

WHAT IS THE UNDERLYING PHILOSOPHY OF THE AUSTRIAN SCHOOL?

HOW HAS THE AUSTRIAN SCHOOL CONTRIBUTED TO THE DEBATE ON OPTIMUM POLITICAL ORDER?

In contrast to most existing literature, *The Philosophy of the Austrian School* presents a philosophically-grounded account of the School's methodological, political and economic ideas. While acknowledging important differences between the key figures in the School – Menger, Mises and Hayek – Raimondo Cubeddu finds that they also have significant things in common. Paramount amongst these are theories of subjective value and notions of spontaneous order, both of which rest on theories of the limits of human knowledge. Taken together this body of theory constitutes one of the most seminal avenues of research in the social sciences and a major reformulation of liberal ideology.

Raimondo Cubeddu is Associate Professor of Political Philosophy at the Scuola Superiore di Studi Universitari e di Perfezionamento Sant'Anna, Pisa. In addition to numerous essays on the Austrian School, he has published works on Popper, Pareto, Leo Strauss and the political philosophy of the Vienna Circle.

Was Ludwig von Mises a Conventionalist? Alexander Linsbichler, 2017-06-08 This book presents a concise introduction to the epistemology and methodology of the Austrian School of economics as defended by Ludwig von Mises The author provides an innovative interpretation of Mises arguments in favour of the a priori truth of praxeology the received view of which contributed to the academic marginalisation of the Austrian School The study puts forward a unique argument that Mises perhaps unintentionally defends a form of conventionalism Chapters in the book include detailed discussions of individualism historicism epistemological positions and essentialism The author goes on to discuss Mises justification of the fundamental axiom and proposes a conventionalist interpretation By presenting praxeology as a conventionalist research programme the author aims to reinvigorate the interaction between the Austrian School mainstream economics and the philosophy of science This comprehensive reconstruction is suitable for economists interested in the history and philosophy of their discipline as well as for philosophers of science

[The Philosophical Origins of Austrian Economics](#) David Gordon, 1994 The Austrian School of economics arose in opposition to the German Historical School and Carl Menger developed his methodological views in combat with the rival group Gordon discusses the philosophical doctrines of the Historical School and examines some of the philosophical influences on the founders of the Austrian School This monograph was prepared from a transcript of a talk Dr Gordon gave at the Mises University summer program at Stanford University 1994 The informal style of an oral presentation has been retained here The text has been edited expanded and lightly documented from Mises Institute website

Austrian Philosophy Barry Smith, 1994 When Franz Brentano introduced the concept of intentionality into modern philosophy he initiated a revolution in philosophical thinking whose effects are still being felt not least in contemporary developments in the field of cognitive science Barry Smith's *Austrian Philosophy The Legacy of Franz Brentano* is the first extensive study of the philosophy of the Brentano school The Brentanian philosophy is oriented towards the problem of mental directedness of how mind relates to objects Thus in working out their theories of objects the Brentanian philosophers in contrast to Frege and his successors in the analytic movement did not abandon psychological concerns in favor of an orientation towards language Rather their investigations in ontology proceeded always in tandem with work on the cognitive processes in which objects are experienced In thus spanning the gulf between psychology and ontology the Brentano school gave rise to movements of thought such as phenomenology and Gestalt psychology the term Gestalt was introduced as a technical term of philosophy by Brentano's student Ehrenfels The Brentanists enjoyed close relations with Carl Menger and other early members of the Austrian school of economics and *Austrian Philosophy* contains a detailed study of the interconnections between their work on the general theory of value and

subjective theories of value developed in the economic sphere Brentano's student Kasimir Twardowski initiated the rich tradition of scientifically and logically oriented philosophy in Poland and the role of Brentanianism in Polish philosophy and especially in the development of Lesniewski's mereology is here for the first time subjected to extended historical treatment Another Brentano student Carl Stumpf was responsible for introducing into philosophy the technical term *Sachverhalt* or state of affairs and the associated doctrine of realism in logic too is shown to have been a special preserve of the Brentano movement on the continent of Europe In setting out the ways in which Brentanian philosophers crucially influenced the development of scientific philosophy in Central Europe around the turn of the century Barry Smith's ambitious new work provides a detailed survey of developments in Austrian philosophy in its classical period from the 1870s to the Anschluss in 1938

Corporate Capitalism and Political

Philosophy Suman Gupta, 2001-12-20 Corporate capitalism is usually examined from a sociological or economic viewpoint and this book breaks new ground in providing a thorough account of the mechanisms which define it from a philosophical perspective revealing how these processes determine the way we live today Marxist and other left oriented political philosophies had ideological roots that were based sometimes incongruously on particular economic and sociological readings of the capitalist process Political philosophies associated with conservatism and neoliberalism have either been assimilated within capitalist discourses or they have been designed to justify corporate capitalist processes This book re-examines these issues with an unusually dispassionate approach providing a systematic view of contemporary corporate capitalism in all its complexity without expecting the reader to have a specialist knowledge of sociology or economics It clarifies the scope of political philosophy by reflecting on its own methodology and practice and offers a controversial conclusion that within contemporary corporate capitalist modes of organisation there is actually no space left for political philosophy at all as corporate capitalism systematically denies all political agents an ability to exercise their political will

Zen and Philosophy Michiko Yusa, 2002-03-31 This is the definitive work on the first and greatest of Japan's twentieth century philosophers Nishida Kitaro 1870-1945 Interspersed throughout the narrative of Nishida's life and thought is a generous selection of the philosopher's own essays letters and short presentations newly translated into English Hayek's *Social and Economic Philosophy* Norman P. Barry, 1979-06-17 Philosophy and Ideology Z.A. Jordan, 2012-12-06 The

purpose of this study is to describe the development of philosophy in Poland since the end of the Second World War and the development of Marxist Leninist philosophy which owing to international political events has assumed an important role in the intellectual life of contemporary Poland. This task could not have been accomplished without relating post war developments to those of the inter war period. Consequently the period studied covers the years 1918-1958. Yet another extension was necessary. Marxism Leninism regards sociology as a part of philosophy. Moreover Marxism Leninism often resorts to sociology to support or justify some of its philosophical views. Finally its criticism of bourgeois philosophy is often concerned with social philosophy and sociological theories which supposedly are implicit or explicit in bourgeois philosophy. For this reason it was desirable to consider in this study some theoretical and methodological problems of the social sciences. They are taken into account when they illuminate philosophical controversies or the evolution of Marxist Leninist philosophy. Marxism Leninism is not only a new line of development but also a new point of departure in Polish philosophy. It provides a striking contrast with the established philosophical tradition which originated roughly at the time when G. E. Moore and Bertrand Russell initiated the analytical trend in English philosophy. The contrast can be epitomised by the contradistinction of philosophy and ideology chosen as the title of this study.
