*Art Botany in British Design Reform, 1835-1865* Sarah Alford, 2024-11-14 Drawing on the fields of design history and the history of science this book examines the important role that botanical science played in the emergence of Victorian design theory In early 19th century Britain a rapid influx of plants from other countries began to confuse the orders of classification As these new specimens arrived in nurseries and conservatories botanists revised and promoted a new taxonomy the Natural System In parallel in 1835 British manufacturers faced a government inquiry in order to improve the output of the British design industry They needed a nationally identifiable design aesthetic and the inquiry led to the creation of the Government Schools of Design and the Design Reform movement This book explores how whilst botanists used drawings to clarify new systems of plant classification designers learnt art botany the practice of basing decorative form and ornament on the hidden natural laws that govern plant growth and structure Design reformers used botany as a model for how to create and identify what is new and incorporate it into what was already familiar and meaningful all within the purview of developing a professional field of practice Sarah Alford provides a rich interdisciplinary study of how the fields of design and botanical science came together Through a framework of material culture Alford sheds new light on the work of leading botanists designers and illustrators such as Sarah Drake John Lindley Richard Redgrave Owen Jones and Christopher Dresser This book reveals how the designation of what design reformers deemed appropriate for the surface decoration of material structures as varied as

carpets jugs wallpaper and furniture was an embrace of botanical science as a source of fantasy and imagination

*Introduction to a Negative Approach to Argumentation* Julio Cabrera, 2019-10-25 This work deals with argumentation in philosophy In the affirmative view of argumentation each party thinks it is right while all other positions are wrong argumentation is seen as guided by a set of rules that should lead to the resolution of the dispute in favor of one party This book advances a critique of such an approach proposing instead a negative one the central idea of which is that each party organizes the elements of the problem concerning the definition of terms the assumptions to be accepted and the types of logical resources being used The negative approach attempts to modify the ethics of philosophical discussions moving towards pluralism a diversity of perspectives and the capacity to adopt a panoramic view where one's own posture appears only as one among others Argumentation is a ubiquitous matter professionals of all areas will have to argue to support their positions in diplomacy medicine or religion and in everyday life In any of these contexts the distinction between an

affirmative and a negative approach to argumentation matters The book will particularly appeal to graduate and postgraduate students in philosophy psychology pedagogy and communication as well as the general reader interested in philosophy
