Proceedings of the Boston Area Colloquium in Ancient Philosophy, Volume XV, 1999 John J. Cleary, Gary M. Gurtler, 2000-05-01 Most of the colloquia explore important topics such as the notion of self in Plato and the relationship between sense and knowledge in Aristotle In addition two colloquia discuss the origins of Pyrrhonic scepticism and the themes of Seneca's Natural Questions This publication has also been published in hardback please click here for details

[Margaret Macdonald and Analytic Philosophy in the 1930s](#) Michael Kremer, Cheryl Misak, 2025-08-19 This volume examines the important but until recently forgotten work of the British analytic philosopher Margaret Macdonald Macdonald's career spanned one of the most significant and fascinating periods in the history of analytic philosophy the pre war London of Susan Stebbing as she advanced philosophical analysis the Cambridge of Ludwig Wittgenstein as he lectured on his new practice centred philosophy the Oxford of Gilbert Ryle and ordinary language philosophy and the post war London of A J Ayer as he defended a version of logical positivism In this predominantly male elite world Macdonald was an anomaly a woman abandoned as a child raised by foster parents and in an orphanage poor for much of her life Remarkably she made a highly respected academic life for herself A talented philosopher she was a major influence on Ryle and one of those few who really understood Wittgenstein during the 1930s She also helped found and later edited the journal *Analysis* and was a serious scholar of C S Peirce introducing his complex work to her British colleagues Cheryl Misak and Michael Kremer provide a biographical essay a transcription of a no longer accessible paper on Peirce an essay on Macdonald as a scholar of pragmatism and an essay on her as a scholar of Wittgenstein The centrepiece is a set of letters from Macdonald to Max Black written between 1932 and 1937 a crucial time for the development of the analytic school embracing Cambridge analysis Viennese logical positivism Oxford linguistic philosophy and American pragmatism and neo realism The letters shed light on the cultural social and political situation in Britain in the 1930s and its impact on academic life revealing that against the mighty obstacles stacked against them some women in English philosophy before World War II were able to carve out paths as professional philosophers **Logical Empiricism and the Physical Sciences** Sebastian Lutz, Adam Tamas

Tuboly, 2021-04-26 This volume has two primary aims to trace the traditions and changes in methods concepts and ideas that brought forth the logical empiricists philosophy of physics and to present and analyze the logical empiricists various and occasionally contrary ideas about the physical sciences and their philosophical relevance These original chapters discuss these developments in their original contexts and social and institutional environments thus showing the various fruitful conceptions and philosophies behind the history of 20th century philosophy of science Logical Empiricism and the Natural

Sciences is divided into three thematic sections Part I surveys the influences on logical empiricism's philosophy of science and physics It features chapters on Maxwell's role in the worldview of logical empiricism on Reichenbach's account of objectivity on the impact of Poincaré on Neurath's early views on scientific method Frank's exchanges with Einstein about philosophy of physics and on the forgotten role of Kurt Grelling Part II focuses on specific physical theories including Carnap's and Reichenbach's positions on Einstein's theory of general relativity Reichenbach's critique of unified field theory and the logical empiricists' reactions to quantum mechanics The third and final group of chapters widens the scope to philosophy of science and physics in general It includes contributions on von Mises' frequentism Frank's account of concept formation and confirmation and the interrelations between Nagel's Feigl's and Hempel's versions of logical empiricism This book offers a comprehensive account of the logical empiricists' philosophy of physics It is a valuable resource for researchers interested in the history and philosophy of science philosophy of physics and the history of analytic philosophy **The Journal of**

Kistler, 2006-09-27 What is a causal relation Laws of nature and universal generalisations Applicability conditions and the concept of strict law Consequences The nomological theory of causation and causal responsibility Efficacious properties and the instantiation of laws Causal responsibility and its applications **Emergence** Mariusz Tabaczek, 2019-07-25 Over the last several decades the theories of emergence and downward causation have become arguably the most popular conceptual tools in scientific and philosophical attempts to explain the nature and character of global organization observed in various biological phenomena from individual cell organization to ecological systems The theory of emergence acknowledges the reality of layered strata or levels of systems which are consequences of the appearance of an interacting range of novel qualities A closer analysis of emergentism however reveals a number of philosophical problems facing this theory In *Emergence* Mariusz Tabaczek offers a thorough analysis of these problems and a constructive proposal of a new metaphysical foundation for both the classic downward causation based and the new dynamical depth accounts of emergence theory developed by Terrence Deacon Tabaczek suggests ways in which both theoretical models of emergentism can be grounded in the classical and the new dispositionalist versions of Aristotelianism This book will have an eager audience in metaphysicians working both in the analytic and the Thomistic traditions as well as philosophers of science and biology interested in emergence theory and causation *Experience, Reality, and Scientific Explanation* Maria Carla Galavotti, A. Pagnini, 2013-03-09 The papers collected here comprise the proceedings of a Workshop in honor of Merrill E. and Wes Salmon held in Florence on May 17-18 1996 The aim of the meeting was to pay homage to these two American scholars whose contact with Italian and European Universities and Institutes had a major influence on Continental thought in the field of

epistemology and probability In fact Merrilee and Wes spent various periods lecturing at the Universities of Bologna Florence Rome Trieste Catania and Pisa as well as in the University of Constance where they helped to build a strong cultural bridge with the Pittsburgh Center for the Philosophy of Science The Florence Center for the History and Philosophy of Science is particularly thankful to the Salmons for their ongoing cooperation and frequent visits We must not forget that Wes Salmon was in the Florence Center and at the Philosophy Department of Florence as visiting scholar on many occasions and that he made important contributions which have later appeared in Italian journals such as *Iride* and *Rivista di filosofia* Merrilee was a speaker at the Conference on Genetics Linguistics and Archaeology May 20-24 1991 organized by the Florence Center Both Wes and Merrilee often enlivened the arguments of the initiatives they took part in **Toy Medium** Daniel

