Buckareff,2009 Broadly characterized the philosophy of action encompasses a host of problems about the nature and scope of human action and agency including but not limited to intention and intentional action the ontology of action reason explanations of action motivation and practical reason free will and moral responsibility mental agency social action controlling attitudes akrasia and enkrasia and many other issues Philosophy of Action 5 Questions is a collection of short interviews based on 5 questions presented to some of the most influential and prominent scholars in this philosophical field We hear their views on philosophy of action its aim scope use the future and how their work fits in these respects *Action Reconceptualized* David K. Chan,2016-05-11 The concept of action that requires philosophical analysis is one that concerns behavior characteristically found in humans In *Action Reconceptualized Human Agency and Its Sources* David K Chan examines the sources of human agency that are proposed in causal theories of action namely desire intention and trying and distinguishes them from each other in terms of their roles in practical reasoning and motivation He conceptualizes them in relation to each other in a way that is consistent and useful for answering a number of questions that are central to the philosophy of action The action theory in this book addresses the need to understand human agency for its own sake but it also serves another purpose When the philosopher Elizabeth Anscombe stressed the need to do philosophy of action before doing ethical theory what she meant was that moral philosophers should first work out a proper account of the relationship between the inner states of a person and the actions that she performs This book provides such an account and makes the case that it is desire rather than intention that is the basis for the ethical evaluation of an agent *Action Reconceptualized* will be of particular interest to students and scholars doing research in action theory and ethics as well as to those working outside of philosophy in psychology and cognitive science *The Philosophy of Action* Carlos J. Moya,1990 This new textbook is an exceptionally clear and concise introduction to the philosophy of action suitable for students interested in the philosophy of mind and the philosophy of social sciences *Philosophy of Action Reconceptualized* David K. Chan,2016-05-11 The concept of action that

requires philosophical analysis is one that concerns behavior characteristically found in humans In *Action Reconceptualized Human Agency and Its Sources* David K Chan examines the sources of human agency that are proposed in causal theories of action namely desire intention and trying and distinguishes them from each other in terms of their roles in practical reasoning and motivation He conceptualizes them in relation to each other in a way that is consistent and useful for answering a number of questions that are central to the philosophy of action The action theory in this book addresses the need to understand human agency for its own sake but it also serves another purpose When the philosopher Elizabeth Anscombe stressed the need to do philosophy of action before doing ethical theory what she meant was that moral philosophers should first work out a proper account of the relationship between the inner states of a person and the actions that she performs This book provides such an account and makes the case that it is desire rather than intention that is the basis for the ethical evaluation of an agent *Action Reconceptualized* will be of particular interest to students and scholars doing research in action theory and ethics as well as to those working outside of philosophy in psychology and cognitive science

Action Theory M. Brand, Douglas Walton, 1976-09-30 Proceedings of the Winnipeg Conference on Human Action held at Winnipeg Manitoba Canada 9 11 May 1975 *Philosophy of Action* Lilian O'Brien, 2016-04-30 Accessible and wide ranging this introduction to contemporary Philosophy of Action guides the reader through the major views and arguments The topics addressed include the nature of intentional action and its explanation the nature of reasons the role of desire and intention in action the nature of autonomy and the possibility of group agents

Advances in Experimental Philosophy of Action Paul Henne, Samuel Murray, 2023-04-20 What is self control Does a person need to be conscious to act Are delusions always irrational Questions such as these are fundamental for investigations into action and rationality as well as how we assign responsibility for wrongdoing and assess clinical symptoms Bridging the gap between philosophy and psychology this interdisciplinary collection showcases how empirical research informs and enriches core questions in the philosophy of action Exploring issues such as truth moral judgement agency consciousness and cognitive control chapters offer an overview of the current state of research present new empirical findings and identify where future experimental work can further advance the frontier between philosophy and psychology This is an essential resource for anyone looking to better understand how science and philosophy can meaningfully inform our knowledge of human agency

Intentionality, Deliberation and Autonomy Mr Sandro Nannini, Professor Christoph Lumer, 2012-10-01 Many important thinkers in the philosophical tradition like Aristotle or Hume have used an explicit theory of action as the basis of their respective normative theories of practical rationality and morality The idea behind this architecture of theories is that action theory can inform us about the origin bonds reach and limits of practical reason The aim of this book is to revive this direct connection between action theory and practical philosophy in particular to provide systematic action theoretical underpinnings for the discussion about the normative structure of practical reason This book brings together a collection of specially commissioned essays

