 - Sell things
- Pre-photography
 - Before the birth of photography, paintings "ruled the art world during the renaissance and were the most popular type of art. Many people favored realism in paintings because it was the only way for artists to capture reality without a camera
 - Painted portraits were the only way to keep a likeness of a person or loved one with you. Memories couldn't be easily documented
- In 1821 Joseph Niepce developed the camera obscura - means dark chamber
- In 1826 Joseph Niepce took the very first photograph, used a camera obscura and a pewter plate coated with a light sensitive material called bitumen of Judea to capture and "fix" an image
- In 1837 Louis Daguerre produced a sharper and more refined picture, but it also cut the exposure time down from several hours to around 10 to 20 minutes
- 1851 Emulsion Plates - An Englishman named Frederick Scott Archer and a Frenchman named Gustave Le Gray are said to have almost simultaneously invented the collodion process, or "collodion wet plate process" in 1851

The collodion plates were required to be coated, sensitized and developed all within the span of fifteen minutes, necessitating the use of a portable dark room. The most common emulsion plates were ambrotypes, which were made on glass plates, and tintype, which were made on tin plates.
- As industrialization came to the western world in the 19th century, the industry started to employ photographers to show the strength of the industrial world
- Development of faster cameras in the 1870s spurred scientists and others to use photography in the study of human and animal movement. In 1878 Muybridge used a series of photographs of a galloping horse to demonstrate to the world that the animal lifts all four feet off the ground at once.
- 1888 - Kodak - The average person was familiar with what photographs looked like and probably kept some at home, but few people took photographs themselves. In addition, most photographs existed as unique originals, because copies were still difficult to make
- 1948 Polaroid - The polaroid model 95. It was the world's first viable instant-picture camera. The model 95 used a patented chemical process to produce finished positive prints from the exposed negatives in under a minute
- 1966 - First picture of the moon - the photograph, Earthrise, is considered one of the