Tiffany, 2000-03-08 In this bold speculative and immensely learned study Tiffany's concept of lyric substance the sense of materiality supplied to us by poets like Wallace Stevens and Marianne Moore constitutes a world whose inaccessibility is legitimized by the principles of scientific materialism Thus lyric too long on the periphery of materialist discourse emerges as being squarely in its center Marjorie Perloff Stanford University author of *The Futurist Moment* and Wittgenstein's Ladder A lyrical inquiry into the circle of ideas materialism science poetics Winding through the whole is a fascinating exploration of toys children's toys physicists toy models philosophers robots nuclear weaponeers toy towns My hope is that this book will contribute to a growing interest not in cleaving science from the arts but rather in exploring poetically the language images and things that illuminate both Peter Galison Mallinckrodt Professor of the History of Science and Physics Harvard University A brilliant achievement synthesizing the history of science and poetics technology and the arts in an iconology of materialism All that is solid melts into air in this book but just as quickly the airy poems of our climate condense into material objective forms weird gadgets and objects of scientific research A wonderful feast of learning and wit W J T Mitchell University of Chicago author of *Picture Theory* and *Iconology* In clear-eyed and gorgeous prose *Toy Medium* moves the question of Art's encounter with Science to an utterly original point of conflagration where matter is mostly not matter Going to the bottom of the Imagination where it still truly involves images Tiffany explores how we have learned to see the inscrutable via our imagistic grasp of materiality This book is daring brilliant and deeply clever Jorie Graham Boylston Professor of English Harvard University author of *Materialism* and winner of the Pulitzer Prize *University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles* University of California (System). Miller, 2014-01-01 In this book a breakdown of the life and work of some of history's pioneers in the study of chemistry are thoroughly explored This biographical view provides excellent sketches for trailblazers in the area of chemistry Articles are devoted to specific scientists covering their contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience Most importantly this book provides a chapter specifically

devoted to the top scientific contributors of the 21st century bringing readers current with both timely events and successes that have moved human kind forward Physical science and physical reality Louis Osgood Kattsoff,2013-11-11 **Free Will** D J O'Connor,1972-01-01 **Life and Action** Michael Thompson,2012-03-05 Any sound practical philosophy must be clear on practical concepts concepts in particular of life action and practice This clarity is Michael Thompson s aim in his ambitious work In Thompson s view failure to comprehend the structures of thought and judgment expressed in these concepts has disfigured modern moral philosophy rendering it incapable of addressing the larger questions that should be its focus In three investigations Thompson considers life action and practice successively attempting to exhibit these interrelated concepts as pure categories of thought and to show how a proper exposition of them must be Aristotelian in character He contends that the pure character of these categories and the Aristotelian forms of reflection necessary to grasp them are systematically obscured by modern theoretical philosophy which thus blocks the way to the renewal of practical philosophy His work recovers the possibility within the tradition of analytic philosophy of hazarding powerful generalities and of focusing on the larger issues like life that have the power to revive philosophy As an attempt to relocate crucial concepts from moral philosophy and the theory of action into what might be called the metaphysics of life this original work promises to reconfigure a whole sector of philosophy It is a work that any student of contemporary philosophy must grapple with

The Modern Schoolman ,1966 One Hundred Twentieth-Century Philosophers Stuart Brown,Diane Collinson,Dr Robert Wilkinson,Robert Wilkinson,2008-02-20 One Hundred Twentieth Century Philosophers offers biographical information and critical analysis of the life work and impact of some of the most significant figures in philosophy this century Taken from the acclaimed Biographical Dictionary of Twentieth Century Philosophers the 100 entries are alphabetically organised from Adorno to Zhang Binglin and cover individuals from both continental and analytic philosophy The entries have an identical four part structure making it easy to compare and contrast information comprising biographical details a bibliography of major works a listing of relevant secondary and critical literature an appraisal of the philosopher s thoughts and achievements A separate glossary provides an introduction to the origins development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research Arguments and Metaphors in Philosophy Daniel Cohen,2004-02-21 In this book Daniel Cohen explores the connections between arguments and metaphors most pronounced in philosophy because philosophical discourse is both thoroughly metaphorical and replete with argumentation Cohen covers the nature of arguments their modes and structures and the principles of their evaluation and addresses the nature of metaphors their place in language and thought and their connections to arguments identifying and reconciling arguments and metaphors respective roles in philosophy **Historical Epistemology and European Philosophy of Science** Fabio Minazzi,2022-04-01 This book offers a comprehensive analysis on the evolution of philosophy of science with a special emphasis on the European tradition of the twentieth century At first it shows how the

epistemological problem of the objectivity of knowledge and axiomatic knowledge have been previously tackled by transcendentalism critical rationalism and hermeneutics In turn it analyses the axiological dimension of scientific research moving from traditional model of science and of scientific methods to the construction of a new image of knowledge that leverages the philosophical tradition of the Milan School Using this historical epistemological approach the author rethinks the Kantian Transcendental showing how it could be better integrated in the current philosophy of science to answer important questions such as the relationship between science and history scientific and social perspectives and philosophy and technology among others Not only this book provides a comprehensive study of the evolution of European Philosophy of Science in the twentieth century yet it offers a new historical and epistemological based approach that could be used to answers many urgent questions of contemporary societies
