Kelly's Directory of Chemists and Druggists ... ,1921 Markets in Fashion Patrik Aspers,2012-10-02 Interest in contemporary cultural industries has grown in the past decade as they take on a greater significance in our increasingly consumer led society Focusing on the world of fashion photography this book presents an interdisciplinary approach in which this and other aesthetic markets such as advertising modelling art music and more can be viewed The main thrust of this groundbreaking book is in developing a theory for these cultural markets characterized by insecurity and where status and aesthetic diversity generate order and price differentiation In these industries services and products are offered that are a mix of the aesthetic and the economic and for fashion photographers such as those studied here it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists and therefore cannot be considered using such modes of analysis Instead Aspers conducts his study using empirical phenomenology an original approach presented here for the first time which can be easily used in other empirical studies He draws on original empirical material participant observation and interviews generated in New York and Stockholm which bring a depth of analysis and a relevance to this book which academics researchers and those with a vested interest in such industries will value Written by one of the world s brightest young economic sociologists this fascinating book previously

published in Sweden and enthusiastically received is endorsed by recognized industry authorities A noteworthy book it provides a foothold in the burgeoning sub discipline of economic sociology and a significant analysis of the economics of the fashion photography industry

Women and Photography in Apartheid South Africa Marie Meyerding, 2025-04-29

Tracing the lives and works of five women in four case studies author Marie Meyerding examines the representation of women in the field of photography in South Africa in the second half of the twentieth century All of them are critically understudied with no existing scholarship dedicated exclusively to their photographic contributions Focusing on the representation of women on two different levels as agents behind the camera and as subjects in photographs it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation In recuperating their forgotten archives the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time The book will be of interest to scholars working in art history history of photography gender studies intersectionality and African studies

Jo Ann Callis Judith Keller, Jo Ann Callis, 2009

An artist who has long exploited the emotional power of color and texture Jo Ann Callis is widely known for her inventive photographs involving tactile objects and images of people in mysterious often unsettling narratives Jo Ann Callis *Woman Twirling* is the catalogue of an exhibition held at the J Paul Getty Museum from March 31 to August 9 2009 The book comprising sixty eight color and fifteen black and white works that range from 1974 to 2005 constitutes the first book length treatment of Callis s work since 1989 Many of these invented dreamlike scenes of people and objects will be new to viewers including a photographic installation of fifteen images of pastries lusciously printed in Cibachrome against textile backgrounds and a more recent series of digitally montaged domestic interiors Others such as *Salt Pepper Fire* in which a pair of salt and pepper shakers and a cup of coffee stand next to a plate of food that has burst into flame while a bird flies over the table are familiar favorites All of these works attest to Callis s singular vision of the delicate boundary between the world within and the world without