from internationally prestigious scholars in the field and represents the state of the art in contemporary philosophy of action. The book is divided into three parts: i conceptual work about what actions intentions and intentional actions are ii empirical theory of practical deliberation and iii theories about the action theoretic features of autonomy. The volume significantly advances these three lines of research and offers important new contributions to each of them. *Life and Action* Michael Thompson, 2012-03-05. Any sound practical philosophy must be clear on practical concepts concepts in particular of life action and practice. This clarity is Michael Thompson's aim in his ambitious work. In Thompson's view failure to comprehend the structures of thought and judgment expressed in these concepts has disfigured modern moral philosophy rendering it incapable of addressing the larger questions that should be its focus. In three investigations Thompson considers life action and practice successively attempting to exhibit these interrelated concepts as pure categories of thought and to show how a proper exposition of them must be Aristotelian in character. He contends that the pure character of these categories and the Aristotelian forms of reflection necessary to grasp them are systematically obscured by modern theoretical philosophy which thus blocks the way to the renewal of practical philosophy. His work recovers the possibility within the tradition of analytic philosophy of hazarding powerful generalities and of focusing on the larger issues like life that have the power to revive philosophy. As an attempt to relocate crucial concepts from moral philosophy and the theory of action into what might be called the metaphysics of life this original work promises to reconfigure a whole sector of philosophy. It is a work that any student of contemporary philosophy must grapple with. *Tadeusz Kotarbiński's Action Theory* Piotr Tomasz Makowski, 2016-11-30. The book introduces Tadeusz Kotarbiński's philosophy of action into the mainstream of contemporary action theoretical debates. Piotr Makowski shows that Kotarbiński Alfred Tarski's teacher and one of the most important philosophers of the renowned Lvov-Warsaw school proposed a groundbreaking original and in at least a few respects still fresh perspective in action theorizing. The book examines and develops Kotarbiński's ideas in the context of the most recent discussions in the philosophy of action. The main idea behind Kotarbiński's action theory and thus behind this book is the significance of the philosophical investigations of the general conditions of effectiveness efficiency and economy of intentional actions. Makowski presents and reinterprets Kotarbiński's views on these dimensions of our activities and sheds new light on the most important areas of action theory. **Theories of Action and Morality** Mark Alznauer, José M. Torralba, 2016-02-01. Die in diesem Band versammelten Essays erörtern die Frage nach der Möglichkeit des Verstehens menschlichen Handelns ohne den Rückbezug auf moralische Werte und Normen. Obwohl die Autoren sich dieser Frage auf ganz unterschiedliche manchmal divergierende Weisen nähern verbindet sie alle die Annahme es sei nicht wünschenswert oder sogar inkohärent das menschliche Handeln grundsätzlich unabhängig von moralischen Werten zu betrachten. Die Herausgeber haben sich um eine für Philosophen und Gesellschaftswissenschaftler gleichermaßen attraktive Beitragssammlung bemüht. Die Verknüpfung philosophischer und soziologischer Perspektiven könnte zur Klärung gegenseitiger

Missverständnisse beitragen die aufgrund eines mangelhaften Dialogs zwischen der philosophischen und soziologischen Handlungstheorie erwachsen sind In diesem Band enthalten sind Essays von Terry Pinkard Sebastian Röl Dieter Schönecker Ana Marta González John Levi Martin Alejandro N. García Martínez Sophie Djigo Teresa Enríquez und Evgenia Mylonaki The essays in this volume address the question of whether we can understand human action without reference to moral norms or values Although the authors approach this question in different and sometimes even incompatible ways they are united in thinking that it is undesirable or even incoherent to treat human agency as if it were conceptually independent of value questions The editors have attempted to invite contributions that would be interesting to both philosophers and social theorists The conjunction of philosophic and sociological perspectives might help to overcome some of the mutual misunderstandings that have been fostered by a lack of dialogue between the philosophic and sociological action theory The volume includes essays by Terry Pinkard Sebastian Röl Dieter Schönecker Ana Marta González John Levi Martin Alejandro N. García Martínez Sophie Djigo Teresa Enríquez and Evgenia Mylonaki

Analytical Philosophy of Action Arthur C. Danto, 2009-07-30 A study of the philosophical problems associated with the concept of action Professor Danto is concerned to isolate logically the notion of a basic action and to examine the way in which context and intention for example can convert physiological movements into significant actions He finds many suggestive parallels between the concepts the logical architecture of action and cognition and in developing this theme he becomes involved in and proposes new approaches to various long standing problems connected with causality determinism and materialism As in his earlier books *Analytical Philosophy of History* and *Analytical Philosophy of Knowledge* Professor Danto places the discussion in a broad historical and philosophical perspective and brings to it a wide reading and an unusual range of interests He is always prepared to venture novel ideas to stimulate further debate and research and the book as a whole is presented as an original contribution to a subject which is attracting increasing attention from philosophers and from psychologists with an interest in the conceptual assumptions behind their work
