The British Library General Catalogue of Printed Books to 1975 British Library,1986 *The Number Sense of Nineteenth-Century British Literature* Stefanie Markovits,2025-01-12 The Number Sense of Nineteenth Century British Literature considers how the avalanche of printed numbers characterizing the period affected its literature It looks at the influence of a variety of cultural and historical movements such as the rise of statistics and of democratic Liberalism and concurrent developments in mathematics This book takes as its starting point and focus the presence of actual numbers

ordinal and cardinal Arabic Roman and spelled out in words within the century's literary texts. It is through the deployment of such figures that texts display their number sense. Similarly, readers develop the faculty of number sense by paying careful attention to their presence. And contemplation of a text's use of numbers while frequently pointing to specific historical contexts also enables more fundamental recognitions about how literature makes meaning. *The Number Sense* asks what kinds of work intellectual and ethical literature's numerical figures perform. Why are some writers especially prone to include numbers? What affordances do they wield in various literary environments and against the backdrop of the numbery nineteenth century? When do textual numbers really count and when do they ask us to keep count? How do they stage contests between the one and the many individuals and collectives? How do they relate to formal aspects of works like plot and character narrative and lyric? Lingering over literary measures illuminates the way numbers help shape texts into the recognizable forms we call genres. To that end, the book considers the works of poets like Tennyson, Wordsworth, and Byron and of novelists working in a broad range of genres including Jane Austen, George Gissing, Charles Dickens, Anthony Trollope, Lewis Carroll, Bram Stoker, Wilkie Collins, and Thomas Hardy. The numbers embedded in their fictions and verse can serve both as valves releasing cultural pressures and as fulcrums, places where pressures coincide to create new forms of literary agency.

Erotic Faith Robert M. Polhemus, 1995-03 In this profoundly original and far-reaching study, Robert M. Polhemus shows how novels have helped to make erotic love a matter of faith in modern life. Erotic faith, Polhemus argues, is an emotional conviction ultimately religious in nature that meaning, value, hope, and even the possibility of transcendence can be found in love. Drawing on a wide range of disciplines, Polhemus shows the reciprocity of love as subject, the novel as form, and faith as motive in important works by Jane Austen, Walter Scott, the Brontës, Dickens, George Eliot, Trollope, Thomas Hardy, Joyce, D. H. Lawrence, Virginia Woolf, and Samuel Beckett. Throughout, Polhemus relates the novelists' representation of love to that of such artists as Botticelli, Vermeer, Claude Lorrain, Redon, and Klimt. Juxtaposing their paintings with nineteenth and twentieth-century texts both reveals the ways in which novels develop and individualize common erotic and religious themes and illustrates how the novel has influenced our perception of all art.

Figures of Conversion Michael Ragussis, 1995 Between the 1870s and 1890s, considerable attention was paid to Jews and Judaism by English critics and writers. Argues that the consideration of Jews by English writers was often in the context of their efforts to describe and improve the English character. Observes that alongside English antisemitism there existed English attitudes which were in effect protective of the Jews. These included the Evangelical Revival's desire to both protect and convert the Jew, the English self-definition as both tolerant and believing in God in contrast with intolerant Spain of the Inquisition and godless France of the Revolution, and the view expressed in George Eliot's *Daniel Deronda* which was affirmative of Judaism and the quest for a Jewish national homeland.
