This book examines Gregory Palamas perspective on light applying the metaphysics of light framework introduced by Clemens Baeumker and adapting it to propose a new theoretical approach to Palamas thought It explores Palamas understanding of light addressing its ontological epistemological and transformative aspects which he articulates through the integration of scriptural exegesis and the direct experiences of monastic prayer The analysis covers Palamas key concepts from the essence energy distinction to the potential for experiencing the divine through the body in this life The book situates Palamas thought both within its historical context and the broader field of metaphysics providing a philosophical perspective This meticulous study invites readers interested in the intersections of Byzantine theology philosophy and metaphysics offering a comprehensive examination of a system that challenges conventional views on corporeality and finitude     **Book Catalogues** ,1860
