

Red-naped Snake (*Furina diademata*) 35-45 cm

R. W. G. Jenkins

The red nape is completely enclosed by black.

G. A. Hoyt

This slender snake has a shiny black head and neck. There is a red bar on the nape, which is totally enclosed by the black neck colour. The body colour is reddish-brown with each scale dark-edged giving the snake a reticulated appearance. The eyes are small and black.

Occurring in mid-eastern Queensland and most of New South Wales through to eastern South Australia, it is found in a wide range of habitats, often in association with termite or ant colonies. It feeds exclusively on small lizards and females produce a clutch of one to five eggs. **VENOMOUS BUT NOT REGARDED AS DANGEROUS.**

Orange-naped Snake (*Furina ornata*) 50-70 cm

R. W. G. Jenkins

Larger than the related Red-naped Snake, this species has a dark brown to black head and neck, with an intervening orange band on the nape completely separating the dark head and neck colouration. The body is slender and pale to dark orange or reddish-brown in colour. The eyes are small and black. Occurring in Queensland, the Northern Territory, northern South Australia and Western Australia (except for the southern parts), it is found in woodlands, shrublands and hummock grasslands. This snake feeds on small lizards and females lay three to six eggs in a clutch. **VENOMOUS BUT NOT REGARDED AS DANGEROUS.**

Grey Snake (*Hemiaspis damleii*) 45-70 cm

Adults are grey to olive-grey above, often with a black spot at the base of each scale. In younger specimens the head is black but this colouration is reduced to a dark band on the nape in older specimens.

R. W. G. Jenkins

The belly is cream with scattered grey spots. Occurring through inland New South Wales and south-eastern Queensland to the coast, it inhabits dry sclerophyll forest and woodlands in the vicinity of watercourses. It seems to concentrate its activity around dusk and feeds mainly on frogs, although lizards are also taken. From six to ten young are produced between January and March. **VENOMOUS BUT NOT REGARDED AS DANGEROUS.**
