John Grier Hibben

Philosophy Of The Enlightenment:

The Philosophy of the Enlightenment Ernst Cassirer, 1951 The present book aims to be both more and less than a monograph on the philosophy of the Enlightenment It is much less for the primary task of such monograph would be to offer the reader a wealth of detail and to trace the genesis and development of all the special problems of this philosophy The Philosophy of the Enlightenment John Grier Hibben, 1910 The Philosophy of the Enlightenment John Hibben, 2017-04-11 THE age of the Enlightenment has a peculiar interest and value for the student of the history of philosophy The philosophical output of this period is unusually rich and significant embracing as it does the classical writings of Locke Berkeley Hume Leibniz Rousseau and Kant and therefore may well be studied for the material which these separate contributions severally contain But more than this the eighteenth century philosophy is a period in which a great movement of thought is exhibited and that too on a large and conspicuous stage England France Germany form its settings It begins with Locke and is completed in Kant And whatever significance Kant may possess for the philosophical world to day attaches also to this period for this period served to open the way for the critical philosophy of the great master which is its appropriate culmination Moreover the practical influences of the philosophical discussions of this age are of such extent and importance as to engage the attention of the ordinary reader of history as well as that of the more special worker in the field of philosophy In England religious controversy political theory and moral standards were profoundly affected by the philosophical tendencies of the day in France the social and political doctrines became involved with the philosophical and they were not without a dominating influence upon the popular mind not only throughout the period preceding the French Revolution but also during the years of its progress as well in Germany the same tendencies manifested themselves in theological controversy on the one hand and in the quickening of poetical insight and interpretation on the other so that poets became philosophers and philosophers became poets The movement of philosophical thought in this age moreover is typical of great movements of thought generally and in this aspect is both illuminating and suggestive as a representative historical study The tendencies which here prevail the characteristic differences in point of view as well as the complementary relation of opposed opinions are all repeated again and again in the various political social religious moral and philosophical controversies which emerge through every significant period in the history of thought *Descartes and the Enlightenment* Peter A. Schouls, 1989 Peter Schouls examines the role played by the concepts of freedom mastery and progress in Descartes writings arguing that these ideas express a vital and fundamental feature of Descartes thought These theories also occupy a central position in the thought of the Enlightenment Since the more contentious claim is that they function centrally in Descartes works Schouls presents a careful and detailed examination of the conjunction and use of these ideas in Descartes writings This examination warrants the conclusion that they play the same role in Descartes works as they do in writings typical of the Enlightenment *An Answer to the Question* Immanuel Kant, 2009 First published in 1784 Kant's immortal essay is now a part of the

Smith,2014-07-08 The Age of Enlightenment has often been portrayed as a dogmatic period on account of the veritable worship of reason and progress that characterized Eighteenth Century thinkers Even today the philosophes are considered to have been completely dominated in their thinking by an optimism that leads to dogmatism and ultimately rationalism However on closer inspection such a conception seems untenable not only after careful study of the

impact of scepticism on numerous intellectual domains in the period but also as a result of a better understanding of the character of the Enlightenment As Giorgio Tonelli has rightly observed the Enlightenment was indeed the Age of Reason but one of the main tasks assigned to reason in that age was to set its own boundaries Thus given the growing number of works devoted to the scepticism of Enlightenment thinkers historians of philosophy have become increasingly aware of the role played by scepticism in the Eighteenth Century even in those places once thought to be most given to dogmatism especially Germany Nevertheless the deficiencies of current studies of Enlightenment scepticism are undeniable In taking up this question in particular the present volume which is entirely devoted to the scepticism of the Enlightenment in both its historical and geographical dimensions seeks to provide readers with a revaluation of the alleged decline of scepticism At the same time it attempts to resituate the Pyrrhonian heritage within its larger context and to recapture the fundamental issues at stake The aim is to construct an alternative conception of Enlightenment philosophy by means of philosophical modernity itself whose initial stages can be found herein
