Philosophy Literary And Conceptual:

Adorno's Aesthetics as a Literary Theory of Art Mario Farina, 2020-06-23 This book re-examines Adorno's aesthetics developing a new literary approach that aims to unveil hidden elements of Adorno's thought. Farina proposes to read Adorno's aesthetics as a literary theory of art showing its efficacy in its comprehension of the most advanced trends of contemporary literature. As a result, this book provides an image of Adorno's aesthetics as a complete, satisfying and consistent philosophy of literature, a robust theory which is able to stand its ground in contemporary aesthetic debate. Challenging the prevalent prejudice that defines Adorno's thought and especially his aesthetics as modernist, Farina argues that Adorno's philosophy of literature shows its value precisely in its application to and comprehension of postmodern literature such as the works of Thomas Pynchon, Don DeLillo and David Foster Wallace. Precise and compelling, this book provides a new paradigm for understanding Adorno's theory of artwork, serving as an essential reference for researches investigating the relation between classical critical theory and contemporary art.

Deleuze, Philosophy and the Creation of Concepts Axel Cherniavsky, 2024-11-30 One feature of Gilles Deleuze's philosophy is its effort to establish connections with other disciplines and to appeal to non-philosophers. However, Deleuze never establishes these connections without a constant and unconditional reaffirmation of the uniqueness of philosophy. How does he conceive of philosophy? What are its elements? What are its methods? How is philosophy connected to other fields of knowledge and other activities? Axel Cherniavsky provides an answer to these questions by analysing the definition of philosophy. Deleuze gives throughout his entire oeuvre creation of concepts. Through this analysis, you will discover a reconstruction of a creative

methodology a detailed theory of the philosophical concept a reflection on interdisciplinarity and altogether one of the most precise and systematic conceptions that philosophy has ever given of itself

Erasmus and Philosophy. On

the Concept of Philosophy Developed by Erasmus of Rotterdam Juliusz Domański, 2024-07-29 Erasmus of Rotterdam is

not typically associated with the discipline of philosophy Yet he would himself employ the category of philosophia Christi in

the sense of authentic Christianity which had not been contaminated by the abstractness and pedanticism of paganized

mediaeval scholasticism Does this reveal a contrarian attitude to philosophy in general or rather a special understanding of

what a true philosophy as a way of life should be This study attempts to answer this question by assembling and closely

studying from Erasmus extensive oeuvre his scant and occasional remarks on the concept of philosophy

Philosophy

Burton Frederick Porter,1980 *The End of Literary Theory* Stein Haugom Olsen,1987-03-19 The essays in this collection are concerned with the philosophical problems that arise in connection with the understanding and evaluation of literature such problems as the relationship between the work and the author authorial intention between the work and the world reference and truth the definition of a literary work and the nature of literary theory itself Professor Olsen attacks many of the orthodoxies of modern literary theory in particular the enterprise to build a comprehensive systematic literary theory His own work is informed by a consistent perspective the assumption that literature is a social institution governed by conventions and that answers to problems of interpretation and appreciation can be found only through an analysis of these conventions This is an important book for scholars and students of literary theory and philosophy especially for those who see an ever increasing cross fertilization between the two disciplines *Philosophical Conceptualization and Literary Art* Phillip Stambovsky,2004 In sum this original inquiry uniquely respects the cognitional diversity that distinguishes the revelatory poetic spirit from the discursively speculative spirit even as it demonstrates their deep affinities and mutual implications in the life of the imaginative intelligence BOOK JACKET **The Concept of Literary Application** Anders Pettersson,2012-09-18 Application is the process in which readers of literature focus on elements in a text and compare them with the outside world as they know it an operation with cognitive and emotional consequences This book demonstrates how and why this simple yet neglected mechanism is of profound importance for the understanding of literary art and experience

Philosophy, a Literary and Conceptual Approach Burton Frederick Porter, 1980

[The Japanese Ideology](#) Tosaka Jun, 2024-09-17 A major Marxist thinker and critic in 1930s Japan, Tosaka Jun was among the world's most incisive yet underrecognized theorists of capitalism, fascism, and ideology during the years before World War II. *The Japanese Ideology* is his masterpiece, first published in 1935 as Japan and the world plummeted into an age of reaction. Tosaka offers a ruthless philosophical critique of contemporary ideology that exposes liberalism's deep complicity with fascism. *The Japanese Ideology* provides a materialist analysis of the reactionary ideology then overtaking Japan with profound significance for anywhere fascism has taken root. Modeled after Marx and Engels's *The German Ideology*, it critiques idealism as the common ground for liberalism and fascism against which only historical materialism can suffice. Tosaka demonstrates how liberal and fascist ideas at once justified and concealed Japan's colonization of East Asia, and he investigates the many traces of fascism in Japanese thought and society. *The Japanese Ideology* makes an important intervention in Marxist theory by criticizing reliance on the East-West binary and the notion of the Asiatic mode of production. Robert Stolz's translation introduces Anglophone readers to a classic of twentieth-century Marxist thought by an unsung peer of Gramsci and Benjamin with striking relevance today.

[The Concept of World from Kant to Derrida](#) Sean Gaston, 2013-09-20 In the mid-eighteenth-century metaphysics was broadly understood as the study of three areas of philosophical thought: theology, psychology, and cosmology. This book examines the fortunes of the third of these formidable metaphysical concepts, the world. Sean Gaston provides a clear and concise account of the concept of world from the mid-eighteenth century to the end of the twentieth century, exploring its possibilities and limitations and engaging with current issues in politics and ecology. He focuses on the work of five principal thinkers: Kant, Hegel, Husserl, Heidegger, and Derrida, all of whom attempt to establish new grounds for seeing the world as a whole. Gaston presents a critique of the self-evident use of the concept of world in philosophy and asks whether one can move beyond the need for a world-like vantage point to maintain a concept of world. From Kant to the present day, this concept has been a problem for philosophy, and it remains to be seen if we need a new Copernican revolution when it comes to the concept of world.

[Barbarian: Explorations of a Western Concept in Theory, Literature, and the Arts](#) Markus Winkler, 2018-08-31 This two-volume co-authored study explores the history of the concept barbarism from the 18th century to the present and illuminates its foundational role in modern European and Western identity. It constitutes an original comparative interdisciplinary exploration of the concept's modern European and Western history with emphasis on the role of literature in the concept's shifting functions. The study contributes to a historically grounded understanding of this figure's past and contemporary uses. It combines overviews with detailed analyses of representative works of literature, art,
