Photographic World And Humour Of Cuthbert Bede:

The Photographic World and Humour of Cuthbert Bede Bridget Ann Henisch, Heinz K. Henisch, 2002 *The Photographic World and Humour of Cuthbert Bede* Bridget Ann Henisch, Heinz K. Henisch, 2002 *Encyclopedia of Nineteenth-Century Photography* John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide. *Impressed by Light* Roger Taylor, Larry John Schaaf, 2007 Summary: Photography and an age of paradox. The formative years: the calotype in the 1840s. The great exhibition of 1851. Battling patents and gaining legitimacy. The calotype finds its place. Subjects fit for the camera. British sensibilities. 1855-1857. Echoes of the grand tour. Under an Indian sky. Commercialism advances; the calotype declines. *Study in Black and White* Tanya Sheehan, 2018-11-26 In this volume Tanya Sheehan takes humor seriously in order to trace how photographic comedy was used in America and transnationally to express evolving ideas about race, black emancipation, and civil rights in the mid 1800s and into the twentieth century. Sheehan employs a trove of understudied materials to write a new history of photography, one that encompasses the rise of the commercial portrait studio in the 1840s, the popularization of amateur photography around 1900, and the mass circulation of postcards and other photographic ephemera in the twentieth century. She examines the racial politics that shaped some of the most essential elements of the medium, from the negative-positive process to the convention of the photographic smile. The book also places historical discourses in relation to contemporary art that critiques racism through humor, including the work of Genevieve Grieves, Adrian Piper, Lorna Simpson, Kara Walker, and Fred Wilson. By treating racial humor about and within the photographic medium as complex social commentary rather than a collectible curiosity, *Study in Black and White* enriches our understanding of photography in popular culture. Transhistorical and interdisciplinary, this book will be of vital interest to scholars of art history and visual studies, critical race studies, U.S. history, and African American studies. *Rutland Record*, 1995 Positive Pleasures: Early Photography and Humor, 1998 **The British National Bibliography** Arthur James Wells, 2002 Photographs of Peking, China 1861-1908 Nick Pearce, 2005 This book provides an addition to the small but

growing body of literature on the practices of photography in China Using a collection of a surviving nineteenth century photographs of Beijing held in the collection of the Oriental Museum University of Durham the author explores both the cityscape as it was recorded by two Scottish photographers and the interplay of personality and professional identities within the Foreign Legation quarter during a thirty five year period Three people are central to the book the professional photographer John Thomson the amateur photographer and missionary doctor John Dudgeon and Stephen Bushell physician to the British Legation pioneer historian of Chinese art and original owner of the collection of the photographs They provide the context and practice and provenance for the photographs and offer insight into the life of the small contingent of Westerners who resided within the walls of China s capital here for the first time the former revealed as an important contributor to the development of photography in China the latter a major influence on the formation and interpretation of a number of important collections of a Chinese art in Britain and America This book will be of interest to historians of photography art architecture and China during the late nineteenth century This erudite study is of interest not only to art historians but also to historians of China and of comparative colonialisms

A Familiar Strangeness Stuart Burrows, 2010-05-31 Literary critics have traditionally suggested that the invention of photography led to the rise of the realist novel which is believed to imitate the detail and accuracy of the photographic image Instead says Stuart Burrows photography s influence on American fiction had less to do with any formal similarity between the two media than with the capacity of photography to render American identity and history homogeneous and reproducible The camera according to Burrows provoked a representational crisis one broadly modernist in character Since the photograph is not only a copy of its subject but a physical product of it the camera can be seen as actually challenging mimetic or realistic theories of representation which depend on a recognizable gap between original and reproduction Burrows argues for the centrality of photography to a set of writers commonly thought of as hostile to the camera including Nathaniel Hawthorne Henry James William Faulkner and Zora Neale Hurston The photographic metaphors and allusions to the medium that appear throughout these writers work demonstrate the ways in which one representational form actually influences another by changing how artists conceive of identity history and art itself **A Familiar Strangeness** thus challenges the notion of an absolute break between nineteenth century realism and twentieth century modernism a break that typically centers precisely on the two movements supposedly differing relation to the camera Just as modernist fiction interrupts and questions the link between visibility and knowledge so American realist fiction can be understood as making the world less knowable precisely by making it more visible
