The Law-Science Chasm Cedric Charles Gilson, 2012-11-01 THE LAW SCIENCE CHASM is a socio legal study that takes seriously the varying approaches to science that physicians and scientists use as compared to legal actors such as judges and

lawyers Offering a way to mediate and translate their different perspectives and assumptions Gilson uses sociological and philosophical methodologies to explain each discipline to the other Gilson's book takes seriously the idea of the autopoietic closure of society's communicative subsystems and works out the consequences in particular for science and law This analysis both lends support to the credibility of the approach adopted and sheds light on the problems and the direction in which potential solutions might lie The book consequently makes an important contribution not only to the literature dealing with the relationship between science and law but also to the literature dealing with the application of autopoietic systems theory to tangible concerns This book is therefore of clear significance to those continuing to wrestle with the challenges thrown up by science for law and policy even when the spotlight of public attention is directed elsewhere

Philosophical Foundation of Human Rights Paul Tiedemann, 2023-10-05 This textbook presents a range of classical philosophical approaches in order to show that they are unsuitable as a foundation for human rights Only the conception of human dignity based on the Kantian distinction between price and dignity can provide a sufficient basis The

derivation of human rights from the principle of human dignity allows us to identify the most crucial characteristic of human rights namely the protection of personhood This in turn makes it possible 1 to distinguish between real moral human rights and spurious ones 2 to assess the scope of protection for many codified human rights according to the criteria of core and yard and 3 offers a point of departure for creating new unwritten human rights This philosophical basis supports a substantial reassessment of the case law on human rights which will ultimately allow us to improve it with regard to legal certainty clarity and cogency In the second edition errors have been corrected in numerous places the text has been made clearer and easier to understand In addition more recent human rights issues have been newly included especially those related to the Corona epidemic and climate change The textbook is primarily intended for advanced law students who are interested in a deeper understanding of human rights It is also suitable for humanities students and for anyone in the political or social arena whose work involves human rights and their enforcement Each chapter is divided into four parts Abstracts Lecture Recommended Reading and Questions to check reader comprehension Sample answers are included at the end of the book
