Imaging Culture Candace M. Keller, 2021-07-06 Imaging Culture is a sociohistorical study of the meaning function and aesthetic significance of photography in Mali West Africa from the 1930s to the present Spanning the dynamic periods of colonialism national independence socialism and democracy its analysis focuses on the studio and documentary work of professional urban photographers particularly in the capital city of Bamako and in smaller cities such as Mopti and Siguiri Featuring the work of more than twenty five photographers it concentrates on those who have been particularly influential for the local development and practice of the medium as well as its international popularization and active participation in the contemporary art market Imaging Culture looks at how local aesthetic ideas are visually communicated in the photographers art and argues that though these aesthetic arrangements have specific relevance for local consumers they transcend geographical and cultural boundaries to have value for contemporary global audiences as well Imaging Culture is an important and visually interesting book which will become a standard source for those who study African photography and its global impact **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress. Middle Eastern countries Modernisation usually in the Western model has often brought major improvements in agricultural technology education and public health but has also had the effect of weakening the traditional rural economy of many villages and encouraging their growing dependence on external sources of income most notably oil remittances This collection of research on the Middle Eastern village looks at the impact on rural life and environment of such factors as the mass exodus of labour to urban centres emigration immigration environmental change and the changing role of women in rural communities particularly the wives of migrant workers who have to fill a new role in the family structure State sponsored agrarian policies have weakened the power of traditional landed interests and together with labour migration have provoked new tension and inequalities in rural society The book makes clear that the pattern of change has been highly uneven and has served to heterogenise the countryside As the oil states enter a period of recession and the likelihood of substantial return migration increases rural communities will need to make further major adjustments and the book examines the tensions this new development is likely to produce First published in 1987
