Philosophy History And Problems:

Philosophy: History and Problems Samuel Enoch Stumpf, James Fieser, 2007-08-03 This text brings together Stumpf's and Fieser's *Socrates to Sartre and Beyond* with an updated anthology of readings in one volume. It offers an accessible historical survey of philosophical ideas and a wealth of primary source readings at an excellent value. The text is a comprehensive historically organized introduction to philosophy which communicates the richness of the discipline and provides the student with a working knowledge of the development of Western philosophy. With a lively and approachable style, it covers the principal contributions of Western civilization's most influential philosophers. The topically organized reader features a chronological organization within the topics and a wide selection of readings. Primarily a selection of Western philosophy, the fifth edition also includes classic Eastern philosophy texts. Philosophy Samuel E. Stumpf, 1994

Philosophy Samuel Enoch Stumpf, Associate Professor of Philosophy James Fieser, James Fieser, 2002-11 Features *Socrates to Sartre and Beyond* Seventh Edition and *Philosophical Problems* Fifth Edition. This work offers a historical survey of philosophical ideas as well as primary source readings. **Philosophy** Samuel Enoch Stumpf, 1971 Philosophy Samuel Enoch Stumpf, 1994 This volume brings together two of the author's leading texts: his historical survey of philosophical ideas *Socrates to Sartre* and his anthology *Philosophical Ideas*. This edition features new contributions in Book One and a new section on human destiny in Book Two. **Philosophy** Samuel Enoch Stumpf, James Fieser, 2003 This text brings together Stumpf's and Fieser's *SOCRATES TO SARTRE AND BEYOND* Seventh Edition 2003 and *PHILOSOPHICAL PROBLEMS* Fifth Edition 2003 in one hardcover volume. It offers an accessible historical survey of philosophical ideas and a wealth of primary source readings at an excellent value. *Philosophy*, 1971 *History and Class Consciousness* Georg Lukacs, 1972-11-15 This is the first time one of the most important of Lukacs' early theoretical writings published in Germany in 1923 has been made available in English. The book consists of a series of essays treating among other topics the definition of orthodox Marxism, the question of legality and illegality, Rosa Luxemburg as a Marxist, the changing function of historic Marxism, class consciousness, and the substantiation and consciousness of the Proletariat. Writing in 1968 on the occasion of the appearance of his collected works, Lukacs evaluated the influence of this book as follows: For the historical effect of *History and Class Consciousness* and also for the actuality of the present time, one problem is of decisive importance: alienation, which is here treated for the first time since Marx as the central question of a revolutionary critique of capitalism and whose historical as well as methodological origins are deeply rooted in Hegelian dialectic. It goes without saying that the problem was omnipresent. A few years after *History and Class Consciousness* was published, it was moved into the focus of philosophical discussion by Heidegger in his *Being and Time*, a place which it maintains to this day largely as a result of the position occupied by Sartre and his followers. The philologic question raised by L. Goldmann, who considered Heidegger's work partly as a polemic reply to my admittedly unnamed work, need not be discussed here. It suffices today to say that the problem was

in the air particularly if we analyze its background in detail in order to clarify its effect the mixture of Marxist and Existentialist thought processes which prevailed especially in France immediately after the Second World War In this connection priorities influences and so on are not particularly significant What is important is that the alienation of man was recognized and appreciated as the central problem of the time in which we live by bourgeois as well as proletarian by politically rightist and leftist thinkers Thus History and Class Consciousness exerted a profound effect in the circles of the youthful intelligentsia

Jacques Derrida and the Challenge of History Sean Gaston,2018-11-23 This important new book argues that Jacques Derrida s work can be treated as the basis for a distinctive historiography The possibility of seeing Derrida not as a philosopher of language but as a philosopher of history has become more apparent with the recent publication of Derrida s 1964 1965 seminar Heidegger The Question of Being and History We now know that the problem of history was at the heart of Derrida s writing in the mid 1960s prior to the publication of his best known work Of Grammatology 1967 Arguing that Derrida s scholarship in the 1960s and early 1970s on historicism historicity and the problem of history can be treated as the basis for a philosophy of history Sean Gaston focuses on Derrida s work from the mid 1970s to the mid 1990s and his relentless questioning of context memory and narrative as the delineation of a deconstructive historiography The book raises a challenge for historians to think about both deconstruction and historiography arguing that contemporary philosophy can provide a basis for thinking about history in the name of a deconstructive historiography that is not incompatible with rigorous historical scholarship

The Analysis of Virtue in Alasdair MacIntyre and His View of “The Enlightenment Project” Benjamin Okon MSP,2016-04-15 MacIntyre is greatly discontented with the nature of contemporary morality which according to him has a form i e what appears like morality but lacks essential content He argues that the most common feature of contemporary ethical discourse is that much of it is used to express individual preferences which leads to disagreements among philosophers and eventually results in debates that are interminable in character MacIntyre attributes the cause of this situation to the activities of the enlightenment philosophers of the 17th and 18th centuries who in an attempt to find rational justification for morality repudiated those essential elements that define the essence of morality and give it its contents Such elements include historical narrative tradition teleology and divine law In MacIntyres opinion morality so constructed was destined for failure since it was not founded on the true nature of the human person The obvious consequences of this failure were the birth of diverse post enlightenment ethical theories and a substantial change in the conception of virtue In order to remedy this deplorable condition of contemporary ethics MacIntyre along with other virtue ethicists advocates a certain renaissance of ethical principles that are founded on the true nature of the human person characterized by historical narrative tradition and teleology all grounded on divine legislation Morality thus reconstructed finds its fullest expression in the theory of human character traits i e virtues This is what has motivated MacIntyres construction of virtue theory which has brought him into confrontation with the enlightenment philosophers Our

study and analysis of MacIntyre's theory of virtue reveals that his account of virtue is inadequate. This inadequacy is what has motivated our own project of reconstructing MacIntyre's theory of virtue in view of offering an account of virtue that is adequate. In this way, our own project complements that of MacIntyre.

A Realist Theory of Art History Ian Verstegen, 2013-01-03. As the theoretical alignments within academia shift, this book introduces a surprising variety of realism to abolish the old positivist theory dichotomy that has haunted Art History. Demanding frankly the referential detachment of the objects under study, the book proposes a stratified multi-causal account of art history that addresses postmodern concerns while saving it from its errors of self-refutation. Building from the very basic distinction between intransitive being and transitive knowing, objects can be affirmed as real while our knowledge of them is held to be fallible. Several focused chapters address basic problems while introducing philosophical reflection into art history. These include basic ontological distinctions between society and culture, general and special history, the discontinuity of cultural objects, the importance of definition for special history, scales, facets, and fiat objects as forms of historical structure, the nature of evidence and proof, historical truth and controversies. Stressing Critical Realism as the stratified multi-causal approach needed for productive research today in the academy, this book creates the subject of the ontology of art history.

and sets aside a theoretical space for metaphysical reflection thus clarifying the usually muddy distinction between theory methodology and historiography in art history
