

Meta-Paradigms in Nightingale's Nursing Philosophy

Topic: Health & Medicine | Words: 1397 | Pages: 6

The core concepts of metaparadigms of nursing are the person (patient), health, nursing, and environment (Zerwekh & Zerwekh Garneau, 2014). There are various nursing theories and philosophies, but the four metaparadigms are present in each of them. Every theorist outlines particular concepts and propositions in his/her own way. However, any nursing model incorporates the four major metaparadigms.

In Nightingale's environmental theory, the concept of person is defined as the "recipient of nursing care" (Zerwekh & Zerwekh Garneau, 2014, p. 51). Nightingale considered the person "the center of the model" and suggested an integrated approach to the person as someone combining "psychological, intellectual, and spiritual components" (Masters, 2017, p. 163). Virginia Henderson also views the person as the receiver of nursing care but extends the definition of the person by sociological and biological features (Zerwekh & Zerwekh Garneau, 2014). Jean Watson's theory defines the person as a "unity of mind – body – spirit/nature" (as cited in Zerwekh & Zerwekh Garneau, 2014, p. 54). Patricia Benner views the concept of person as an "embodies person" who is "self-interpreting" (as cited in Zerwekh & Zerwekh Garneau, 2014, p. 57). According to Benner, every person obtains a definite mission during his/her life and not at birth. Martha Rogers understands the person as an "energy field" (as cited in Zerwekh & Zerwekh Garneau, 2014, p. 58).

The concept of health is understood in Nightingale's theory as being well and employing all means of attaining wellness (Zerwekh & Zerwekh Garneau, 2014). Henderson's theory puts emphasis on the patient's

Collected Papers Volume 3: Early Papers on the Philosophy of Mind John-Michael Kuczynski, Papers on the philosophy of mind Topics include the relationship between linguistic and cognitive competence conceivability in relation to possibility simulated vs actual thought functionalism program causation in relation to mental causation the Turing Test the Language of Thought hypothesis and the nature of personal identity **Meta-metaphysics** Jiri Benovsky, 2016-03-22 Metaphysical theories are beautiful At the end of this book Jiri Benovsky defends the view that metaphysical theories possess aesthetic properties and that these play a crucial role when it comes to theory evaluation and theory choice Before we get there the philosophical path the author proposes to follow starts with three discussions of metaphysical equivalence Benovsky argues that there are cases of metaphysical equivalence cases of partial metaphysical equivalence as well as interesting cases of theories that are not equivalent Thus claims of metaphysical equivalence can only be raised locally The slogan is the best way to do meta metaphysics is to do first level metaphysics To do this work Benovsky focuses on the nature of primitives and on the role they play in each of the theories involved He emphasizes the utmost importance of primitives in the construction of metaphysical theories and in the subsequent evaluation of them He then raises the simple but complicated question how to make a choice between competing metaphysical theories If two theories are equivalent then perhaps we do not need to make a choice But what about all the other cases of non equivalent equally good theories Benovsky uses some of the theories discussed in the first part of the book as examples and examines some traditional meta theoretical criteria for theory choice various kinds of simplicity compatibility with physics compatibility with intuitions explanatory power internal consistency only to show that they do not allow us to make a choice But if the standard meta theoretical criteria cannot help us in deciding between competing non equivalent metaphysical theories how then shall we make that choice This is where Benovsky argues that metaphysical theories possess aesthetic properties grounded in non aesthetic properties and that these play a crucial role in theory choice and evaluation This view as well as all the meta metaphysical considerations discussed throughout the book then naturally lead the author to a form of anti realism and at the end of the journey he offers reasons to think better of the kind of anti realist view he proposes to embrace www.jiribenovsky.org **The Routledge Handbook of Metametaphysics** Ricki Bliss, J.T.M. Foundations for Metasemantics Daniel Cohnitz, Jussi Haukioja, 2025-07-02 Metasemantics studies the foundations of meaning asking what makes it the case that certain words have the meanings that they do But what makes metasemantic theories true This question has been all but ignored in philosophy of language In this book Cohnitz and Haukioja address this issue and argue that just as in metasemantics both internalist and externalist answers are available for this foundational question The authors introduce and defend meta internalism arguing that the foundations of reference and meaning are anchored in the individual dispositions and psychological states of language users offering an alternative to meta externalist views that would appeal to broader community based or otherwise external factors Meta internalism is moreover compatible with semantic externalism as usually understood and provides an explanation of why externalism is true Through a critical examination of prominent theories and thought experiments the book explores fundamental issues like reference failure conceptual engineering and the metaphysical implications of reference as well as the methodology of theories of reference With its focus on the foundations of metasemantics the book provides a fresh and empirically informed perspective on one of the core questions in the philosophy of language Foundations for Metasemantics is essential reading for philosophers scholars and students seeking to understand the underlying principles that support our theories of meaning and reference

The Mind's Provisions Vincent Descombes, 2021-08-10 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as L vi Strauss s work on the symbolic status of myths He identifies as incoherent both the belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind s collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France s finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology

Metaphilosophy as a Unified Discipline Michael Lewin, 2025-08-13 Since the 1960s the emerging discipline of metaphilosophy has been burdened by the problem of the philosophical preconditioning of metaphilosophical theories This issue is addressed through the epistemological framework of perspectivism It is demonstrated that a profound understanding of perspectivity can positively influence the quality of metaphilosophical research whose unity is only possible under the idea of a discourse oriented toward cross perspective integration from the outset **Collected Papers, Volume 1** Stephen Stich, 2011-09-09 This is the first of two volumes collecting articles by the distinguished philosopher Stephen Stich This volume collects the best and most influential essays that Stephen Stich has published in the last 40 years on topics in the philosophy of mind and the philosophy of language They discuss a wide range of topics including grammar innateness reference folk psychology eliminativism connectionism evolutionary psychology simulation theory social construction and psychopathology *Structuring Mind* Sebastian Watzl, 2017 What is attention How does attention shape consciousness In an approach that engages with foundational topics in the philosophy of mind the theory of action psychology and the neurosciences this book provides a unified and comprehensive answer to both questions Sebastian Watzl shows that attention is a central structural feature of the mind The first half of the book provides an account of the nature of attention Attention is prioritizing it consists in regulating priority structures Attention is not another element of the mind but constituted by structures that organize integrate and coordinate the parts of our mind Attention thus integrates the perceptual and intellectual the cognitive and motivational and the epistemic and practical The second half of the book concerns the relationship between attention and consciousness Watzl argues that attentional structure shapes consciousness
