Al-'Allāf,2003 **Prophecy in Islam** Fazlur Rahman,2008 Originally published in 1958 This volume brings into focus an area of Islamic religio philosophical thought to which relatively little attention has been paid by modern scholars of Muslim thought The importance of the subject lies in the fact that it constitutes a central point at the confrontation of the traditional Islamic and Hellenic thought currents History of Islamic Philosophy Oliver Leaman,Seyyed Hossein Nasr,2020-08-17 Islamic philosophy has often been treated as being largely of historical interest belonging to the history of ideas rather than to philosophical study This volume successfully overturns that view Emphasizing the living nature and rich diversity of the subject it examines the main thinkers and schools of thought discusses the key concepts of Islamic philosophy and covers a vast geographical area This indispensable reference tool includes a comprehensive bibliography and an extensive index **Islamic Philosophy** M. Saeed Sheikh,1982 The first English publication of a standard text which in relatively small compass and with great lucidity covers the main schools with their rise and development and influences A most important book The Philosophy of Islam Khaja Khan,1903 **Islamic Philosophy A-Z** Peter Groff,2007-05-11 A unique introductory guide to the rich complex and diverse tradition of Islamic philosophy Islamic Philosophy A Z comprises over a hundred concise entries alphabetically ordered and cross referenced for easy access All the essential aspects of Islamic philosophy are covered here key figures schools concepts topics and issues Articles on the Peripatetics Isma'ilis Illuminationists Sufis kalam theologians and later modern thinkers are supplemented by entries on classical Greek influences as well as Jewish philosophers who lived and worked in the Islamic world Topical entries cover various issues and key positions in all the major areas of philosophy making clear why the central problems of Islamic philosophy have been and remain matters of rational disputation This book will prove an indispensable resource to anyone who wishes to gain a better understanding of this fascinating intellectual tradition *The Oxford Handbook of Islamic Philosophy* Khaled El-Rouayheb,Sabine Schmidtke,2016-10-03 The study of Islamic philosophy has entered a new and exciting phase in the last few years Both the received canon of Islamic philosophers and the narrative of the course of Islamic philosophy are in the process of being radically questioned and revised Most twentieth century Western scholarship on Arabic or Islamic philosophy has focused on the period from the ninth century to the twelfth It is a measure of the transformation that is currently underway in the field that unlike other reference works the Oxford Handbook has striven to give roughly equal weight to every century from the ninth to the twentieth The Handbook is also unique in that its 30 chapters are work centered rather than person or theme centered in particular taking advantage of recent new editions and translations that have renewed interest and debate around the Islamic philosophical canon The Oxford Handbook of Islamic Philosophy gives both the advanced student and active scholar in Islamic philosophy theology and intellectual history a strong sense of what a work in Islamic philosophy looks like and a deep view of the issues concepts and arguments that are

at stake Most importantly it provides an up to date portrait of contemporary scholarship on Islamic philosophy
