The classic picture perfect manual for taking great photos gets a freshening up with a brand new special section devoted to digital Written by the world's bestselling author on photography it's an image filled and practical guide for beginners eager to start shooting but who feel put off by technical jargon and complicated techniques And Hedgecoe focuses on the most commonly owned starter cameras too as well as offering an invaluable list of Twenty Ways to Improve Your Photos and 250 of his own inspiring pictures Hedgecoe uses the most commonly owned beginners cameras to demonstrate how the camera works in simple nontechnical language Photographic Trade News The lessons are easy given the well laid out visual examples Booklist One of the best introductory texts my highest recommendation Shutterbug [Nineteenth-century Photographs and Architecture](#) Micheline Nilsen,2013 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early

decades of photography but focuses on the thematic content of the material. It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic.

Beyond the Architect's Eye Mary N. Woods, 2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium's power to depict how the past jostled the present. In *Beyond the Architect's Eye*, Mary N. Woods expands on this range of images through a rich analysis that commingles art, amateur, and documentary photography genres usually not considered architectural but that often take the built environment as their subject. Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II when urban and rural areas grew further apart in the face of skyscrapers, massive industrialization, and profound cultural shifts. Central to this study is the work of Alfred Stieglitz, Frances Benjamin Johnston, and Marion Post Wolcott, but Woods weaves a wider narrative that also includes Alice Austen, Gertrude Kasebier, Berenice

Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old South crystallized in photographs like Johnston's a New South shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach Beyond the Architect's Eye is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography
