Knowledge and Inquiry Matti Sintonen, 1997 Abstracts **Language, Knowledge, and Intentionality** Martin Kusch, Ilkka Niiniluoto, Leila Haaparanta, 1990 *Quantifiers, Questions and Quantum Physics* Daniel Kolak, John Symons, 2007-11-10 Jaakko Hintikka is one of the most creative figures in contemporary philosophy He has made significant contributions to virtually all areas of the discipline from epistemology and the philosophy of logic to the history of philosophy and the philosophy of science Part of the fruitfulness of Hintikka's work is due to its opening important new lines of investigation and new approaches to traditional philosophical problems This volume gathers together essays from some of Hintikka's colleagues and former students exploring his influence on their work and pursuing some of the insights that we have found in his work This book includes a comprehensive overview of Hintikka's philosophy by Dan Kolak and John Symons and an annotated bibliography of Hintikka's work **Inquiry as Inquiry: A Logic of Scientific Discovery** Jaakko Hintikka, 2013-04-17 Is a genuine logic of scientific discovery possible In the essays collected here Hintikka not only defends an affirmative answer he also outlines such a logic It is the logic of questions and answers Thus inquiry in the sense of knowledge seeking becomes inquiry in the sense of interrogation Using this new logic Hintikka establishes a result that will undoubtedly be considered the fundamental theorem of all epistemology viz the virtual identity of optimal strategies of pure discovery with optimal deductive strategies Questions to Nature of course must include observations and experiments Hintikka shows in fact how the logic of experimental inquiry can be understood from the interrogative vantage point Other important topics examined include induction in a forgotten sense that has nevertheless played a role in science explanation the incommensurability of theories theory ladenness of observations and identifiability **Analyses of Aristotle** Jaakko Hintikka, 2006-04-11 Aristotle thought of his logic and methodology as applications of the Socratic questioning method In

particular logic was originally a study of answers necessitated by earlier answers For Aristotle thought experiments were real experiments in the sense that by realizing forms in one's mind one can read off their properties and interrelations Treating forms as independent entities knowable one by one committed Aristotle to his mode of syllogistic explanation He did not think of existence predication and identity as separate senses of *estin* Aristotle thus serves as an example of a thinker who did not rely on the distinction between the allegedly different Fregean senses thereby shedding new light on our own conceptual presuppositions This collection comprises several striking interpretations that Jaakko Hintikka has put forward over the years constituting a challenge not only to Aristotelian scholars and historians of ideas but to everyone interested in logic epistemology or metaphysics and in their history

Jaakko Hintikka Selected Papers (Set) Jaakko Hintikka, 2005-04-11 Vol 1 Ludwig Wittgenstein Half Truths and One and a Half Truths Because of his legendary impatience Wittgenstein's published books are focused on his solutions to his latest problems and consequently often fail to explain not only his earlier solutions but also his problem situation In the essays collected in this volume Jaakko Hintikka counteracts the difficulty which this peculiarity of Wittgenstein's poses to his readers by analysing in depth the crucial stages of Wittgenstein's philosophical career and the relation of his ideas to those of other philosophers especially Russell Carnap and Husserl with sometimes surprising results Vol 2 *Lingua Universalis* vs *Calculus Ratiocinator* Twentieth century philosophy has tacitly been dominated by a deep contrast between universalist and model theoretical visions of language The role of this contrast is studied here in Peirce Frege Wittgenstein Carnap Quine Husserl Heidegger and in the development of logical theory Hintikka also develops a new approach to truth definitions which strongly supports the model theoretical view Vol 3 *Language Truth and Logic in Mathematics* The foundations of mathematics are examined by reference to such crucial concepts as the informational independence of quantifiers the standard/nonstandard distinction completeness computability parallel processing and the extremality of models Vol 4 *Paradigms for Language Theory and Other Essays* Several of the basic ideas of current language theory are subjected to critical scrutiny and found wanting including the concept of scope the hegemony of generative syntax the Frege/Russell claim that verbs like *is* are ambiguous and the assumptions underlying the so-called New Theory of Reference In their stead new constructive ideas are proposed Vol 5 *Inquiry as Inquiry A Logic of Scientific Discovery* **STRONG** In the essays collected here Hintikka both defends and outlines a genuine logic of scientific discovery the logic of questions and answers Thus inquiry in the sense of knowledge seeking becomes inquiry in the sense of interrogation Using this new logic Hintikka establishes a result that will undoubtedly be considered the fundamental theorem of all epistemology viz the virtual identity of optimal strategies of pure discovery with optimal deductive strategies Vol 6 *Analyses of Aristotle* This collection comprises several striking interpretations of Aristotle's logic and methodology that Jaakko Hintikka has put forward over the years constituting a challenge not only to Aristotelian scholars and historians of ideas but to everyone interested in logic epistemology or metaphysics and in their history

Language, Truth and Logic in Mathematics Jaakko Hintikka,2013-03-09 One can distinguish roughly speaking two different approaches to the philosophy of mathematics On the one hand some philosophers and some mathematicians take the nature and the results of mathematicians activities as given and go on to ask what philosophical morals one might perhaps find in their story On the other hand some philosophers logicians and mathematicians have tried or are trying to subject the very concepts which mathematicians are using in their work to critical scrutiny In practice this usually means scrutinizing the logical and linguistic tools mathematicians wield Such scrutiny can scarcely help relying on philosophical ideas and principles In other words it can scarcely help being literally a study of language truth and logic in mathematics albeit not necessarily in the spirit of AJ Ayer As its title indicates the essays included in the present volume represent the latter approach In most of them one of the fundamental concepts in the foundations of mathematics and logic is subjected to a scrutiny from a largely novel point of view Typically it turns out that the concept in question is in need of a revision or reconsideration or at least can be given a new twist The results of such a re examination are not primarily critical however but typically open up new constructive possibilities The consequences of such deconstructions and reconstructions are often quite sweeping and are explored in the same paper or in others

Lingua Universalis vs. Calculus Ratiocinator: Jaakko Hintikka,2013-04-09 R G Collingwood saw one of the main tasks of philosophers and of historians of human thought in uncovering what he called the ultimate presuppositions of different thinkers of different philosophical movements and of entire eras of intellectual history He also noted that such ultimate presuppositions usually remain tacit at first and are discovered only by subsequent reflection Collingwood would have been

delighted by the contrast that constitutes the overall theme of the essays collected in this volume Not only has this dichotomy of views been one of the most crucial watersheds in the entire twentieth century philosophical thought Not only has it remained largely implicit in the writings of the philosophers for whom it mattered most It is a truly Collingwoodian presupposition also in that it is not a premise assumed by different thinkers in their argumentation It is the presupposition of a question an assumption to the effect that a certain general question can be raised and answered Its role is not belied by the fact that several philosophers who answered it one way or the other seem to be largely unaware that the other answer also makes sense if it does This Collingwoodian question can be formulated in a first rough approximation by asking whether language our actual working language Tarski's colloquial language is universal in the sense of being inescapable This formulation needs all sorts of explanations however

Models for Modalities Jaakko Hintikka, 2012-12-06 The papers collected in this volume were written over a period of some eight or nine years with some still earlier material incorporated in one of them Publishing them under the same cover does not make a continuous book of them The papers are thematically connected with each other however in a way which has led me to think that they can naturally be grouped together In any list of philosophically important concepts those falling within the range of application of modal logic will rank high in interest They include necessity possibility obligation permission knowledge belief perception memory hoping and striving to mention just a few of the more obvious ones When a satisfactory semantics in the sense of Tarski and Carnap was first developed for modal logic a fascinating new set of methods and ideas was thus made available for philosophical studies The pioneers of this model theory of modality include prominently Stig Kanger and Saul Kripke Several others were working in the same area independently and more or less concurrently Some of the older papers in this collection especially Quantification and Modality and Modes of Modality serve to clarify some of the main possibilities in the semantics of modal logics in general

Socratic Epistemology Jaakko Hintikka, 2007-09-03 Most current work in epistemology deals with the evaluation and justification of information already acquired In this book Jaakko Hintikka instead discusses the more important problem of how knowledge is acquired in the

first place His model of information seeking is the old Socratic method of questioning which has been generalized and brought up to date through the logical theory of questions and answers that he has developed *Knowledge and Belief* Jaakko Hintikka,1962 *Analytic Philosophy in Finland* ,2016-08-09 Finland is internationally known as one of the leading centers of twentieth century analytic philosophy This volume offers for the first time an overall survey of the Finnish analytic school The rise of this trend is illustrated by original articles of Edward Westermarck Eino Kaila Georg Henrik von Wright and Jaakko Hintikka Contributions of Finnish philosophers are then systematically discussed in the fields of logic philosophy of language philosophy of science history of philosophy ethics and social philosophy Metaphilosophical reflections on the nature of philosophy are highlighted by the Finnish dialogue between analytic philosophy phenomenology pragmatism and critical theory **Quantifiers, Questions and Quantum Physics** Daniel Kolak,John Symons,2005-01-05 Jaakko Hintikka is one of the most creative figures in contemporary philosophy He has made significant contributions to virtually all areas of the discipline from epistemology and the philosophy of logic to the history of philosophy and the philosophy of science Part of the fruitfulness of Hintikka s work is due to its opening important new lines of investigation and new approaches to traditional philosophical problems This volume gathers together essays from some of Hintikka s colleagues and former students exploring his influence on their work and pursuing some of the insights that we have found in his work This book includes a comprehensive overview of Hintikka s philosophy by Dan Kolak and John Symons and an annotated bibliography of Hintikka s work The Method of Analysis Jaakko Hintikka,U Remes,1974-11-30
