

Photographing History: Fred J. Maroon and the Nixon Years, 1970–1974

The images that you are about to see — one photographer's account of President Richard Nixon's years in office — offer a powerful record of an unsettling time in American history. Fred Maroon, a freelance photographer known for images of Washington monuments and landscapes, won unusual access to President Nixon in 1970 with a proposal for a book on the Nixon White House.

After publication of the book the following year, he was invited to record Nixon's reelection campaign operations. As the Watergate controversy unfolded in 1972–1974, Maroon continued to document the Nixon years, photographing the Senate investigation, the House impeachment hearings, and the president's historic resignation on August 8, 1974.

“I didn’t realize how extraordinary this was going to be, or that I was starting on a four-year project when I began.” —Fred J. Maroon in an oral

history interview at the National Museum of American History in June 1998

Photojournalists like Maroon record history in the making. The images they create shape

Photography and Jewish History Amos Morris-Reich, 2022-11-15 It is a sign of the accepted evidentiary status of photographs that historians regularly append them to their accounts Amos Morris Reich observes Very often however these photographs are treated as mere illustrations simple documentations of the events that transpired Scholars of photography on the other hand tend to prioritize the photographs themselves relegating the historical contexts to the background For Morris Reich however photography exists within reality it partakes in and is very much a component of the history it records Morris Reich examines how photography affects categories of history and experience how it is influenced by them and the ways in which our understanding of the relationship between history and photography can be theorized and reoriented Morris Reich here turns to five twentieth century cases in which photography and Jewish history
