Kutuzov Alexander Mikaberidze, 2022 A Russian war hero who defeated Napoleon and became a mythic military figure Alexander Mikaberidze's latest book is the first modern English language biography of Mikhail Golenischev Kutuzov the famed Russian Field Marshal and central character of Leo Tolstoy's epic *War and Peace* One of the most important military minds of the period he is credited with defeating Napoleon and saving Russia though his fame is not limited to the Napoleonic wars As it often happens with national heroes Kutuzov gradually became larger than life a messianic character who led Holy Russia against the evils of the Revolution and anarchy the Soviet leaders later exploited his personality for even more grandiose schemes The real Kutuzov was gradually replaced by a mythical character who appeared at a time of great danger to save Russia The impact of this propaganda can be still seen in modern Russia In 2000 the public opinion poll showed that majority of the Russians consider Kutuzov as the Person of the 19th Century far ahead of famous writers Alexander Pushkin and Leo Tolstoy composer Peter Tchaikovsky or scientist Dmitry Mendeleev while the 2017 public opinion poll placed Kutuzov in the top twenty of the most distinguished historical personalities in world history slightly behind Napoleon As much as Kutuzov is venerated in Russia he remains an overlooked figure in the West with Western historiography comprising of just a handful of titles in English French or German the vast majority of them translations of older Soviet works or derived from them This book provides a new biography of the field marshal examining his personal life and military diplomatic accomplishments and relying on a wide range of primary and secondary sources as well as Russian archival material Mikaberidze offers a fresh look at the historical figure whose character remains elusive but whose accomplishments are irrefutable

Real-World Decision Making Morris Altman, 2015-06-23 The first and only encyclopedia to focus on the economic and financial behaviors of consumers investors and organizations including an exploration of how people make good and bad economic decisions Traditional economic theories speculate how and when people should spend money But consumers don't always behave as expected and often adopt strategies that might appear unorthodox yet are at times more effective than the rule prescribed by conventional wisdom This groundbreaking text examines the ways in which people make financial decisions whether it is because they are smart but atypical in their choices or just irrational decision makers A leading authority on behavioral economics Morris Altman and more than 150 expert contributors delve into key concepts in behavioral economics economic psychology behavioral finance neuroeconomics experimental economics and institutional economics to help inform economic models based on reality not theory Through 250

informative entries the book explores various aspects of the subject including decision making economic analysis and public policy In addition to introducing concepts to readers new to the subject the book sheds light on more advanced financial topics in a manner that is objective comprehensive and accessible

The Moral Conflict of Law and Neuroscience Peter A. Alces,2018-01-24 Law relies on a conception of human agency the idea that humans are capable of making their own choices and are morally responsible for the consequences But what if that is not the case Over the past half century the story of the law has been one of increased acuity concerning the human condition especially the workings of the brain The law already considers select cognitive realities in evaluating questions of agency and responsibility such as age sanity and emotional distress As new neuroscientific research comprehensively calls into question the very idea of free will how should the law respond to this revised understanding Peter A Alces considers where and how the law currently fails to appreciate the neuroscientific revelation that humans may in key ways lack normative free will and therefore moral responsibility The most accessible setting in which to consider the potential impact of neuroscience is criminal law as certain aspects of criminal law already reveal the naivet of most normative reasoning such as the inconsistent treatment of people with equally disadvantageous cognitive deficits whether congenital or acquired But tort and contract law also assume a flawed conception of human agency and responsibility Alces reveals the internal contradictions of extant legal doctrine and concludes by considering what would be involved in constructing novel legal regimes based on emerging neuroscientific insights
