Birds of China Liu Yang, Chen Shuihua, 2024-01-16. The avifauna of China include a total of close to 1 500 species of which 60 are endemic. More than 100 species are globally threatened. This new field guide published in China by Chinese National Geography treats all species illustrating every one using 4 000 individual images. Each species has identification text and a distribution map. It is in every way a modern style field guide and will fill a void for birders within and outside China.

The British National Bibliography Arthur James Wells, 2002. *Porcupine!*, 2004. Birding World, 1999. **Main Conference Proceedings** Association of Avian Veterinarians. Conference, 2000. Where to Watch Birds in World Cities Paul Milne, 2006. An indispensable book for traveling bird enthusiasts who find themselves in a foreign city with a little free time. This is the first birder's guide to sixty cities of the world. Designed and written for the bird enthusiast who is traveling for reasons other than birding on business with family for academic conferences, the book offers assistance in locating birds, identifying local bird residents and using public transportation. Where to Watch Birds in World Cities deserves a permanent place in the suitcase or briefcase of anyone who would like to make the most of limited time in an unfamiliar city by learning about the local birds. Entries for each of the sixty cities provide an introduction to the city and detailed information on major bird watching sites including lists of typical summer and winter bird residents and migrants and directions for getting to the sites using public transportation. The book is illustrated throughout with maps and attractive line drawings. In no way a replacement for detailed guides to specific cities or regions, this book instead fills an important gap for travelers whose birding though done on short notice can nevertheless prove delightful. Some cities included in this guide: Milan, Toronto, Mexico City, Tokyo, Los Angeles, Taipei, Lima, Singapore, Kampala, Shanghai, Hong Kong, Dublin, Copenhagen, Seattle, Chicago, San Francisco, Caracas, Rome, Cape Town, Rio, Buenos Aires, Paris, Boston, New York, Berlin, New Delhi, Zurich, Amsterdam, Nairobi, Warsaw.

A C Black. *Western Tanager*, 1996. **The Handbook of Bird Identification** Mark Beaman, Steve Madge, 2010-09-30. An identification guide covering all the bird species to have occurred in the European region. Birding is one of the most popular activities and pastimes in Europe and so it follows that it is essential to be able to identify the birds on view, be it in the back garden or for making more serious in-depth studies. This book aims to bring together as much information as possible in one volume using extremely detailed up-to-date guides and identification of every species known to have occurred in Europe and the West Palearctic, that is the whole of Europe, North Africa as far south as the Central Sahara, the Middle East to the border of Iran, the Azores, Madeira, Canary Islands, the islands off Mauritania and

the Cape Verde islands as defined by Cramp and Simons 1977 They have certainly been successful in doing so and have produced a wonderfully comprehensive guide covering nearly 900 species showing a wide range of differing plumages The colour plates are exquisite and have been painted by some of Europe s leading bird artists The text is clear and can be followed by beginners but finer points of identification are included for the benefit of more serious bird watchers Particularly helpful is the cross referencing of the text and colour plates There are more than 600 colour maps to identify where the birds are to be found which are simple and easy to use with excellent descriptions of status and habitat
