Studio Anywhere 2: Hard Light Nick Fancher, 2017-01-20 In Studio Anywhere 2 Hard Light photographer and author Nick Fancher builds on the success of his previous book Studio Anywhere A Photographer's Guide to Shooting in Unconventional Locations as he continues to offer candid practical and valuable lessons on how to create successful and fresh photographs armed with only minimal gear a resourceful mind and a creative spirit. The heart and soul of Studio Anywhere 2 Hard Light resemble its predecessor but this time Nick focuses his approach on hard light demonstrating how to use it in innovative and flattering ways working with subjects ranging from products to people. You'll learn How to work with both available light e.g. the sun and manufactured light such as inexpensive small flash. How to shape bounce and manipulate your unmodified flash to get the results you want. The importance of proper light placement and ambient balance. How to create dramatic intentional photographs with hard light. DIY techniques for making your own gobos and photo hacks such as with a reflector. How to incorporate colored gels into your work to create expressive and innovative imagery. Post processing tricks and techniques that Nick uses to achieve the final look of the image. Included in the book are behind the scenes photos lighting diagrams and Lightroom settings for every scenario so the reader can follow along from idea through the shoot and on to the final edit. There is also a feature throughout the book called Making a Scene where upon being presented with an empty scene you're challenged to figure out where you might place your subject and your light's in order to achieve a specific effect or result. At the back of the book Nick shows you how he chose to tackle each scenario. The goal is to train yourself to look at the everyday commonplace locations and scenarios you encounter and begin to see them full of photographic potential.

Studio Anywhere Nick Fancher,2015 The concept for Studio Anywhere came from photographer Nick Fancher s experience trying to build model shots for his portfolio As a young professional photographer with a family he didn t have the money to rent out a studio and he wasn t familiar with all the areas around some of his models locations when he was traveling for example So he started shooting in the models living spaces Each place was different a penthouse here a dark art space there and they all forced him to think a bit outside the box and seek out photographic opportunities He also had to carry little gear traveling light All this gave him the idea for this book which highlights what one can do with a bit of portable gear a grasp of photographic basics and a lot of imagination in order to see the possibilities in any given situation In Studio Anywhere A Photographer s Guide to Shooting in Unconventional Locations Nick will cover different studios that can be created anywhere from a basement to a street from an office to a park from a living room to a backyard And he will do all this with just the following gear 1 3 Speedlites a foam core board a grid for the flash an umbrella an ND filter and gaffer tape And because his photos have a unique look to them Nick will also include his post processing in Lightroom with occasional pro tips as he jumps over to Photoshop for just a bit of heavier lifting in the digital darkroom Nick will also have a Deconstruct this photo thread running throughout the book one for each studio section which will help students be able to better read photos how many lights were used what kind of modifier was used where was the light placed in order to reverse engineer them so that they can recreate similar lighting scenarios themselves After reading Studio Anywhere students will be inspired to get out and shoot in more unconventional locations and will be equipped with the knowledge and know how to do so
